ABOVE PRICES ARE FOR CASH WITH ORDER.

FERTILISER.

We are frequently asked to recommend a good Fertiliser. It is difficult to do this, as different fruits and crops require a varying analysis. To meet this we have made arrangements with a manure mill to make up to our own prescription, and if clients will state what special crop or growth they wish to fertilise for, we will exercise our discretion and give satisfaction.

£9/5/- per Ton; 16/6 per Bag. CASH WITH ORDER.

INTRODUCTION

A FEW NOTES RE OUR GOODS AND OUR MODE OF DOING BUSINESS

THIS CATALOGUE is our 82nd annual issue, and we again take the opportunity of thanking our numerous friends and clients in the Southern Hemisphere for their continued and increased support.

IN FRUIT TREES, STOCKS WE OFFER are worked almost solely under our personal inspection. Buds and scions are procured from only the very finest fruiting types in the Commonwealth, and not from young Nursery trees, as is practised by so many of the Trade who raise SO-CALLED CHEAP TREES. This bud selection we make a speciality of, and contend that, where propagating wood is taken only from parent trees that, besides being true to name, are selected for being either better growers or better bearers or for better colour, our strains are TRULY PEDIGREE; hence our slogan and our contention that our stock, when it comes into bearing, is worth far more per acre to the grower than the so-called CHEAP TREES. The N.S.W. Fruitgrowers are now asking the Government to make this very action compulsory by all nurseries, and if it can be made law in workable form, we shall naturally welcome it, as we have been carrying out the same thing exactly for the past twenty-five years without any legal pressure. That our customers appreciate our work along these lines is borne out by the very large and increasing business we do. Our prices will bear very favourable comparison with any of our legitimate competitors; but we at no time make a claim to produce CHEAP TREES, which in the long run will prove dear trees to the grower. What applies to FRUIT TREES applies as far as is reasonably possible to all our other lines.

VARIETIES CATALOGUED.—It is generally recognised that the list of varieties heretofore published is far too long and misleading, and our Mr. Ferguson, with several others representing the Nursery Association, has met in conference with representatives of the Department of Agriculture, Fruitgrowers' Federation and representatives of the Sydney Fruit Merchants, to have varieties offered and catalogued considerably reduced. This reduction will come into operation in 1930. Many old and out-of-date varieties are being deleted; also a number of others that only do well in certain districts. The list for 1930 will be largely reduced, and we wish to stress that if certain of our friends wish to renew some of their old favourites, this season will be their last opportunity to procure, as next year they will be no longer listed. We could, of course, after this year, in most cases work specially to order, as in a number of instances we are retaining a stock tree. We can, if desired, forward a list of what varieties will be retained after 1929.

PACKING

Like our trees, our packing is excellent, and our packages carry safely throughout Australasia. Only clean, new material is used, which obviates the danger of conveying disease. Packing material charged at cost only.

TERMS

Our terms are cash on receipt of invoice, with an allowance of 2½ per cent. for cash with order. Unknown correspondents will kindly remit cash when ordering, or mention a Sydney reference. We also have ledger accounts for the convenience of frequent buyers, which are due nett September 15 of each year. Bank interest charged on overdue accounts. All packages delivered F.O.R. Darling Harbour, Hurstville, and Camden or Sydney wharves. On our receiving a receipt that same have been delivered in good order, our responsibilities cease.

CONDITIONS OF SALE

We believe that all fruit trees, roses, shrubs, etc., sold by us are of the description and kind specified by us at the time of sale; but, owing to the practical impossibility in many cases of being certain of this, we give no undertaking that such fruit trees, roses, shrubs, etc., etc., will correspond with the description under which they are sold, and we make all sales subject to this condition. We

WE WELCOME INSPECTION BEFORE ORDERING.

further give no warranty, expressed or implied, as to their growth, description, quality, or productiveness, and will not be in any way responsible for the crop. If the purchaser does not accept the goods sold to him on these terms they are at once to be returned to us, and any money paid to us will be refunded.

FUMIGATION

Our stock is thoroughly clean, and is inspected frequently by inspectors of the Department of Agriculture. As an additional safeguard, we have the largest nursery fumigator in Australia at Hurstville, where, for our own protection, all stock is treated under the supervision of the Department of Agriculture. Any customer may have a Government certificate of fumigation and freedom from disease if they so desire.

THIS SHOULD GIVE YOU CONFIDENCE.

HOW TO PLANT

The land must be thoroughly prepared by ploughing several times to get rid of weeds and trash. If possible, it should be subsoiled, as this permits the excess of moisture to get away, and at the same time, by enabling the roots to penetrate, allows the tree, in dry weather, to draw upon the moisture stored in the subsoil. We urgently advise a thorough preparation of the land before planting. **Planting in Pot Holes must be avoided** if your trees are to thrive. When the land is thoroughly prepared, mark each place with a stake, and open the holes as large as possible, stacking the surface soil round the hole for use when planting. Break up the subsoil well, but allow it to remain at the bottom. Do not plant your tree deeper than it stood in the nursery. Work the fine surface soil well into the well-spread roots, and tread well when your hole is half full. If watering is necessary, do it at this stage, and fill in when water has disappeared.

All Trees must be Pruned when Planted

F. FERGUSON & SON

Australian Nurseries,

HURSTVILLE AND CAMDEN, NEW SOUTH WALES, AUSTRALIA

Interpollination or Cross Fertilisation of Fruit Trees

This is no new-fangled idea, but is being recognised as essential by the leading fruitgrowers of the world. In our previous catalogues we have gone very minutely into this matter, and are to-day more firmly convinced than ever that it is the one and only road to successful commercial fruitgrowing. We are attaching, in this catalogue, approximate flowering dates opposite most of the leading commercial varieties. These dates have been very carefully compiled from records of the N.S.W. Department of Agriculture; also from interested friends beyond the State, who have courteously allowed us to publish. It must be clearly understood, however, that dates mentioned are approximate only, as many causes over which the planter has no control (late frosts, spraying material, etc.) may cause a variation. Early or late districts will, of course, vary with the printed dates; but the sequence will, we think, be found to be the same, and we suggest a careful perusal by the up-to-date commercial orchardist, of our lists before placing his order.

Australian Fruits and varieties of which the names have been lost.—There are, of course, many excellent varieties known to growers, but not in propagation, which do particularly well in certain districts. Many are, of course, unnamed; but we shall at any time be pleased to hear from our friends re these, as we can at any time work specially to their order from their own wood.

Diagram of Square and Septuple System of Planting

Together with Table showing Number of Trees per Acre by Either System.

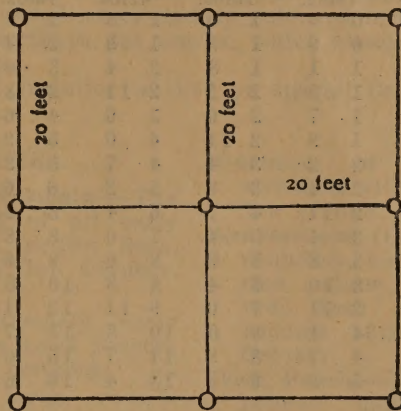

Square System

Distance
apart of
Trees.
Feet.

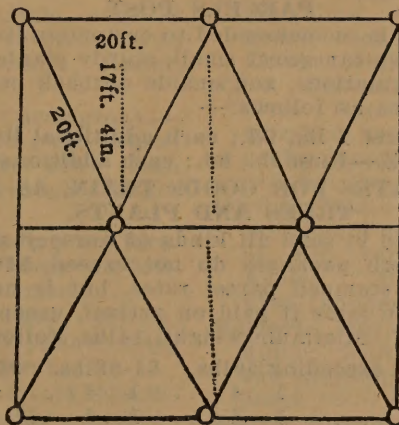

No. of
Trees
per
Acre.

1 . .	43,560
5 . .	1,742
10 . .	435
12 . .	302
14 . .	222
15 . .	193
16 . .	170
18 . .	134
20 . .	100
22 . .	90
24 . .	75
25 . .	69
26 . .	64
28 . .	55
30 . .	48

Square System.

Septuple System.

Septuple System

Distance
apart of
Trees.
Feet.

No. of
Trees
per
Acre.

1 . .	50,300
5 . .	2,012
10 . .	503
12 . .	349
14 . .	256
15 . .	222
16 . .	196
18 . .	164
20 . .	125
22 . .	103
24 . .	86
25 . .	80
26 . .	73
28 . .	68
30 . .	55

From above it will be readily seen that planting on the septuple or equilateral system enables roughly 25 per cent. more trees to be planted per acre.

How Best to have your Trees and Plants Forwarded

Lots weighing, say, 14lbs. are best sent per passenger train, prepaid, but over that weight are better per single package goods (a specially cheap rate applying to goods up to 140lbs.). Any small parcels are better sent per post, as we can choose small, sturdy plants for this purpose.

STAMPED PARCELS (PREPAID) RATES PER MAIL TRAIN.

As these rates only apply when freights are prepaid, customers are requested to add the amount to their remittances. If not stamped, the freight is 25 per cent. more with a maximum of 1/- excess.

One dozen fruit trees weigh about 12 to 18lbs., according to size of trees.
Fifty trees, packed, weigh about 56lbs.

Miles	3lbs.	7lbs.	14lbs.	28lbs.	42lbs.	56lbs.	84lbs.	112lbs.	Each Additional 28lbs. or part thereof

Over									
850 . . .	3 8	5 1	7 5	10 5	15 8	19 1	23 11	27 4	6 7

These are the rates at going to press, but may be increased at any time.

PARCELS POST

This means of transit is recommended to customers living long distances from rail communication, and we can select small, sturdy plants or trees, of a size that will conform with the regulations, and enable outback people to keep abreast of the times. The rates are as follows:—

Within N.S.W.—First 1 lb., 9d.; each additional lb., 6d. up to 11 lb.

Other States and N.Z.—First lb., 8d.; each additional lb., 6d. to 11 lb.

SINGLE PACKAGE RATES FOR GOODS TRAIN, AS APPLIED TO FRUIT TREES AND PLANTS.

We are now permitted to send all kinds of nursery stocks by goods train, at single packet rates, if such packages do not exceed 140lbs. in weight. This rate is far cheaper than stamped parcel rates, but is not so quick or reliable. Freight in such case is the same if paid on arrival, except unattended platforms, which have to be prepaid. Minimum weight, 14lbs. Following are the charges:—

	Not exceeding 60lbs.	61-98lbs.	99-112lbs.	113-140lbs.
Up to 50	1 4	1 4	1 4	1 4
51 to 100	1 4	1 4	1 9	2 1

301 to 400	2 5	3 5	4 6	5 2
401 to 500	2 10	3 10	4 10	5 11
501 to 600	3 1	4 2	5 2	6 3
Each add. 100 miles	0 4	0 4	0 4	0 4

These rates are now plus 10 per cent.

FRUIT TREES

GENERAL LIST

For Prices and Varieties We Recommend See Coloured Insets.

APPLES

Many varieties listed this year will disappear in 1930. See our remarks in introductory and on coloured inset.

Apples worked on Northern Spy stocks, which means that the root system is immune to Woolly Aphis.

We have also a few varieties worked on special Crab Seedlings for shallow soils and hard pan land.

EARLY VARIETIES.

- American Summer Pearmain.**—The most highly flavoured of all early Apples. Medium size, yellow flesh, very tender. Blooms 1st October, lasts nine days.
- Allsopp's Early.**—An extremely early variety, ripening before Lord Nelson. A showy fruit, mainly cooking.
- Astrachan Red.**—Fairly large, roundish, covered with deep crimson; flesh quite white, juicy.
- Carpenter.**—(See Gravenstein)
- Carolina Red June.**—Medium, oval, or conical; skin nearly covered with deep red, flesh very white; tender, very juicy.
- Carrington (Red, Lady Carrington).**—Medium, roundish; skin pale yellow; clear light red in the sun; flesh white, very tender; thoroughly blight proof.
- Carrington Striped.**—Similar to foregoing, except that markings are brilliant red stripes; blight-proof.
- Climax.**—Blight-proof, skin yellow, streaked with red; flesh yellow, crisp and juicy, and very sweet.
- Cowell's Red Streak.**—An old N.S.W. raised variety; very highly coloured; somewhat like Gravenstein. Comes in before Trivett's Seedling. Highly recommended. Blooms 30th September, full 5th October.
- Devonshire Quarrendon.**—Medium size, roundish, rich crimson in the sun; flesh whitish, crisp, juicy. Blooms 1st October, full 9th October.
- Duchess of Oldenburgh.**—Medium, streaked with red on a golden or yellow ground; almost blight-proof.
- Gravenstein (Carpenter).**—Fruit large, roundish, but a little irregular; skin rich yellow, streaked with bright red; flesh whitish yellow; crisp. Blooms 30th September, full 5th October.
- Irish Peach.**—Medium size; skin clear yellow, handsomely striped with bright red; quite blight-proof. Blooms 22nd September, lasts 8 days.
- Keswick Codling.**—Large, skin greenish-yellow, with a faint blush; a grand cooking Apple. Blooms 1st October, full 9th October.
- Lord Nelson.**—Enormous size, skin clear lemon yellow, shaded and splashed with a clear, bright red; a cooking apple. Blooms 30th Sept., full 5th October.
- Lord Suffield.**—Fruit large, rather conical; colour pale greenish-yellow. One of the very finest early cooking Apples. Blooms 6th October, full 11th October.
- Marjorie Hay.**—A very early dessert Apple; fruit large, conical, striped, and mottled with lovely red; blight-proof.
- Scarlet Pearmain (True) (syn. American Summer Permain).**—
- Sharpe's Early.**—Medium size, roundish; skin deep golden yellow, beautifully striped. Blight-proof. Blooms 30th September, full 5th October.
- Summer King.**—A valuable early market variety, large, striped crimson, red and orange; flesh tender.

Trivett's Seedling.—Medium size, skin yellow streaked and splashed with broken crimson stripes; a showy apple, and a good market variety; blight-proof.

William's Favourite.—A very handsome dessert apple of very fine flavour; bright red. One of the earliest. Blooms 7th October, full 12th October.

MID-SEASON VARIETIES.

Alexander.—Very large, regularly formed, skin greenish-yellow; faintly streaked with red in the sun; tree very vigorous. Blooms 6th October, full 11th October.

Allington Pippin.—A variety of Cox's Orange Pippin, medium sized; skin clear yellow, flaked with crimson; flesh white, firm, and crisp.

Cox's Orange Pippin.—Medium size, round, very regular; skin greenish yellow, with a dark red cheek; flesh yellow, crisp, with a rich aromatic flavour. Blooms 5th October, full 12th October.

Charles Ross.—A seedling of Cox's Orange Pippin, crossed with Peasegood's Nonsuch; fruit of the shape of Cox's Orange Pippin.

Esopus Spitzenberg.—Handsome dessert apple, large, round, rather long; skin clear lemon-yellow, with a beautiful carmine cheek; rich and aromatic. Blooms 6th October, full 11th October.

Fanny.—(See Pomme de Neige, Snowy)

Foster.—Coming into use in February, it will fill up a gap in the market between the very early apples and "Jonathan." Blooms 7th October, full 12th October.

Granny Thompson.—A local seedling of Aiken Seedling type. Heavy cropper of first quality fruit.

John Sharp.—An improved Pomme de Neige, perfectly blight-proof, and very productive. Blooms 6th Oct., full 11th October.

Mobbs' Royal.—Large, a little flattened; skin grass-green, covered with brown-red in the sun; flesh white, juicy, sub-acid. A grand cooking fruit.

McIntosh's Red.—Improved Fanny or Pomme de Neige, having the same snow-white flesh of Fanny, but is far more highly coloured and richly flavoured. Blooms 1st October, full 9th October.

Peasegood Nonsuch.—Similar to Graevenstein, quite as handsome, and of

equal flavour; valuable marketed green as a cooker. Blooms 6th October, full 11th October.

Pomme de Neige.—Medium size; skin yellow, tinged with red in the shade, deep red in the sun; flesh very white, juicy and good; known as Fameuse, Snowy, and Fanny. Blooms 2nd Oct., full 10th October.

Ribstone Pippin.—Medium size; skin dull yellow, patched, and streaked with dark and pale red; flesh crisp. Blooms 1st October, full 9th October.

Ruby Gem.—Medium size; skin brilliant red all over; flesh white, crisp, and juicy; tree a strong grower; blight-proof.

Snowy.—(See Pomme de Neige).

Twenty-Ounce.—Very large, roundish; skin greenish-yellow, splashed with purplish red. Should be marketed green as a cooker. Blooms 23rd September, lasts 10 days. Known as Christmas Kitchen.

Willie Sharp.—Blight-proof, pale yellow colour; heavy cropper; valuable for early export.

Worcester Pearmain.—Medium size; skin almost covered with dark red stripes. A very handsome dessert apple. Blooms 11th October, full 14th October. Valuable in that it comes in just before Jonathan.

LATE VARIETIES

Adam's Pearmain.—Medium-sized, rather oblong; skin yellow, splashed with red; a grand dessert fruit. Blooms with Granny Smith.

Alfriston.—Large, showy culinary variety; good keeper; sells well on the Brisbane market; can be recommended. Late. Blooms 6th October, full 11th October.

Apple of Commerce.—Beautifully coloured, largest size, sound, hard, will cling to a tree during the heaviest gale. Blooms 19th September, lasts 10 days.

Blenheim Orange Pippin.—Large; skin deep orange, dull red stripes; flesh yellow. Blooms 3rd October, lasts 11 days.

Ben Davis.—Medium to large size; skin yellow, almost covered with splashes of two shades of red; flesh white. Blooms 1st October, full 9th October.

Buncombe (Red Winter Pearmain).—Medium size, oblong, conical; skin yellowish-white, mostly shaded with maroon; a very regular bearer. Blooms 10th October, full 14th Oct.

Black Ben Davis (Gano).—Seedling of that well-known apple, Ben Davis; better quality and keeper, and a much more certain cropper. Blooms 5th October, full 12th October.

Champion.—Very large and firm; skin deep golden yellow, covered with scarlet stripes. Blooms 2nd October, full 10th October.

Cleopatra (New York Pippin).—Medium to large, oblong to conical, skin a fine clear lemon-yellow; flesh white, very juicy and rich; a grand dessert apple. Blooms 1st October, full 9th October.

Crow's Egg.—(See Late Wine).

Crofton Pearmain.—A medium-sized, highly coloured apple, of good keeping quality; a favourite in some districts in Tasmania.

Delicious.—In colour like Jonathan, of most exquisite Ribston flavour. One of the best late-keeping apples. A grand thing for our cool districts. Blooms 7th October, full 12th Oct.

Dougherty.—Medium size, almost covered with bright red; a very fine dessert apple; good bearer; late. Blooms 5th October, full 12th Oct. An improved Yates.

Democrat (Tasma).—Tree robust, regular, and heavy bearer. First brilliant red; perfectly firm; good aroma; keeps well in cool storage. Blooms 2nd October, full 10th Oct.

Edna May.—In appearance like a highly coloured Jonathan; very firm; fine flavour; splendid bearer and excellent carrier; not liable to woolly aphids.

Five Crown Pippin (London Pippin).—Large, roundish; skin pale yellow, with, in some districts, a dark red cheek. A grand all-round apple, drying well. Blooms 10th October, full 14th October.

French Crab.—Fruit medium size; skin dark green; the very best keeping apple. Blooms 9th October, full 14th October.

Glengyle Red (Red Rome Beauty).—Same type as parent fruit, but red all over.

Granny Smith.—A very heavy bearer, and when grown in cold climates will keep for the whole year. Strongly recommended for export. Blooms 1st October, full 9th October. Will do well from semi-tropical districts to snow country.

Jonathan.—Medium size, roundish, conical; skin light yellow, almost covered with light and dark red or purple in the sun; flesh whitish, a little pinkish; very tender and juicy, with a sprightly vinous flavour. Highly recommended for shipping. Blooms 5th October, full 12th Oct. Does well in almost all soils and climates.

King David.—A rich dark red apple, with yellowish flesh; flavour good, juicy and rich. Blooms 7th October; full 12th October.

Lady Hopetoun.—In appearance it very much resembles "Jonathan." The raiser says the tree is perfectly blight-proof.

Lord Wolseley.—Medium size, skin clear, rich yellow; flesh very firm; juicy, brisk. Tree a constant bearer, and quite blight-proof. Blooms 5th October, lasts 9 days.

London Pippin.—(See Fivecrown).

Loy.—Is one of the largest and showiest apples in cultivation, rivalling that well-known variety "Gloria Mundii."

Munroe's Favourite (Dunn Favourite).—Largest size, skin clear yellow, with a reddish-brown cheek. A late-keeping apple of first quality. Blooms 1st October, full 9th October, good shipper.

Nickajack.—Large, roundish; skin yellowish, striped, and splashed with two shades of red. Blooms 7th Oct., full 12th October. Valuable as a pollinator.

Northern Spy.—Large; oblate, conical; skin pale yellow, with light and dark purple stripes; flesh yellowish; blight-proof. Blooms 7th October, lasts 7 days.

New York Pippin.—(See Cleopatra).

Oregon Mammoth Black Twig.—Vigorous grower, and very hardy; fruit very large, many specimens measuring 12 inches in circumference; colour dark red; flesh firm; long keeper. Blooms 6th October, full 11th October.

Ohinemuri.—(See Munroe's).

Perfection (Shepherd's).—Medium size, roundish; skin yellow, but deep rich red in the sun; flesh whitish. Blooms 2nd October; full 10th October.

Rome Beauty.—Fruit large; skin greenish-yellow, mottled and shaded with light red and streaks of darker red. Blooms 10th October, full 14th Oct.

Rymer.—Large, roundish, flattened; skin greenish-yellow; a few streaks of pale red in the shade, deep red in the sun. Blooms 7th October, full 12th October.

Scarlet Nonpareil.—Medium size, striped and shaded with deep red; flesh yel-

3-YEAR-OLD
GRANNY SMITH.

A BLOCK OF THESE
ARE MONEY MAKERS.

Prince Alfred.—Large elongated, conical; skin yellow, striped with clear red; flesh yellowish, firm, juicy, and rich. A grand export apple.

Rokewood.—Medium size, slightly conical; skin rich crimson, a little russet; flesh whitish. Blooms 28th September, lasts 11 days. Good shipper. Will cold store for twelve months.

lowish. Known in Tasmania as Scarlet Pearmain. Blooms 16th September, lasts 8 days.

Sturmer Pippin.—Medium size, roundish, oblate; skin a fine yellow, almost covered with brownish red; flesh firm, crisp, and very rich. Blooms 7th October, full 12th October.

Stewart's Seedling.—Largest size, roundish, flattened; skin pale yellow, with brown-red cheeks; flesh white, firm and solid. Blooms 5th October, full 12th October. One of the very best cookers extant.

Stone Pippin.—(See Winter Pearmain).

Senator.—Fruit not too large, and more brilliant than Pomme de Neige. Tree a vigorous grower and regular crop-

per. Blooms 2nd October, full 10th October.

Stayman Winesap.—Improvement on old Winesap; a variety that has been largely exported from America to Australia. Blooms 25th September, lasts 10 days.

Statesman.—Good bearer; fruit bright golden, striped and shaded with crimson; a good dessert and cooking variety. Blooms 6th October, full 11th October.

Tasma.—(See Democrat).

Winter Magetin.—Skin dark green, covered with brown red on sunny side, flesh whitish, and acid flavour, fruit medium size; blight-proof; blooms 5th October, lasts 10 days.

Winter Pearmain (Stone Pippin).—Medium size, roundish, inclined to be conical, skin pale yellow, with red cheek; flesh crisp, very juicy, splendid cooking. Blooms 1st October, full 9th October.

Winesap.—Medium size, roundish oblate; fine dark red in the sun, a little yellow in the shade; flesh yellow, firm, crisp, a rich flavour. Blooms 7th October, full 12th October.

Winterstein.—A late variety of Gravenstein or Carpenter, coming in after Gravenstein.

Yates.—Small, conical; skin whitish-yellow, splashed with shades of red; flesh white, stained next the skin, an enormous bearer; blight-proof. Blooms 23rd September, lasts 10 days.

ELSIE GRANT.

A Victorian raised variety cross between Yates and Old Rokewood. Is well coloured and will keep in cool sheds or cold store. It has the quality of Yates, combined with colour. Keeping qualities of Rokewood. Is being largely planted by growers of export apples. Price, 2/- ea.; 21/- doz.

Apples recommended for Cold Storage and Export:

Cleopatra, Delicious, Democrat, Granny Smith, London Pippin, Munroe's Favourite, Rokewood, Rome Beauty, Yates, Elsie Grant.

Apples recommended for mixed commercial orchards: Carpenter, Carrington, Lord Nelson, Lord Suffield, Williams Favourite, Fanny McIntosh Twenty Oz. (market green), Worcester, Pearmain, Cleopatra, Delicious, Democrat, Granny Smith, Five Crown, Jonathan, Munroe's Favourite, Stewarts Seedling, Yates, Elsie Grant.

FOR HOME GARDENS.—See Coloured Inset.

CUSTARD APPLES

(Cherimoyer)

This delicious fruit is well worth a trial in the warm inland districts, as, when established, it is much more hardy than is generally supposed.

Rough Fruited. The variety usually seen in the Sydney market bears moderate crops near the Coast. Price, 2/6 ea.; 22/- per doz.

Grafted Custard Apples.—To have the huge Ox Heart fruits seen in Sydney shop windows, it is necessary to have grafted plants. We have a limited stock available. Price, 5/- each.

These will only succeed in warm, semi-tropical districts.

APRICOTS

Worked on Seedling Apricot and Mariana Plum Stocks, also Peach Stock.

Alsace.—Large, roundish; rich yellow, shaded with brownish red; flesh deep yellow, very rich. Ripe first week in January.

Blenheim (Shipley's).—Fruit largest, a little pointed; skin clear yellow, bright red cheek; flesh deep orange.

Bobby Allen.—A second early apricot, succeeding Masculine by 10 days. Fruit large, conical, of good colour, known as Allen's Early.

Busche Peche.—Medium size, bright red in the sun, flesh deep yellow, ripe last week in December.

Belle de Toulouse.—Fruit very large, rich and juicy; a constant cropper. Ripens early December. Is a good carrier.

Campbellfield's Seedling.—Very large; skin rich orange, with large red blotches; flesh deep orange, very rich, juicy. One of our very best.

Camden Pale Superb.—Large, oval; skin pale yellow, bright red in the sun; flesh pale, very meaty; ripe first week December.

Carrington.—Must be heavily thinned; fruit large; skin brownish in the sun; flesh rich and vinous; ripe after Christmas.

Catell's Early.—Resembles Allen's Early but is said to crop regularly; early.

Dundonald.—A very favourite variety; fruit very large, skin deep orange; a fine variety, ripening with Moorpark.

Elruge.—Fruit always large; skin clear, deep yellow, dark red in the sun; flesh firm; early in December.

Early Moorpark.—A very fine apricot, ripe here end of November; very large, deep, rich orange in skin and flesh.

Gourlay.—A Californian variety, largely grown there for canning.

Hemskirke.—Largest size, roundish; skin deep orange; bright red in sun; flesh deep yellow; ripe middle of December.

Kaisha.—Strongly resembles Pine-apple; ripe here third week in December; its size will recommend it to planters for market.

Moorpark (Temple's).—Very large, round, one-sided; skin deep reddish orange, with an abundance of rich juice; needs good cultivation; ripe end December.

Mansfield Seedling.—Somewhat like Moorpark; skin deep orange, with a few red dots; a heavy bearer.

Newcastle Early.—Ripens third week November; fruit of fine yellow colour and a heavy bearer.

Oullin's Early.—Large; skin deep rich yellow, flesh orange; very rich; ripe third week December.

Pine Apple.—Large, roundish; skin bright yellow; very clean; ripe Christmas week.

Royal.—Large, deep yellow, tinged with beautiful red; flesh deep yellow, with an abundance of rich, vinous juice; ripe third week in December.

St. Ambroise.—Fruit large, roundish, deep yellow, rich red in the sun; flesh deep yellow.

Trevatt.—The very finest variety for drying. Fruit somewhat resembles Shipley's. Is an enormous cropper, and should be given a trial by those interested in canning.

Tilton.—Very large fruit, colour rich golden, fine flavour; a very superior canning or drying variety.

Red Masculine.—Earliest apricot ripening here, November 9; fruit small, round; skin yellow, beautifully red in the sun. Sometimes called "Willis Ely."

Riverside.—Larger than Moorpark; skin tinged red where exposed; flesh deep orange yellow, and very luscious.

River's Large Red.—Prolific bearer, fairly large, round; bright red in the sun; flesh orange, very rich and vinous; ripe third week in December.

Spark's Mammoth.—Large, pale yellow, flesh clear yellow; juicy and sweet.

Apricots we Recommend for Drying and Canning.—Shipley's, Moorpark, Mansfield, Seedling Tilton, Trevatt.

Apricots Recommended for Mixed Commercial Orchards.—Campbellfield's Seedling, Cattel's Early Elruge, Early Moorpark, Hemskirke, Mansfields, Newcastle Early, St. Ambroise, Tilton, Trevatt.

For Home Orchards.—See Coloured Inset.

BANANAS

Cavendishii.—The well-known dwarf banana, producing immense bunches of large, delicious fruit, with a delicious flavour. Price, 2/- each.

Gros Michael.—One of the best known market varieties; frequently has red skin.

Manilla.—A universal favourite.

Pear Shaped.—Largely grown in Queensland; dwarf and compact.

Sapientum.—The common banana, very hardy, and although not so rich as the preceding, of good flavour. Price, 1/6 each.

Giant Sugar.—Fruit small, but produced in immense bunches; flavour particularly rich and delicious. Price, 2/6 each.

CHERRIES

Worked on Mazzard Stocks, etc., etc. See Coloured Inset for Prices.

Bedford Prolific.—Large, roundish, skin dull brownish black; flesh tender and rich; a fine cherry; early. Blooms September 26, full October 1.

Bigarreau Rockport.—Skin, a beautiful bright red; flesh firm, juicy, sweet. Ripens a few days before May Duke.

Bigarreau Gaucher.—Very large, nearly round; skin brownish red; flesh reddish; firm, juicy and good. After E. P. Gean.

Bigarreau Pellisier.—Beautiful large fruit; skin dark glossy red; flesh rosy; valuable early cherry.

Biggareau Twyford.—Large, skin a bright shining red, recommended for growing for market on account of its earliness.

Bigarreau Napoleon.—Of the largest size, regularly heart-shaped; skin amber in the shade, with a fine crimson cheek; flesh firm and crackling; juicy. Blooms September 24, full September 30.

Bigarreau Jabourlay.—Described as the earliest Bigarreau Cherry, fruit large; dark, red, rich flavour.

Bing.—Fruit very large, dark brown or black; very fine; tree very vigorous and hardy; foliage heavy and dark green; flesh, firm and a splendid carrier. Blooms September 23, full September 30.

Black Republican (Lewelling).—Fruit of large size, deep shining black. Ripens latest.

Black Tartarian.—Of largest size; skin glossy, purplish black, flesh purplish, half tender; superb fruit. Blooms September 23, full September 30.

Burgdoff's Seedling.—A magnificent large dark red, very early variety, ripening just after Early Purple Guigne. Blooms September 27, full October 1. Does well near the Coast.

Early Lyons.—Fruit very large; skin deep red in the sun; flesh red, very juicy, firm and very solid. A grand market variety, ripening a week after Early Purple Gean.

Early Purple Gean.—Medium size, round, heart-shaped; skin smooth, rich purple; flesh purple, tender.

Early Rivers.—Large, purplish black; flesh rich and agreeably perfumed; ripening a week after Purple Gean. An enormous cropper.

Florence.—Large, roundish heart-shaped; pale amber, nearly covered with bright red, flesh amber, very firm; a favourite fruit for market on account of its lateness. Blooms September 25, full October 1.

May Duke.—Fruit medium, skin rich dark red; flesh reddish, tender and melting; a popular early cherry.

Morello.—Medium, skin, rich dark purplish red, rich purple juice; the favourite cooking and preserving cherry.

Noble.—Large dark red, flesh firm, good flavour; tree hardy and prolific; reputed to be the best dark cherry grown. Blooms September 28, full October 3.

Precoco de Boppard.—The earliest cherry known, ripening October, before Early Purple Gean; fruit dark glossy red, striped and spotted; a good grower and constant cropper. Blooms September 27, full October 1.

Ramen Olivar.—Dark glossy red; flesh firm and sweet; very large, measuring up to 1½ inch in diameter; called the upright Lyons by some growers. Blooms September 28, full October 3.

St. Margaret.—Very large, roundish heart-shaped; skin shining black; flesh purple, very juicy, with a strong, brisk flavour; a grand cherry, ripening with Florence, and always commanding high prices. Blooms September 27, full October 1.

Werder's Early Black.—Fruit large, tender, very rich; perhaps the most profitable variety for market culture. Blooms September 23, full September 30.

CITRUS TREES

Worked on Lemon (Citronelle) Stocks.

ORANGES

For Prices See Coloured Insets.

(Read our remarks re reduction of varieties.)

Buckeye Navel.—Improved Washington Navel from America; a true Navel orange, ripening early in season; distinct and delicious flavour; a good cropper.

Blood (Maltese).—Medium size, flattened; skin deep red, filled with abundance of deep red juice; tree a free grower; ripens early.

Golden Nugget Navel.—Very smooth, solid, and thin skinned; of very fine

texture; pendulous habit of growth, and is a regular and even cropper. Can be planted more closely together than other oranges.

Jaffa.—Tree a strong, vigorous grower; very productive.

Joppa.—Fruit large size, oblong; skin particularly thin; tree a vigorous upright grower, thornless; a constant and early bearer. Very few seeds.

Mediterranean Sweet.—Its great value consists in its being an early, prolific and continuous bearer; medium size, slightly oblong; compact grower.

The Navelencia.—A cross between the popular Valencia and Washington Navel; retains the good qualities of both parents. Ripens before Washington.

Parramatta.—Large size, round; skin deep yellow when the tree attains a little age, of splendid quality; worked direct from old bearing tree.

Queen.—Medium to large, flattened; skin deep yellow, and with age remarkably thin; very juicy; a very sturdy grower.

Siletta.—Medium size, roundish; pale yellow, very smooth and thin; abounding in juice; enormous bearer.

St. Michael.—Largest size, roundish. skin deep yellow, smooth and thin; profitable for market. Bears well.

Thompson's Improved Navel.—Improvement on Washington Navel; fruit equal in every way to its parent, but is earlier, and is a good, even, consistent cropper.

Valencia Late.—One of the best varieties grown. Fruit large, oblong; very firm and solid; pulp fine grained, with high rich flavour. The very latest to ripen. This has superseded Holdfast.

Washington Navel.—A splendid orange; fruit very large, very even, of perfect shape and colour; pulp very fine grained; remarkably juicy; rich, racy flavour.

White Siletta.—One of the very earliest Oranges to ripen; skin very fine and thin, pulp rich and very juicy; will usually ripen before the frosts come. Of N.S.W. origin, and recommended for early market.

MANDARINS

Beauty of Glen Retreat.—Of noble size and appearance; most luscious flavour; an enormous cropper; is doing well in this State.

Canton.—(See Scarlet).

Dancy's.—Heavy cropper, high colour, flattish; medium size; tree a strong grower. Very popular in South Australia, and some of the irrigation areas of Victoria and N.S.W.

Ellendale Beauty.—Pale colour, very fine skin, and on account of its huge size and favourite colour, will always sell.

Parker's Special.—Larger size and equal in quality to Beauty of Glen Retreat. The fruit ripens earlier.

Emperor.—The largest of the mandarins; skin almost red, and loosely attached; flesh very juicy, not so highly flavoured as Thorny; profitable for market.

Fewtrell's Early Shipping.—Skin and flavour like an orange, but peels and quarters like a mandarin; very robust, and heavy cropper; almost seedless.

Imperial.—Is the very earliest variety in cultivation, coming on the market weeks ahead of any other and always commands fancy prices. In appearance a cross between Thorny and Emperor, being nearly the size of the latter. Being so phenom-

ally early sells very readily. Realised from 25/- to 28/- per case in Melbourne recently.

Jacob's Improved Thorny.—Very fine skin, juicy, and highly coloured; splendid free grower, and good cropper; flavour between Thorny and Scarlet.

King of Siam.—Very large, rough skin; hangs well, quality very fair, requires good soil; late; does well round Rockhampton, Q. Received from South Australia, where it is considered an acquisition.

Scarlet (Canton).—Fruit very large and juicy, but not of best flavour; skin almost scarlet; very productive and very handsome.

Oonshiu.—A very hardy tree, said to stand frost well; pendulous habit; no seeds; flesh firm; thin skin.

Thorny.—Medium sized, quite flat, with a very high flavour. The tree requires to have the wood thinned.

PRESERVING VARIETIES.

Comquat.—Fruit very small, round; skin deep yellow; only used for preserving; tree a vigorous grower, heavy bearer.

Poorman's (True).—Fruit very large; very hardy; an enormous cropper; fair flavour; in heavy demand by jam factories.

Seville (Round).—Fruit large size, roundish, rather flattened, very solid; somewhat similar to Poorman, but distinct in texture.

Seville (Flat).—Similar to preceding, except in shape. Considered more valuable for marmalade by the factories.

Ferguson's Late Emperor

This is the only really late Mandarin on the market. Fair size, somewhat like Emperor. Its value commercially is its extreme lateness; it can be marketed well into January.

We advise all growers to get a block of this money-maker in at once. Price: 3/- each, 30/- dozen, £8 100.

LEMONS

Common.—A very hardy lemon, bearing when the finer varieties do not.

Eureka.—(See Sweet Rind).

Lisbon.—A splendid old variety, which is too well known to need description.

Lisbon Variegated.—Similar to Lisbon, but fruit and foliage variegated. A very vigorous grower, and good bearer.

Messina.—A variety from Messina, and was largely exported to this State.

Sicily.—A lemon of splendid quality, almost free of rag, and with an abundance of richly acid juice; of medium size; smooth skin and very tough; good for curing or storing.

Sweet Rind.—The best of all lemons, being above medium size, and very even. Sells very freely in the markets. Almost thornless and nearly always in fruit.

Villa Franca.—Tree a strong, vigorous grower, with very few thorns; pulp very rich in acid. Nearly always in fruit.

LIMES

Tahiti.—Fruit very large, with an exceedingly thin rind and few seeds; very juicy, does well in Queensland.

East Indian.—Fruit of large size, very juicy. Tree a free grower, very prolific.

SHADDOCKS

Common.—Fruit of large size; an abundance of highly acid juice.

Manilla.—Fruit small; juice rich and sweet; the best of its class.

CITRONS

Bengal.—Fruit large, round; a grand preserving variety.

Knight's.—Fruit large, oblong; skin rough; the best for candied peel.

GRAPE FRUIT

This fruit is becoming very popular in the States, partly on account of its medicinal properties of correcting stomach troubles.

Marsh Seedless.—The fruit of this Pomeelo is of medium size, thin rind, with about half the usual bitter; practically seedless; pulp juicy; very little rag, and of superior flavour; keeps and packs well; an acquisition in every way.

Triumph.—Medium size; peel smooth; clear, thin, and fine grained; little rag and few seeds; very heavy, being juicy and well-flavoured. There is no bitter in the juice, and but little in the rag. One of the best.

FIGS

Black Genoa.—Fruit very large, long, skin dark purple, almost black, flesh bright red

Blue Ischia.—Fruit medium size; skin very dark purple, flesh deep red; sweet and luscious.

Brown Turkey.—The very best and hardiest of figs; succeeding everywhere, and bearing two, and, in favoured localities, three crops annually. Fruit large.

Castle Kennedy.—Fruit large, short, and thick; skin deep reddish brown;

flesh pink, very rich and sugary; early.

Green Ischia.—Fruit large, roundish; skin covered with a pale brown tinge in the sun; flesh purple.

Marseilles (White Genoa).—Fruit above medium size, quite round; skin pale yellowish green; a splendid fig.

White Adriatic.—Fruit of large size; skin white, thin, but tough; flesh red, very rich, turning amber colour when dried.

GRAPE VINES

ROOTED CUTTINGS.

See Coloured Inset for Prices.

Owing to proclamations issued in the "Government Gazette" dealing with the distribution of these, whereby we are not allowed to send any rooted vines (whether on resistant stock or own root) from within the Counties of Cumberland and Camden to any other part of the State, we, realising that the country is asking for these lines, have arranged for a supply of the under-noted on own roots only, to be distributed from our Vine Nurseries at Gosford, and ask that orders be sent here (Hurstville) direct. We can, of course, send to any town inside the Counties of Cumberland and Camden, from either our Hurstville or Camden Nurseries.

The varieties we have to offer are:

Almeria or Daria.—Size roundish; skin very tough, of a beautiful light amber colour.

Bellino.—An early form of Black Hambro. Berries large, black, roundish, bunches large, evenly set. A money-maker for market.

Black Lady's Finger (Purple Cornichon).—Same shape and flavour as Lady's Finger, but skin a deep shining black; more hardy, and not susceptible to black spot. Will hang till June in a dry district.

Black Malaga.—Berries very large, oval; skin deep black, very thick. A valuable grape on account of its lateness. A splendid carrier.

Black Tokay.—Large black, very late. Comes into Sydney market as late as May.

Black Hambro.—Bunches large; berries large, roundish; skin deep black; a very heavy and regular cropper.

Black Prince.—A noble-looking grape; bunches long; berries largest size, oval, rather thinly set; skin thick, deep black, very rich and sugary; late.

Madresfield Court Black Muscat.—Equally rich in muscat with the foregoing; berries very large, and thickly set; a very heavy and constant crop; late.

Mudgee Black Sherry.—Large, black, very firm, good keeper, large bunch, ripe about Easter.

Crystal.—Berry large, round, clear, pale amber.

Cornichon Purple.—(See Black Lady's Finger).

Daria.—(See Almeria).

Doradillo (known also largely as Camden Sherry and Baxter's Sherry). Berry very large, rich amber, will hang till April, good keeper.

Golden Chasselas, or Royal Muscadine.—Bunch and berry medium size, round; skin fairly tough; deep golden; very juicy and good; hardy; early.

Gros Colman.—Berries very large, round; skin tough, deep purplish black, with a heavy bloom. A very fine late grape, very free bearer, and bears when young.

Gordo Blanco (White Muscat).—An improvement on Muscat of Alexandria, in that it sets the fruit much better; in flavour, size and general appearance strongly resembles Muscat Alexandria. Is being largely planted both for market and raisin-making.

Lady's Finger, or Cornichon.—Bunches very large; berries largest size, peculiarly pointed; skin very tough, deep yellow, beautifully tinged with pink.

Muscat-Hambro (Snow's).—Bunches very large; berries large, rather oval, sometimes almost round; skin deep purple; flesh very juicy, with a rich and distinct muscat flavour. Perhaps the best of Black muscats. Ripens during all March. We claim to have the truest type of this variety.

Ohanez.—This is the late amber coloured grape seen in the shop windows in May and June. They are grown at Leeton, and will hang for weeks even after leaves have fallen from the vines. Latest grape we know.

Mrs Pearson's Golden Queen.—Berries large, roundish, oval, deep golden colour; forms a handsome bunch; firm, juicy, rich; does well in hot climate.

Mrs. Pince's Black Muscat.—A really splendid late Black Muscat; berries largest size, deep, shining black; skin thin, very tough; very rich in muscat.

Red Hanneport.—A valuable market variety; a copper-coloured grape, with a rich, strong muscat flavour; hangs until middle of March.

Sultana.—Bunches medium size, long; berries medium size oval; skin pale yellow; flesh without seeds. A very fine table grape, but chiefly valuable for raisin-making.

Sweetwater.—Strongly resembling Royal Muscadine in size, shape, and colour, except that it ripens a fortnight earlier.

Terret.—Resembling Black Hambro, but larger; largely used for jam-making, owing to its few seeds; a most healthy variety.

Waltham Cross.—Bunches very large; berries very large, round; skin thin but tough, of a clear pale amber. A most magnificent grape; especially suited to the warmer districts. Makes a good raisin. Late.

Zante Currant.—The dried currants sold in shops are made from this grape, and, as the process of manufacture is simplicity itself, it is a most profitable crop to grow. The vine requires to be long pruned. Quite seedless.

AMERICAN VARIETIES.

Bell's Seedling.—Of the Isabella type, but larger berries; skin deep, blackish purple.

Isabella.—Berries large, black, too well-known to need description. Very popular for trellis work, practically proof against all disease.

Grapes on Resistant Stock

See Coloured Inset for Prices.

These are still a speciality with us, and are grown on virgin land that has never seen Phylloxera. We graft on specially prepared rooted cuttings twelve months established in Nursery beds, thus ensuring a good root system with a perfect graft union. Our experience of the bench-grafted cutting is that it fails to make a perfect union at the graft and has a poor root system. We offer for distribution in Counties of Cumberland and Camden only. Where not described, see list on own root. Pages 14 and 15.

Bellino.—An early form of Black Hambro; berries large, black, roundish; bunches large and evenly set; a money-maker for market.

Black Hambro.—

Black Lady's Finger (Purple Cornichon).—

Baxter's Sherry, or Camden Sherry.—
Golden Chasselas or Royal Muscadine.
Gordo Blanco.—

Muscat-Hambro (Snow's Black Muscat) or **Black Muscat.**—

Mrs. Pince's Black Muscat.—

GUAVAS

A most excellent fruit, either for dessert or preserving. The purple variety is thoroughly hardy, and will stand pretty severe winters.

Purple.—The hardiest variety; fruit small, but borne in immense crops. Sometimes called Strawberry Guava, from its flavour resembling that of the strawberry.

White.—Similar to purple. Fruits pale yellowish white.

Yellow.—Fruit as large as a hen's egg, semi-transparent; splendid for dessert, and makes a grand jelly.

Parker's Hybrid.—An enormous fruit, larger than the ordinary yellow Guava. Requires a warm locality.

LOQUATS

A most useful fruit, coming in before any other fruit is ripe. Many worthless seedlings are grown, and the fruit is little more than seeds.

Worked on Quince Stock.

See Coloured Inset for Prices.

Herd's (Mammoth).—This variety is of enormous size, and when thinned and annually manured, is the size of a hen's egg. Our stock is from the original trees.

Riverside.—A South Australian-raised variety which has fruited with us and is very large, and of a good flavour, well worthy of trial.

MULBERRIES

Some of the free-growing varieties are very suitable for planting for shelter.

For Prices See Coloured Insets.

Black English.—The best variety, very long-lived, and makes a handsome tree. (Very scarce.)

Downing's Ever-bearing.—Large, measuring $1\frac{1}{4}$ inch long, juicy, with an agreeable flavour. Ripens its fruit

gradually during some weeks; enormous cropper.

Hick's Fancy.—Produces its fruit continuously during three months. Fruit of large size, very juicy, fine acidulous flavour.

MEDLARS

See Coloured Inset for Prices.

Dutch.—One of the best. Fruit not large. A heavy bearer.

Royal.—A variety highly esteemed in England for its flavour and productivity.

NUTS OF VARIOUS SORTS

The cultivation of the different varieties of Nut-bearing trees is an industry which should have a great future in New South Wales. The importations of the various Nuts from abroad are annually enormous, the whole of which may be secured by growers in New South Wales, as in this country they very soon come into bearing, and are mostly long-lived and very beautiful trees.

ALMONDS.

Worked on Seedling Peach Stocks

Brande's Jordan.—An upright-growing variety, bearing large, sweet nuts, of the paper shell class.

Burbank's Seedling.—A great bearer; recommended as one of the best for this climate, and flowers much later than other sorts.

Drake's Seedling.—A recent importation from America. Heavy bearer, kernels medium size, plump and sweet; paper shell variety. Spreading grower.

Early Papershell.—Recommended for planting on irrigation areas; very productive.

Eureka.—A heavy bearing paper shell variety. Very upright grower, nut largest size, and in flavour very sweet, like Brande's Jordan.

Golden State.—A regular bearer; large, with a full, smooth-skinned kernel, and a soft shell.

Grosse Tendre.—Very large, thin-shelled, good grower and heavy bearer.

Hatch's Nonpareil.—A very fine almond, large kernel, and very thin shell.

I.X.L.—A sturdy, upright grower, with large foliage; nuts large, with, as a rule, single kernels; soft shell.

Large Papershell.—A variety of common Papershell, but much larger; shell very tender, kernel large, white and sweet.

Nonpareil.—A weeping habit of growth, an extraordinary heavy and regular cropper, with very thin shell.

Ne Plus Ultra.—Extremely prolific, producing its nuts in bunches all over the twigs; nuts large and long.

Princess.—Nuts $1\frac{1}{2}$ inch long, with large richly flavoured kernels; flowering much later than the other varieties.

Riverside Peerless.—Nut somewhat resembling Brande's Jordan, but, if anything, a trifle larger, and is far more highly flavoured. Plant alternately with Brande's Jordan for fertilisation.

Sultana.—Fruit rather smaller than Paper-shell, and narrower, but of superior flavour.

Texas Prolific.—Never fails to produce a heavy crop, blossoms very late, kernels medium size, very soft shells, upright grower.

White Nonpareil.—The tree is a strong grower; nuts very large, with white shell.

PECAN NUT.

Carya Oliverformis.—A quick growing tree, being in full bearing at eight years old. Fruit $1\frac{1}{2}$ inches long, borne very abundantly. Most delicious of all nuts

CHESTNUTS.

Spanish.—The well-known Sweet Chestnut, bearing its fruit in burrs; a splendid shade tree, attaining a great age.

Japanese Giant Chestnut.—As its name implies, a large Chestnut from Japan bearing fruit three times the size of the Spanish, and coming into bearing at a very early age.

FILBERTS & COBS.

All the very best varieties.

WALNUTS.

Dwarf Prolific.—This is a very fine variety, fruiting much earlier than the "Common."

Juglans Regia.—The English or Persian Walnut; a most handsome shade tree, and deserves planting on that account, apart from its value as a nut producer.

Juglans Seiboldii.—A Japanese variety, very hardy, and a very handsome tree, bears while young; nuts produced in clusters.

MACADAMIA TERNIFOLIA (QUEENSLAND NUT).

A valuable tree, either for shade or for fruit. Hardy as far south as Melbourne, attaining a height of 60ft., and a fairly quick grower. Reaches the nut-bearing stage in seven years. In flavour the nut resembles the Hazel. A grand evergreen tree, suitable for lawns, etc.

NECTARINES

For Prices See Coloured Inset.

This fruit being so closely allied to the Peach, requires similar soil treatment.

Albert Victor.—Large; yellowish white with a carmine blush; freestone, ripening here first week in January.

Byron.—A large orange nectarine, flavour rich and excellent, extra large and handsome, heavy cropper. Raised by Rivers of England.

Ben's Pick.—Originated in Parramatta district; the raiser assured us that it is in every way superior to Goldmine; larger and much better flavour. Have confidence in the originator, and would strongly recommend all our friends to at least test one or more.

Cardinal.—Very early, brilliant colour, and ripening ahead of Early Rivers; very prolific; freestone.

Cooza.—Its grand size, coupled with its splendid colour, should alone recommend it. Freestone, ripening middle of January.

Darwin.—Fair size, very brilliant red and yellow skin, flesh yellow, of delicious flavour; fairly late; freestone.

Diamond Jubilee.—Large, bright red; flesh white, prolific, mid-season.

Elruge.—Largest, roundish; skin greenish, dotted with red; rich, and very juicy. A freestone, ripening early in January.

Early Rivers.—Fruit large, weighing 8 oz.; skin rich crimson in the sun, light yellow in the shade; juicy, a freestone.

IMPROVED FRENCH WALNUTS

Chaberte.—Late bloomer, large size, kernel, extra fine flavour sure to be popular.

Mayette.—Abundant bearer, blooms late, nuts large, fine flavour, considered the best in Europe.

Franquette.—Large, longish, oval, very full nut, fine flavour, blooms late.

All these named Walnuts bear much earlier than *Juglans Nigra*

Fertile de Poitou.—Enormous fruit, marbled with purple red and entirely red on the sunny side. Freestone.

Goldmine.—Size enormous; skin nearly all covered with bright bronzy red; flesh beautiful cream colour, juicy, melting and sugary; a freestone, with a particularly small stone. Valuable for drying.

Irrewarra.—Fruit above medium, very highly coloured, and of a splendid flavour; a freestone; ripens November.

Konstanze.—Dark blood red colour, flavour distinct and very agreeable. Early.

Lady Carrington.—A large and very showy variety; a clingstone; ripe first and second weeks in January.

Lee's Seedling.—Fruit large, handsome, and richly flavoured; described as thoroughly hardy.

Lippiatt's Prolific.—Large, highly coloured, rich, sweet, and prolific, early.

Meek's Scarlet.—Large, heavy cropper, good colour, slipstone; mid-summer.

Mrs. Dr. Chisholm.—Valuable whether for size, colour, or season; covered with bright red; freestone.

Newington.—A fine clingstone, largest size; skin covered with brightest red in the sun; ripens second week in January.

New Boy.—Largest size, very handsome, covered with brilliant crimson; good flavour; one of the very best.

Precoce de Croncels.—One of the earliest fruit, large, yellowish, with dark plum colour.

Radium.—Largest size, high colour, very sweet; ripens after Goldmine.

Stanwick.—Largest size; flesh greenish white, very juicy, with a rich high flavour; a freestone, ripening middle of February.

Stanwick Seedling.—A seedling from old Stanwick, which it resembles.

It is, however, not so liable to crack as that variety.

Victoria (Rivers).—Very large, of good quality, and a heavy bearer. One of the best.

W. C. Fripp.—Large, dark yellow, with a bronzy red cheek; flesh pale yellow; a clingstone, ripening end of February. Good for late market.

Zealandia.—Very large, rich red in colour, and is classed as one of the very finest and absolutely the largest nectarine grown in New Zealand.

OLIVES

For Prices See Coloured Inset.

The following varieties are the most noted in Europe, either for their oil-producing qualities, or as being especially suitable for Pickling.

Boutillane.—Introduced by the Department of Agriculture for oil making, the yield being 11½ ozs. to every 6lbs. of fruit.

Bouquettier.—Fruit medium size, an enormous bearer, and produces a great yield of oil.

Blanquette.—Chiefly valuable for its oil, but is also suitable for pickling.

Blanquette Late.—Very similar to the preceding, but ripens much later.

Black Italian.—The best variety for pickling, on account of its large size and good flavour.

Correggiola.—Introduced by the Department of Agriculture for oil making. Yielding 14 ozs. to every 6lb of fruit.

Gross Redownow.—Large-fruited and very highly esteemed for pickling. It also makes a splendid oil.

Large Fruited.—Largest size, and is very similar to that sold in bottles under the name of large Spanish.

Lucca.—From this variety the famous Lucca oil is made; an enormous cropper, and gives a very high percentage of oil.

Picholine.—The very hardiest variety, doing well in any soil; fruit oblong, not large; an enormous cropper; considered one of the best for pickling.

Pigale.—Introduced by the Department of Agriculture for oil making, yielding 11 ozs. for every 6lbs fruit.

Pleureur.—Introduced by Department of Agriculture for oil making, yielding 14 ozs. to every 6lb. of fruit.

Salome.—A very fine variety, fruit large; very highly esteemed for pickling.

Verdale.—An oil variety, producing a large quantity of good quality oil. One of the hardiest.

PEACHES

WORKED ON SEEDLING PEACH STOCK.

For Prices See Coloured Inset.

Many varieties will not be catalogued after this season. See our remarks in introductory, also on tinted inset. This will be the last opportunity of procuring or renewing some old favourites.

EXTRA EARLY VARIETIES RIPENING DURING NOVEMBER AND DECEMBER.

Admiral Dewey.—Early yellow fleshed freestone, coming in just after Brigg's Red May; fruit of most handsome appearance; covered with purplish crimson.

Amsden's June.—Large, roundish; skin greenish, rich deep red in the sun; flesh greenish-white; a freestone; ripe with Briggs'.

Bell's November.—Ripening 7th to 12th November. In appearance it resembles Brigg's Red May. Good for Coastal areas.

Bell's November Imp. (Lambton).—Larger and better coloured than Bell's.

Briggs' Red May.—The standard of early peaches; fruit not largest, roundish; skin whitish green, bright red in the sun; flesh tender; freestone.

Downing.—Large, round; pale green, almost entirely covered with purplish crimson flesh greenish; freestone; ripens December. Better cropper than Briggs'.

Duke of York.—Large peach, of excellent flavour and said to ripen as early as the Alexander; does not cast its buds like that variety.

Edward VII.—Another remarkably early peach, ripens early in November; good for Coastal districts.

Flat China.—Fruit flat. Skin pale yellowish white, pink cheek.

Greensborough.—Crops better than Briggs', and does not cast its buds so readily.

High's Early Canada.—Ripens with Briggs', and is in every respect superior to it; fruit very large; skin yellowish white, with broken stripes and markings of crimson.

Le Vainquer.—Ripening a few days earlier than Sneed; it is of better colour, quite freestone, and forms a better tree.

Mayflower.—Very early variety, ripening four or five days before Sneed, and ten to twelve days before Amsden; fruit large, of a superb carmine-red colour all over, of excellent quality. On account of the great earliness and bright colour it should be largely planted; partial freestone.

Sneed.—Medium, creamy white, striped with carmine; freestone; ripens about 8 days before early Alexander. Good for home planting inclined to bruise. Early.

Triumph.—It bears a strong resemblance to a good specimen of Crawford, same large size, handsome appearance, and rich flavour. Added to this, it ripens within a day or two of Briggs'. We very strongly recommend this fine peach.

Watt's Early Champion.—Ripens first week in November, good size, and splendid colour; heavy cropper. Invaluable on account of its season, in districts not subject to heavy frosts.

SECOND EARLY VARIETIES

(Ripening from New Year to early February).

Alton.—Flesh white, freestone, really a highly coloured Wiggins, ripening a few days before that variety.

Braddock's.—Large; skin brownish red; flesh yellowish white, very juicy; its season—just succeeding Briggs'—will always get it top prices; an enormous bearer. Flavour only moderate; very heavy cropper.

Camden Superb (Devlin's Red).—Earliest cling we have; a most profitable market sort; skin almost covered with deep red; ripe Christmas to New Year.

Carmen.—Ripening same time as Early Rivers, large roundish, with pale yellow skin, red blush on sunny side; white flesh; freestone; can be recommended.

Duffy's Xmas Box.—Reliable variety for Xmas and New Year trade; large, handsome, showy; good flavour, freestone.

Early Newington.—Large, round, light yellow, covered with deep purple; clingstone, ripening end of December.

Early Rivers.—Waxen white, with a clear carmine cheek; flesh whitish; ripens end December; freestone; suited for home garden.

Hale's Early.—Medium size, roundish; skin pale yellowish white, deep red in the sun, white fleshed; freestone; ripens with Early Rivers.

June Elberta.—An Elberta, ripe at Xmas, size good; flavour excellent, splendid colour; should be popular with the market growers.

La France.—Large, skin dark carmine-red; flesh white, juicy, exquisite perfume; tree vigorous and prolific; ripe early January; freestone.

Ruby Red.—A clingstone, ripe early in January; a heavy and constant cropper; sells very freely; good packer.

Wiggins.—A fine peach, ripening Christmas to early January; always of good size, fair amount of red; valuable for its season; freestone. Can be recommended.

Red Bird Cling.—Earliness, glorious colour, and splendid quality make it the greatest of the very early peaches, large size; flesh firm, far excelling Alexander and other early sorts; tree hardy; good shipping peach.

MID-SEASON VARIETIES

Aunt Becky.—A large white-fleshed freestone, valuable for market, coming in just after Braddocks, when good white-fleshed peaches are scarce; heavy cropper.

Blackburn Elberta.—Raised in Wagga. N.S.W., and is a decided improvement on any of the Elberta types; has magnificent colour long before it is soft, and consequently meets a very ready market. Very highly recommended.

Dripstone Elberta.—Sent to us from that district as being a great improvement on Blackburn Elberta, would like to have this tested in other districts, as we think it will prove an acquisition.

Early Crawford.—Large, oblong rich yellow, with a fine red cheek; flesh yellow; a freestone; ripe middle January.

Elberta.—This still remains one of the very best peaches of its season, its great beauty and size commanding top prices; freestone; ripens January.

Foster.—Large size, skin a deep orange red; flesh yellow; freestone; resembles Early Crawford.

George IV.—Large, round, pale lemon colour in the shade, carmine in the sun; flesh whitish yellow; a freestone, ripe first week in January. Highly recommended.

J. H. Hale.—Reputed in America to be their largest Peach; round, yellow flesh, fine flavour, freestone, skin almost covered with bright crimson; good bearer; ripens with Elberta.

Kia-Ora.—A seedling from Elberta. Identical in size and general appearance of the fruit, but of superior flavour.

Levis Cling.—Golden yellow, slightly blushed, flesh yellow to pit, fine grained, good quality, mid-season.

Mountain Rose.—Large, whitish yellow, almost entirely covered with clear, bright red, flesh whitish, free-

stone, ripens early in January. Highly recommended.

Muir.—Good drying Peach; contains much sugar and very little water; freestone; only valuable for drying.

Newington (or Frazer's Newington).—Large, pale yellowish white, covered with deep crimson; flesh yellowish white; firm, of grand flavour. Highly recommended; clingstone.

Paragon.—A seedling from Elberta, medium size; deep yellow, mottled with red; very juicy and rich; clingstone. Can be recommended.

Riverside Red Elberta.—A sport from the well-known Elberta. Fruit is large; oblong (far higher colour than Elberta); leaves long and narrow, like a willow; can be recommended.

Royal George.—Large, round and even; pale yellowish white, almost covered with fine rich red, with a total absence of down; flesh whitish; a freestone, ripening January.

Royal George Cling.—Large, round, light yellow in the shade, almost covered with fine red in the sun; flesh whitish, firm, but melting; clingstone; ripening January; one of the best.

Robert Stewart (True).—Large, round, a little pointed; whitish yellow, with a beautiful red cheek; tender with a rich, spicy flavour; ripe end January. Freestone.

Row's Champion Slip.—Large white-fleshed freestone, ripening just with Elberta. Very highly coloured. Highly recommended.

Shanghai (White Shanghai).—Oblong; skin creamy white, with a light crimson cheek; a clingstone, ripening January.

Stark Early Elberta.—It is said to be larger, better quality and colour, finer flesh, smaller stone, and from 10 to 20 days earlier than Elberta.

Shanghai Seedling or Red Shanghai.—A splendid form of Shanghai, showing a beautiful red cheek; enormous bearer; vigorous grower; ripens same time as Shanghai. (Sometimes called Robert Stewart in error).

Shanghai Freestone.—A perfect freestone, splashed and washed with brilliant bright red. A most striking variety for market, and sells very freely. Ripens early January.

Tuscan Cling.—Very large yellow; the best early canning Peach, mid-season.

Wotton's Shanghai.—Improvement on Red Shanghai, being larger, more highly coloured, and always brings fancy prices in the market.

LATE VARIETIES

Comprising all those ripening February, March and April, etc.

Barrington.—Large; clear white, with a rich crimson cheek; flesh yellowish white; ripens middle February. Freestone.

Black's Late.—A valuable late variety; large and of most handsome appearance; flesh firm, juicy, and of delicious peach flavour; tree exceedingly prolific. Freestone.

Chair's Choice.—Large, yellow-fleshed freestone; flesh deep orange. A splendid peach, ripening February.

Camden Golden.—Largest size; golden colour with a bright red cheek; flesh yellow, one of the best late freestones. Similar to Salway or Red Italian Free.

California.—Enormous yellow-fleshed clingstone, round, having heavy purplish cheek; flesh rich deep yellow. Splendid for bottling and canning.

Comet.—Largest size, skin covered with deep dark red; flesh deep yellow; a freestone, ripening March.

Copas Late Red.—An extra large freestone peach; colour red; ripens in March; freestone. Should become great favourite.

Crimson Beauty.—A valuable freestone peach, with white flesh; bright crimson; ripens February. Highly recommended.

Fulton.—Large roundish; pale yellow, covered with a deep red bloom; flesh white; ripening early in March. Clingstone.

Globe.—Large, quite round; a bright gold colour, with a deep crimson cheek; a freestone; yellow flesh, good.

Gold Dust.—Is a large, solid, yellow-fleshed cling, of very handsome appearance; valuable for early canning. Can be recommended.

Golden King.—Highly coloured yellow-fleshed cling, ripening about same time as "California," but is a far heavier cropper than that variety. Will be valuable as an early canner. Highly recommended.

Golden Queen.—A yellow-fleshed cling stone, claimed to be one of the best canning peaches. Young trees are

very compact in growth, and are well set, with fruit buds. Is a heavy and constant cropper, and is specially valued by canners to fill the gap in succession of canning Peaches.

We introduced this variety a few years ago, and already it has made its name in the Irrigation areas as a canner. Confused by some growers with Phillip Cling, but is quite distinct.

Goodman's Choice.—Yellow-fleshed clingstone, good bearer; highly recommended for canning.

Hawkesbury Champion.—A valuable fruit for its season, ripennig as it does at the end of March. Inclined to be small in dry seasons. Only suited to special districts.

Henrietta (Levy's Late).—Late, yellow-fleshed, cling; good variety for canning and market; good cropper.

Kirshler Prize.—Large size, splendid appearance; somewhat in the way of a Royal George cling. Flesh white, red at the stone; skin covered with brilliant carmine; flavour excellent; in fact, one of the best we have ever sampled. Ripe February. Freestone.

Lady Palmerston.—Medium to large, round; skin greenish yellow, with a deep red cheek; flesh pale yellow; freestone, ripening February.

Lord Palmerston (Pavie de Pomponne).—Very large, round, skin creamy white, with a rose-red cheek; flesh white; a clingstone. Rather a shy cropper.

Late Crawford.—Above medium size; skin deep yellow, mottled with dark red; flesh pale yellow. Freestone.

Lippiatt's Late Red.—Ripe first week in April; colour creamy, mottled, striped dark red; fine flavour; tree, a fine grower, and an immense bearer.

McDevitt's Late Cling.—The finest peach of its class; size enormous; good shape, colour, rich yellow, covered with dark purple, in perfection in February. Good canner, although not free of red at the pit.

Nicholl's Orange.—Large, round; deep orange, with a red cheek; flesh deep yellow, firm; a favourite canning peach. Clingstone.

Phillip Cling.—An enormous, yellow-fleshed cling, coming in when other clings are scarce, and consequently in great demand by factories.

Princess Royal.—Fruit large, round, a little pointed; creamy white in the shade, deep red in the sun; a clingstone; ripens February.

Pullar Cling.—This very fine canning peach was raised at Ardmona (Victoria); it is a very large, highly coloured clingstone, and valued by canning factories; good grower, heavy cropper, and regular bearer. Highly recommended. Ready early March.

Red Italian.—Free; fruit very large, round; skin rich dark yellow in the shade, deep crimson in the sun; flesh deep yellow, juicy. Similar to Salway

Red Italian Cling.—A variety of old Yellow Italian, ripening with that variety, but differs from its parent in that it is rounder; its colour is a deep rich red. One of the best late clings. Valuable for canning.

Runyon's Orange.—Largest size; blackish crimson; flesh deep orange; a clingstone, ripening February.

Although we are trying to reduce lists of the very best varieties of peaches, we find that owing to the variation of climates in Australia in which this fruit is doing so successfully, we are not able to reduce lists as we would wish. The canning industry is also calling for a special type suitable for canning and cooking—both commercial and home use—which adds to the list considerably. However, on separate slip we give lists of varieties, both for Coastal areas and inland, that we think will be appreciated by the commercial fresh fruit planter, the canner, and the home or orchard planter.

Salway.—Medium; skin yellow, fine red in the sun; flesh fine yellow; free-stone, ripening February. Similar to Red Italian Free.

Sim's Cling.—Fruit large to very large, almost perfectly round, skin golden yellow with a faint blush on one side. Flesh deep yellow, of fine texture, firm, rich and clear yellow to the pit, which is small. Ripens after Orange Cling, and promises to be one of the best canning varieties. Ten days earlier than Philips' Cling.

Thieles Cling.—A late canning Peach; valuable as a canner, being one required for the continuity of processing. Originated in Victoria, presumably from Pullars. Heavy and regular cropper; ripens in March.

Windeyer.—A valuable; white-fleshed free, ready for market in February, when good, showy white-fleshed peaches are not plentiful. Can be recommended.

Wallis Heath Free.—Immense size; quality best; flesh cream yellow, with a touch of pink.

Two of the Latest Introductions in Canning Peaches

FITTING IN WELL TO GIVE CANNERIES A SUCCESSION

Palora Cling.—Fruit large, round, well coloured, and promises to be a very heavy cropper. Flesh rich yellow, right through to the pit, and entirely free of red at the pit. Pit small. Period of ripening just between Tuscan and Phillips, and will be in strong demand for canning. Our trees are worked from trees specially brought out by Mr. Brady, of the Leeton Cannery, from America, as being just what he required to fill a gap in his canning season. We unhesitatingly suggest that growers should get a block of this going if they want to get in first on a good thing.

Price, 2/- each; 18/- per dozen; £6 per 100.

Peak Cling.—This is the very latest thing from California; it has fruited heavily at Leeton on two-year-old trees; skin a golden yellow, tinged with red on the sunny side; flesh clear yellow to the pit, entirely free of red; pit particularly small; flesh fine grained and processes wonderfully well. Season between Tuscan and Phillips, when there is a pronounced gap in good canning peaches; and is sure to be sought after by the canneries in consequence. 2/- each; 18/- dozen.

PEARS

For Prices and Varieties we Recommend see Coloured Inset

Worked on Seedling Pears and some varieties on Quince for dwarfing

EARLY VARIETIES.

Bartlett.—(See W. B. Chretien).

Citron des Carmes (Madeline).—Medium, yellowish green, flesh white, with a delicate perfumed flavour. The earliest.

Clapp's Favourite.—Large, strongly resembling Bartlett in shape; very handsome early pear. Blooms 23rd September, and lasts 7 days.

Jargonelle (English).—Large, greenish yellow-brown in the sun; flesh yellowish white; tree a pendulous grower, is not liable to decay.

Lawson (Comet).—Fruit largest; bright yellow; flesh juicy and rich. Blooms 24th September, full 29th September.

Williams' Bon Chretien (Bartlett).—This pear is too well known to need any description, and is being largely planted for canning, marketing in a green state, and home use. The most popular pear we have. Blooms 28th September, full 4th October.

Wilder.—Medium size; pale yellow, with a brown red cheek; vigorous grower. One of the best earlies, but not a regular cropper.

MID-SEASON VARIETIES.

Baron de Mello.—Medium size; skin dark brown russet; flesh greenish yellow; melting and buttery, with a fine aroma. Blooms 25th September, full 30th September.

Beurre Bosc.—Large, dark yellow, covered with streaks of cinnamon russet; flesh white. Blooms 1st October, full 6th October.

Beurre de Capiamont.—Medium size clear yellow, with a light cinnamon-red cheek, ripe early autumn. Blooms 29th September, full 5th October.

Beurre Hardy.—Large; greenish; covered with light russet; a fine free-growing, productive pear; ripening all autumn.

China (Sand) Pear.—Large; clear lemon yellow, with a little red in the sun; vigorous healthy grower; early bearer. Cooking.

Doyenne Du Comice.—Large, rich; skin clear yellow, covered with a deep rich red. Blooms 28th September, full 4th October.

Doyenne Boussock.—Large, handsome and melting; highly recommended. Blooms 29th September, full 5th October.

Fertility.—Large fruit, of brilliant colour and high flavour; the tree is a vigorous and healthy grower, and most valuable for market. Blooms 29th September, full 5th October.

Garber's Hybrid.—Fruit large, very smooth, golden yellow. A heavy cropper, and fruit ripens earlier than Kieffer's.

Howell.—Large, light waxen yellow; heavy bearer, following "Williams' Bon Chretien," a first-class market pear, and should be largely grown. Blooms 23rd September, full 28th September.

Kieffer Hybrid.—Fruit medium size, roundish oval; skin yellow, orange in the sun; an enormous and early bearer, ripens April. Blooms 18th September, full 23rd September.

Idaho.—Large and handsome, skin golden yellow, strewed with russety spots. Blooms 30th September, full 6th October.

Marie Louise.—Medium; deep yellow, sprinkled with russet; flesh white; one of the finest. Blooms 28th September, full 4th October.

Packham's Triumph.—A greatly improved W. B. Chretien, coming in after that variety is over. Has proved successful for shipping to England. Fruit similar to W.B.C., more even in outline, and superior in flavour; is being very largely planted, and cannot be too highly recommended either commercially or for private use.

LATE VARIETIES.

Bailey's Bergamot.—Medium size, in shape like Gansell's, but a month later and more certain cropper. Blooms 2nd September, and lasts 8 days.

Bergamot (Gansell's).—Large; yellowish brown, much covered with russet; flesh granular, white; rich, aromatic juicy. Blooms 24th September, full 29th September.

Beurre Clairgeau.—Fruit largest; skin warm yellow, shaded with orange and crimson; flesh yellowish with vinous flavour; ripens March to June. Blooms 23rd September, full 28th September.

Beurre Easter.—Very large, greenish yellow, with sometimes a brownish red cheek; one of the very best late pears. Blooms 24th September, full 29th September.

Beurre d'Anjou.—Large, melting, and juicy. One of our best export varieties. Blooms 10th September, lasts 12 days.

Conference.—Large; skin very smooth and shining; very juicy and melting. Blooms 29th September, full 4th Oct.

Glou Morceau.—Large obovate; skin yellow; flesh buttery, melting, and very juicy, of best dessert quality. Blooms 27th September, full 3rd Oct.

Josephine des Malines.—Medium size, roundish; pale greenish yellow, russet; with a delicate aroma; perfection in July. Blooms 18th September, lasts 9 days.

For the foregoing lists of Flowering Dates we are largely indebted to the Department of Agriculture, N.S.W., who keep very close annual records, also many of our orchard friends interested in pollination of fruit, have allowed us access to their valuable records.

The list submitted, however, is purely approximate, as many circumstances may operate to considerably alter flowering dates, such as sprays used and time of using, etc. On separate sheet we attach a brief list of varieties suited for Coastal and inland districts we recommend for commercial and home-garden planting with names of pollinators we recommend.

See Separate Slip for Prices and Varieties recommended for Coastal and Inland Planting

Packham's Late.—Fairly large; heavy cropper, and promises to rival Triumph. Blooms 26th September, full 1st October.

Sheldon.—Medium to large; yellow and red; very excellent. Tree a fine grower and productive. Blooms 24th September, full 29th September.

Uvedales St. Germain's (Large Baking).—An enormous Pear, sometimes weighing 3 lbs. Valuable for its cooking qualities. Will keep all Winter.

Vicar of Winkfield (Napoleon).—Large long, pyriform; pale yellow flesh, greenish white, juicy. Blooms 23rd September, full 28th September.

Winter Cole.—Medium size, almost round; skin pale yellow, with a little russet; flesh yellowish; one of the finest and richest pears. Blooms 30th September, full 6th October.

Winter Bartlett (True).—All know the famed "Williams" Pear, and in the above we have a duplicate of the old favourite, but ripening at least three months later. Blooms 19th September, lasts 11 days.

Winter Nelis.—Medium size; skin yellowish green, covered with russet; in perfection in May. Blooms 27th September, full 3rd October.

We shall be only too pleased to mail Catalogue
to anyone interested.

F. FERGUSON & SON, Hurstville and Camden.

Postal Address: Hurstville, N.S.W. 'Phone, LW-3058.

PERSIMMONS

See Coloured Inset for Prices

Our own raising, as we have discarded the importations from Japan for several years. Our plants will move as well as any ordinary fruit trees. In fact, our soil seems admirably adapted to produce fine fibrous roots in the Persimmon.

Dai Dai Maru (Hot Cross Bun).—Largest size square, or four-sided, rather flattened, skin deep orange; flesh yellow, almost seedless; a fine variety, fairly early.

Haychi Ya.—Large, oblong, pointed; skin light red, russet at the point, and turning black towards the tip.

Hayakume.—Large, round, covered at the end with heavy russet; skin vermilion, flesh brown, rich and luscious.

Kurokumo.—Medium size, flat, skin yellowish red, flesh orange, very sweet, with very few seeds.

Tanenashi.—Seedless variety, and is largely grown for market, under that name; fruit of the largest, conical; skin bright yellow, flesh yellow; when thoroughly ripe and soft is a very fine variety.

Yemon.—Fruit large, rounded, rather flattened; skin clear deep yellow, with little russet; flesh orange.

Zenji-Maru.—Small, round; deep orange, black at the end; flesh brownish, with a good few seeds.

PLUMS

Worked on Myrobolan and Marianna Plum Stocks; also some varieties on Seedling Peach Stocks

For Prices and Varieties we Recommend, see Coloured Inset.

A number of the following varieties will not be listed after this season. Read our remarks on tinted inset and introductory. This will be the last opportunity to secure some of these old favourites.

EARLY AND MID-SEASON VARIETIES

Angelina Burdett.—Above medium round, dark purple; flesh yellowish, very juicy and rich; a freestone; enormous cropper. Blooms 13th September, full 19th September.

Blue Rock.—Large and very rich; one of the very best dessert plums.

Black Cluster.—Fruit medium size, roundish; black; flesh greenish; juicy and sugary

Cherry, or Early South American.—Small, round; fine lively red; flesh greenish yellow, very juicy.

Clyman.—Large size, round; dark purple; flesh yellowish, firm; requires to be thinned.

Diamond.—Large, oval; black covered with a blue bloom; flesh deep yellow; a splendid preserving variety, ripening mid-season. Blooms 11th September, full 16th September.

Early Orleans.—Medium size, oval; skin dark red, purple in the sun; flesh yellowish green; a freestone.

Excelsior (Jenkins).—Said to be an improved Burdett; better bearer.

Evan's Early.—Fruit medium size, roundish, oval; skin deep purple; an enormous cropper.

Green Gage.—The highest flavoured and most delicious of all dessert plums; fruit of medium size, round; skin yellowish green; flesh pale green, very juicy and melting. Blooms 13th Sept., full 19th Sept.

Jodoigne Gage.—A red gage, imported from Rivers, and like all fruit from this source, of first-rate quality; ripens after Green Gage.

October Green Gage.—Improvement on the old Green Gage, being equally highly flavoured and luscious, at least twice its size and earlier.

Precious.—Sported from Cherry Plum; fruit is very much larger, and better in every respect.

Rivers' Early Prolific.—Medium size, roundish oval; skin reddish purple; flesh yellowish, rich.

The Czar.—Fruit large, oval; skin quite black; flesh yellow, tender and of excellent flavour; bears fruit in clusters.

DON'T FORGET TO PRUNE

Tibbitts.—Very early; size medium; very regular and heavy cropper; good commercial proposition; highly esteemed for jam. Blooms 5th September; full 16th September.

LATE VARIETIES

American Damson or Frost Plum.—Medium oval; deep purple, flesh greenish yellow; juicy; a clingstone.

Coe's Golden Drop.—Very large size; oval; light yellow, with a few dark spots; flesh firm, juicy, rich.

Coe's Late Red.—Medium size, nearly round; skin light purplish red; flesh yellowish; rather firm.

Crimson Beauty.—Originated from Coe's Golden Drop; skin yellow, overlaid with crimson; very showy and of good flavour; good bearer; late.

Crittendon's Damson.—The very best of Damsons, frequently bearing more fruit than leaves. Fruit large for a damson; oblong; skin deep purple, flesh yellow; late.

Grand Duke.—One of the very finest late plums; fruit large, almost oval; skin purplish black; flesh deep yellow, firm.

Imperial Green Gage.—Improvement on old Green Gage in size, and quite equal in flavour; fruits well in warm districts.

Jefferson.—Largest size, oval; skin golden yellow, with a purplish red cheek; very rich and luscious. Blooms 13th September, full 19th September.

King Damsons.—Largest size, exceptional quality and striking appearance; tree very productive.

Late Black Orleans.—Medium size skin deep black; a thick blue bloom; flesh deep yellow, juicy; a clingstone.

Loutherboro.—Medium, roundish, oval; skin almost black; flesh yellowish, firm; enormous cropper; best jam plum extant.

Magnum Bonum (Red).—Large, oval; deep red; flesh greenish.

Magnum Bonum (White Egg).—Very large, frequently six inches in circumference; oval; skin a deep golden; flesh yellow; a clingstone. Blooms 20th September, full 29th September.

Monarch.—Very large, roundish, oval, skin dark purplish blue. Will hang for weeks.

Pond's Seedling.—Very large, oval; skin yellowish, nearly covered, with carmine; juicy and sugary; a beautiful plum. Suited to cool districts.

President.—We consider this the best acquisition to this class of fruit. Large oblong shaped, over two inches long, beautiful purple; flesh firm and sweet; perfect freestone. Blooms 16th September, full 22nd September.

Sultan.—Medium, round skin dark purplish red, dotted with brown specks; flesh greenish.

For the foregoing lists of Flowering Dates we are largely indebted to the Department of Agriculture, N.S.W., who keep very close annual records, also many of our orchard friends interested in pollination of fruit have allowed us access to their valuable records.

The list submitted, however, is purely approximate, as many circumstances may operate to considerably alter flowering dates, such as sprays used and time of using, etc. On separate sheet we attach a brief list of varieties suited for Coastal and inland districts we recommend for commercial and home-garden planting with name of pollinators we recommend.

PRUNES

See Coloured Inset for Prices

Worked on Myrobolan Stocks, Marianna Plum Stocks.

Our list comprises all the newest, as well as the best of all the old varieties, and as we anticipate Prune-drying is likely to enormously develop, we are raising them by thousands.

Bulgarian.—Largest size, roundish oblong; skin deep purple, with a thick, heavy blue bloom.

Felleberg or Italian Prune.—Medium to large, long, oval; skin dark purple; flesh rich yellow; dries with little loss of weight.

Golden Prune.—Large, roundish oval; skin tough, of a beautifully golden colour; dries beautifully. Freestone.

Giant.—Very largest size, deep purple; a heavy cropper; makes a splendid market fruit from its size and appearance. Blooms 20th September, full 29th September.

Hungarian or Pond's Seedling.—Largest size, oval; skin yellowish, nearly covered with bright red or carmine.

Oregon Silver.—Seedling of Golden Drop, same shape, same huge size, but will bear heavily in warm districts.

Pacific.—The noblest of the Plum family, larger than Diamond, of a deep maroon colour. Blooms 20th September, full 26th September.

Prune d'Agen (French Prune).—This is the prune almost exclusively used for drying. Although small as compared with some of the new varieties it is of such high sugar contents that for commercial purposes it is un-

rivalled. Fruit medium size, oval, with a neck; skin violet purple, with a thick bloom; flesh greenish yellow. This is the true French Prune of commerce. Blooms 20th September, full 26th September.

Robe de Sergeant.—Similar to d'Agen in shape and colour, but larger; and what makes it valuable is that it ripens ten days before that variety. Blooms 13th September, full 20th September.

Sugar.—Even in size, large, averaging 13 or 15 to the pound; very rich in sugar. Blooms 13th September, full 20th September.

Splendor.—Unlike d'Agen, Splendor is a perfect freestone; like it, it is productive to a fault; ripens 10 days before d'Agen.

Tragedy.—Large, oblong-pointed; skin thick, deep purple; flesh yellow, rich in sugar, with a rich vinous juice; a freestone. Blooms 10th September, full 16th September.

JAPANESE PLUMS

See Coloured Inset for Prices

Owing to their adaptability to nearly all situations, their great beauty and enormous bearing qualities, Japanese Plums are now very largely planted.

Worked on Plum and Peach Stocks

Admiral Togo.—Round and handsome, skin bright crimson; flesh solid, yellow, rich and juicy; ripens early.

Abundance (Botan).—Fair to large; brilliant carmine; juicy, of fair flavour; ripe 10 days before Burbank. Clingstone.

Alpha.—Ripens 12 days in advance of Cherry Plum. Fruit at least twice the size of Cherry Plum; deep, dark red.

Apple.—Large size and striking appearance; fruit ripens soon after Burbank.

Balleana.—Large early Plum, averaging 6 to 9 inches; light yellow, covered with crimson; flesh firm, pale yellow, with a delicious William Pear flavour; strong upright grower. Freestone.

Bartlett.—Fruit medium size; skin mottled with red on a red ground; flesh yellow, with a rich piquant

flavour. Tree a very handsome, sturdy grower.

Burbank.—Largest size, round; flesh deep orange. Clingstone. Blooms 5th September, full 11th September.

Climax.—Large, heart shaped, and highly coloured; delicious flavour; ripens very early; tree vigorous, upright growth.

Combination.—Fruit large, globular, very uniform in size, straw colour.

Chalco.—Large, like a tomato, deep reddish purple, with very sweet, fragrant yellow flesh.

Cyca Smomo.—The upright Blood Plum; ripens earlier than Satsuma.

Doris.—Fair size; bright red, juicy but firm; recommended for the early markets.

Early Jewel.—This is one of the earliest plums to ripen, resembling October Purple; good flavour; an enormous cropper of even-sized fruit; tree very vigorous.

Federation.—Fruit in size, shape and colour resembles Wickson, but ripens fully a month later. Invaluable for market for this reason alone, if for nothing else; quite as productive as Burbank, which leaves nothing to be desired as regards bearing.

First.—Large for an early plum; pale amber, faint bluish on sunny side, half transparent.

Formosa.—Rich yellow till nearly ripe, of large size, unusually firm; apricot flavour; tree a vigorous grower.

Gaviota.—Cherry red; flavour excellent; fruit of large size, and an abundant and regular cropper; tree a late bloomer; a splendid shipping plum.

Gold.—A marvel of beauty, the golden globes being borne all along the limbs, singly; in colour, clear, deep golden; small.

Hale.—A clear golden colour; fruit rich and juicy; a very heavy cropper; ripens early.

Hattankin.—Large, round; skin bright, clear yellow, no red; flesh pale yellow, firm; a clingstone; ripe end December.

Kelsey.—Very large, heart shaped; clear yellow, covered with red in the sun; a partial clingstone, late inclined to scald.

Latest of All (Paterson).—Originated on the Paterson River (N.S.W.); very late, ripening in March, when practically all other Jap. Plums are over; colour bright yellow, good and showy; round.

Lord Ranfurly.—Like Burbank in growth of tree and appearance of fruit, but ripens before that variety.

Ogon.—(See Hattankin).

October Purple.—Fruit large, quite round; deep purple, almost black; flesh yellow, with distinct flavour.

Okki Smomo.—Large, long in shape; skin deep, dark red; equal in appearance to Burbank; good.

Prunus Pessardii.—The leaves of a red, bronze colour; the young wood purple; fruit small, red from the time the blossoms fall; valued mostly for colour of its leaves.

Rubio.—Flesh deep crimson, being one of the best bloods; skin clear yellow, covered with bright crimson; splendid as an early shipper; vigorous and bountiful cropper.

Shipper.—Flesh wine-coloured; skin blackish purple; will hang for weeks uninjured; a good cropper.

Sultan.—Huge size, oval; deep purplish crimson; flesh firm, dark crimson; very productive.

Shiro.—Medium; clear, light yellow, with thin white bloom; clingstone; early; most profitable market sort; possibly the best early market variety.

Satsuma (Blood).—Medium round; skin deep purplish red; flesh dark red; of a pendulous habit; late. Highly recommended. Blooms very early.

Santa Rosa.—Fruit of a deep purplish crimson, averaging six inches in circumference each way; skin clear golden; covered with purple; flesh firm and of excellent flavour; a distinct Blood; good grower and heavy bearer. Highly recommended.

Tunk's Seedling.—Large, conical; purple, mottled; ripens with Burbank; heavy cropper.

Vesuvius.—The best ornamental foliaged Plum extant, leaves being very large and of a beautiful glowing crimson; great improvement on Pessardii.

Wickson.—Now so well and favourably known as to hardly need description; an enormous bearer; does well everywhere; sells as well green as ripe.

Wright's Early.—Similar to Burbank, but four weeks earlier; a heavy and constant cropper.

FOUR NEW EARLY JAPANESE PLUMS.

Which we specially recommend as money makers on account of their season. They meet a bare market everywhere and realise fancy prices in consequence. Get a block in early before glut planting. They are all of N.S.W. origin and have been well tested.

Beauty.—Large size, roundish, dark showy red skin, dark flesh, long keeper. Ripens here first week December, when plums for market or

home use are unobtainable. On account of its season, a goldmine to growers for any market.

Early Gem.—This variety is also becoming popular for Sydney market, and, as soon as the growers get to know it they will rush it. Ripe first week in November; ready for market long before that. Good keeper and carrier. Apparently originated from October Purple, which the fruit much resembles in all except season. We leave it to the growers to imagine what a good, large black plum would be worth to them on the market about mid-October—it realised up to £1 per box in Sydney this year. Stock very limited.

Narrabeen.—The largest plum we have seen, roundish, skin rich red, very attractive, like other Jap. plums verges to purplish black when thoroughly ripe. Flesh yellowish, very sweet, juicy, firm, with an exceedingly small stone, heavy bearer. This is one of the best plums ever introduced, its very large size, appear-

ance, and splendid carrying and keeping qualities is sure to make it popular with both the fruit shops and the consumer. Tree is of rather a drooping habit. So far it has been exhibited seven times at different fruit shows in Cumberland County and has been awarded a prize on each occasion.

Price, 2/- each; 20/- per dozen

Wilson.—Like the foregoing, is very early; ripe here, mid-November. Skin very highly coloured, almost black when ripe; flesh yellow. Very firm, will keep for weeks after picking. A splendid carrier, heavy bearer, strong grower. Local growers here have realised up to 16/- per box for this plum this season. We would urge any grower to have some of this variety, as, in our opinion, it is the best paying proposition we have come across so far.

For blossoming dates for Plums, Prunes, and Japanese Plums we have to thank the Department of Agriculture of this State, and particularly so many of our inland clients who pay special attention to interpollination of Plums. The dates given represent the cooler districts of Australia, and are approximate only. For varieties recommended for Commercial and Home Orchard Planting see Page 32.

QUINCES

See Coloured Inset for Prices

Undoubtedly the most hardy of all fruit trees, enduring the extremes of drought and flood, and still bearing heavy crops annually. If fairly treated, cut back every year, and the fruit thinned, will produce enormous crops of large, showy, marketable fruit.

Bourgeat.—Large, rich golden yellow; smooth, velvety skin; beautiful large foliage; quite distinct.

Champion.—Imported from America; fruit very large, flesh tender, good flavour, carries well, splendid keeper, recommended for canning.

De Vranja.—Introduction from Servia; recommended for its prolific qualities; fruit enormous, weighing nearly 3lb.; very agreeable flavour.

Large Orange.—Somewhat resembles an orange; tree a strong, vigorous grower, and immensely productive.

Masters Early.—A large variety, very early, flesh tender, delicate flavour, good keeper and carrier, heavy and constant cropper.

Meeches Prolific.—Fruit large deep orange colour, highly fragrant, immensely productive. One of the best.

Missouri Mammoth.—Enormous size, very even outline, mild, pleasant flavour, most popular market variety; highly recommended.

Pear-shaped.—Medium size, oblong; skin pale yellow; flesh very firm; longest keeper of any of the quinces.

Portugal.—Largest size, oblong; skin paler yellow than most others, strong grower, particularly heavy bearer.

Rea's Mammoth.—Of similar appearance to the Orange Quince, but averaging one-third larger; fruit round; early bearer.

Van Dieman.—We have this variety fruiting, and can recommend it; as good as Portugal; a heavy cropper.

Zucker (Sugar).—Fruit very sweet; excellent when preserved; the sweetest of all Quinces.

MANY VARIETIES CATALOGUED THIS YEAR WILL
NOT BE PROPAGATED FOR 1930 AND AFTER.

(See our remarks in introductory, also on tinted inset)

This season represents the last opportunity to secure or renew quite a
number of these old favourites.

Small Fruits or Berry Fruits

BLACKBERRIES, GOOSEBERRIES, CURRANTS, RASPBERRIES, etc.

See Coloured Inset for Prices

BLACKBERRIES.

Japanese Wineberry.—Similar to Raspberry in shape; colour bright, glossy scarlet; strong grower and quite an ornamental shrub.

Lucretia Dewberry.—Large, handsome, of a shining jet black; melting, and of delicious quality. The plant is healthy and hardy everywhere, and exceedingly productive. Very early.

Mammoth.—This is, without doubt, the very best thing in the way of Blackberries; ripens October, November, and right on to March, in clusters of magnificent dark red berries, of most luscious flavour; does not sucker, a fault with so many of this family.

The Loganberry.—Fruit is sometimes an inch and a quarter long, the shape of a Blackberry, the colour of a dark red Raspberry, and a combination of the flavours of both. The stems are strong, free from thorns, but covered with fine spines, having a trailing habit, and the fruit is furnished in great profusion in early December. Prune same as Raspberries. Price 1/- each, 10/- per dozen.

Carinberry.—This we have ceased growing, as, from our experience, it is a poor form of Loganberry only.

CURRANTS.

See Coloured Inset for Prices

All the very best varieties in Blacks, Reds and Whites.

GOOSEBERRIES.

See Coloured Inset for Prices

All the very best varieties, suitable to Australian climate.

Reds, Yellows, Whites, and Greens

RASPBERRIES.

See Coloured Inset for Prices

These we have in all the very best English and American varieties.

RHUBARB

See Coloured Inset for Prices

Sydney Crimson.—This is the variety sold so largely in Sydney markets. Bears long stout stalks of a deep

crimson colour. So easily the best of the Rhubarbs that we have discarded all others.

STRAWBERRIES

The most suitable soil is a deep, rich loam, or even clay, deeply dug, and enriched with strong manure. Plant in rows 2 feet apart each way, and keep ground constantly stirred, cutting off all runners as they appear, at least three times a year.

Price, 6/- per 100; Special Quotations per 1000.

Anetta.—A Queensland seedling; fruit large, 10 to 16 to the quart; bright, shiny red; of delicious flavour.

Cresswell's Seedling.—Fruit very large rather long, of a bright, glossy red colour; a good second early, and will produce a continuous crop right up to May.

Illawarra.—The berries are fine red colour; flesh solid and rich in flavour, the plant robust and disease resistant, 38 large ripe berries have been taken from a single plant. Recommended.

King Edward VII.—Berries extra large, deep vermilion, produced in bunches well clear of the ground; a heavy cropper.

Marguerite.—One of the best known varieties, largely grown for market on account of its appearance.

Phenomenal.—Early variety; large, splendid flavour and colour; carrying well; an acquisition.

Royal Sovereign.—Largest size; bright, glossy scarlet, colouring well to the point; flesh white, exceedingly firm.

TREE TOMATOES.

A small evergreen tree from India, attaining a height of six to eight feet. Its fruit is produced in pendulous bunches of four to six each, of brownish red colour, oval or egg-shaped. In flavour the fruit resemble the common Tomato, with a smack of the Lemon. Will keep many weeks after gathering, and will produce an annual crop for an indefinite period. The tree is of easy culture. Price, 1/6 each.

WHITE PASSION OR BANANA PASSION FRUIT.

Tacsonia Mollissima.—This plant has been grown for some time as an ornamental climber, with handsome rose-coloured flowers, and producing enormous quantities of white fruit about the size of a hen's egg, which, on being tried, proved to be valuable for table, and much relished by many. Price, 1/6 each.

HOVENIA DULCIS (CHINESE RAISIN).

This is grown more for the curious fruit, which is borne in clusters on branches; in flavour it very much resembles a Muscatel Raisin. It forms a very handsome small tree; delicious. Price, 2/6 each.

PASSION FRUIT PLANTS.

We specialise in these, and raise tens of thousands annually. We select seeds specially from our own Plantations at Gosford (the home of Passion culture), where we have thousands of plants fruiting, also from seed from Norfolk Island, and planters may rely on the variety we send out.

In pots established, 9d each; 7/- dozen; 35/- 100.

Plants from open beds, 7/6 100; 60/- 1,000 for full 1000's or more.

POMEGRANATES.

Valuable market fruits, the variety we grow being enormous and very highly coloured. Price, 1/6 each.

ASPARAGUS PLANTS.

From seed specially selected:—

Conovers Colossal	2-year roots, 7/6 100
Palmetto	2-year roots, 10/- 100

TOMATO PLANTS.

Price, 3/6 per 100; 30/ per 1,000

We can arrange for good, strong plants of the following for delivery from July to February.—

Chalks Early Jewel	Ponderosa
Matchless	Earliest of All
Trophy	Dwarf Champion
Duke of York	Mikado
Burwood Prize	Earliana

Despatched at customer's risk only per rail or post.

We shall be pleased if our Clients will forward the names of any of their friends to whom a copy of this Catalogue may be useful.

The varieties above listed can be relied on for a good general selection for home orchard planting for coast or inland, and if this Catalogue is carefully perused as to dates of ripening, flowering, dates for cross-pollinating, etc., we feel confident the planters will be well satisfied with our selection. Of course, it must be understood the climate and conditions of the Commonwealth are varied, and it is impossible for us in this book to devote pages to each and every district and location, and we ask our friends "when in doubt" to write us, when we will give closer details.

Novelty Roses for 1929

The foregoing have all flowered in Sydney, and we unhesitatingly recommend the following seven as easily the best of the 1929 importations.

Price, 4/- each. The set of seven for 25/-, postage paid.

Climbing Hadley.—Good climbing form of the so well and favourably known red that has been planted so extensively in N.S.W. of recent years. Raiser says this is the best red climber, and we suggest all our friends find room for at least one.

Gaiety.—Raiser says has no equal in fancy class; the beauty is indescribable, the expanding bud is a brilliant shade of orange vermillion. As the flower develops the petals are ruffled, each row showing a different tone, from soft old rose, pink and orchid to creamy fawn at centre. A splendid grower and the most ornamental foliage we have ever seen on a rose yet. We think this one should be an acquisition.

Julien Potin.—Rich golden yellow that deepens as the flower matures, buds

long and shapely, developing into large flowers of beautiful form, sweetly scented.

Konigin Louise.—Colour white, very large and perfectly formed flowers, lasting well. A greatly improved K. A. Victoria, highly recommended.

Mari Dot.—Growth vigorous, flowers large, full and well shaped; colour cadmium yellow suffused with dark red to rosy salmon. A new colour in roses.

Marquise D'Audigne.—Foliage mildew-proof, growth erect and vigorous, colour red, shaded velvety crimson scarlet, highly perfumed. Gold medal rose of great promise.

Rose Hill.—A sport from Columbia, which the raiser says will never be surpassed; colour a pure rose pink of great brilliance, petals and growth good.

New Roses for 1928

From about 50 novelties for 1928 we unhesitatingly recommend the following six as being easily the best. We strongly suggest that any of our friends who have not yet planted their novelties, to be guided by our recommendations.

Price, 2/6 each. Set of six for 15/-, postage paid.

Countess of Stradbroke (H.T.).—A vigorous growing, free blooming, climbing rose of exceptional merit, of a rich deep velvety crimson, and worthy in every respect of a position beside varieties like Black Boy and Miss Marion Manifold. The flowers are large, full (averaging 40 petals) and of good shape.

Cuba (Pernet).—The long buds are almost scarlet, but the open flowers are a very uncommon shade of orange scarlet or lincoln red on the back of the petals, and the inside of the petal is a rich velvety scarlet crimson, with carmine towards the tips of the petals. The open flowers are large, fairly full or semi-double and globular. The petals are large and strong. Very sweetly scented, with bronze green handsome foliage. Very vigorous, quite hardy, erect habit. Few thorns. Very free flowering.

Climbing Radiance (H.T.).—In so many countries of the world "Radiance" is the most popular garden rose, and now a real climbing sport is in commerce,

we feel sure this new variety will become equally popular. Very vigorous grower.

Everest (H.T.).—A giant white rose of perfect form, with delicate cream suffusion, carried upright on powerful stems. This is the largest rose yet raised, and when fully opened it resembles a huge Paeony. The foliage is bright green, not very thorny. Extra vigorous, tall grower, would make a pillar rose.

Goldlachs (Golden Salmon) (Dwarf Poly).—An intense fiery gold salmon of wonderful beauty, flowers medium to large in size, produced in large full trusses. One of the most distinct and pleasing novelties. Strong bushy growth of medium height. Fine healthy foliage.

Oliver Mee (H.T.).—Colour deep salmon with heavy flush of clear fawn, changing with age to deep salmon pink. Flower of the largest size, full and high centred. Growth free and branching. Sweetly scented.

General List of Ever Blooming Roses

Planters will notice that in the undernoted list we have discarded many of the old well-known sorts.

This is the result of the careful deliberations of members of the Rose Society of New South Wales, in conjunction with the leading Nurseries of the State, and will, we feel sure, with a few exceptions, be welcomed by Rose enthusiasts generally. Certain old varieties have been discarded for weakness of growth, etc.; others, in that they have been superseded by more recent varieties showing improved tints and colouring.

Always plant roses in new land where possible, or, if old land, well worked and manured. Roses relish a medium soil, not unduly clayey and not too sandy; the former can be loosened with well-rotted stable manure, and the sandy soil can be mixed with clay or good cow manure.

When planting, keep the union of bud and stock about in line with the ground level or a little lower, taking care to spread all roots well out and downwards.

Pruning.—Cut all sorts hard back to, say, two prominent eyes as soon as planted.

Everblooming Dwarfs and H.T.'s.—Cut back after spring flowering, also at any period when they are dormant; the plants will then make fresh growth at once, from which blooms will come.

H.P.'s.—These are usually stouter growers than H.T., and, when pruning in winter, roughly two-thirds of current season's wood should be removed. These can be treated the same as H.T.'s after the spring blooming so as to get a good autumn show.

Climbers.—These are, of course, the most vigorous growers of all in early spring; all old and diseased canes should be removed, taking care that the canes left are well spaced and easy to train in the place of those removed. Roughly speaking, climbers should be cut back about one-third, and the laterals left along the main canes should be reduced to 2 or 3 eyes.

SEE COLOURED INSET FOR PRICES.

Australia Felix.—Flowers are pink, well shaped, and very sweet, and last well when cut; perfumed.

Alliance de Franco-Russia.—Clear canary yellow; large, very full, and of perfect form. Free.

Alexander Hill Gray (T.).—Growth vigorous and erect; colour pure yellow, like Marechal Niel. Strongly tea-perfumed. Free.

America (H.T.).—Rose pink blooms, large and full, sweetly scented, buds pointed, like Columbia, is almost thornless, and is mildew-proof, but produces its blooms in good shape, more consistently than its predecessor; growth moderately vigorous.

American Beauty.—Rosy, cerise, large, full, well formed. Vig.

Angelus.—A seedling from Columbia and Ophelia, promising to be one of the best white roses; fragrant, good lasting qualities; mildew proof.

Antoine Rivoire.—Rosy flesh, shaded carmine; base of petals yellow, large and full. Vig.

Annie Laurie (H.T.).—Flesh pink, large full good form, free. Mildew-proof foliage, vigorous.

Arthur Cook (H.T.).—Deep velvety crimson, with a beautiful sheen. Flowers large, full, and pointed, with a most delicious perfume. Growth free and upright, distinct from any other crimson, and the flowers are carried erect on good stiff stems. Foliage bright green and mildew proof.

Aspirant Marcel Rouyer (H.T.).—Very long pointed bud, very large full flower. Deep apricot, tinted salmon flesh on outer petals, veined deep yellow at the base.

Beauty of Stapleford.—Deep rose, bright carmine centre; large, full, and good form. Mod.

Beaute Inconstante.—Coppery red, shaded carmine and yellow; very variable, quite distinct. Free.

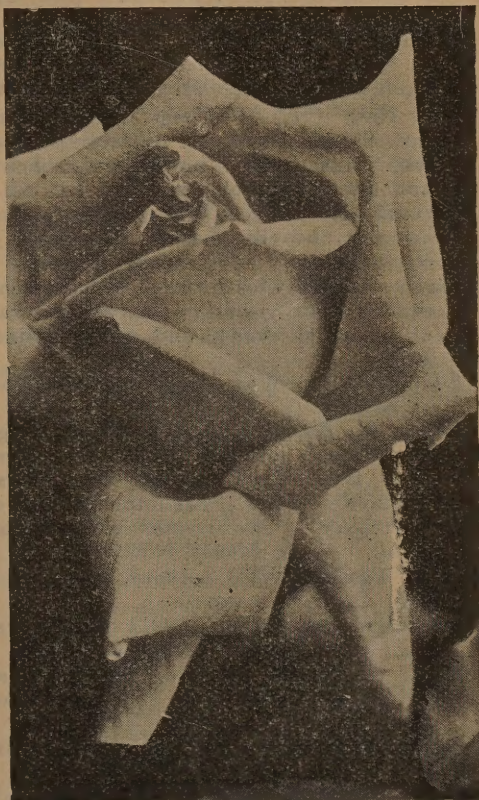

- Belle Siebrecht.**—Bright rosy pink; petals long and re-curved; constant bloomer and a charming variety. Free.
- Bessie Brown.**—Creamy white, highly perfumed, of immense size and good form. Free.
- Betty.**—Large, fairly full, and glorious form; petals 4 to 5 inches long; colour, ruddy gold. Mod.
- Betty Berkeley.**—Deep red; intense colour buds long and oval; Winter bloomer. Vig.
- Betty Uprichard.**—Delicate salmon pink to carmine, reverse of petal glowing carmine, with coppery sheen; vigorous and free branching habit; floriferous.
- Blossom (H.T.) (Beckwith).**—The groundwork of the petals is peach blossom pink, heavily veined and flushed "Rose Neyron Red," shading to yellow at the base of the petals. The outside of the petals flushed yellow and pale pink.
- The Bride.**—White, generally with a greenish tinge; outer petals tinged pink. Mod.
- British Queen (H.T.).**—Pure white. Flowers are large and of fine form and sweetly fragrant. Mod.
- Carine (H.T.).**—Orange carmine, blush buff, creamy fawn, and coppery salmon.
- Capt. F. Bald (H.T.).**—Velvety black, overlaid with crimson, very fragrant, good.
- Catherine Mermet.**—Flesh rose; full, good form. Vig.
- Chas. K. Douglas (H.T.).**—Scarlet flushed, velvety crimson, sweetly scented, excellent.
- Chas. P. Kilham (H.T.).**—Large, fine shape; bold petals, colour brilliant, orange orient red, suffused with glowing scarlet, when open fades to brilliant Lincoln red, lasts well when cut, very free, mildew-proof foliage, vigorous.
- Chateau de Clos Vougeot (H.T.).**—Rich velvety scarlet shaded fiery red, changing to dark velvety crimson as the flowers expand.
- Clarice Goodacre (H.T.).**—Biscuit chrome on ivory white; stiff petals; vigorous grower.
- Corallina.**—Deep rosy crimson flowers, shaded coral red; growth vigorous.
- Comtesse de la Barthe.**—Rosy flesh, globular and fairly full, very free blooming. Vig.
- Countess Cayla.**—Ranging from nasturtium red, tinted orange, and carmine to coppery yellow.
- Countess Clanwilliam (H.T.).**—Delicate peach pink at the base of the petals, which are heavily edged with deep cherry red.
- Countess of Gosford (H.T.).**—Salmon-pink, the base of the petals saffron and yellow; blooms of perfect form. Vig.
- Countess of Shaftesbury (H.T.).**—Colour bright, silvery carmine, mottled and flecked pale shell at the edges of petals.
- Crimson Emblem (H.T.).**—Bright crimson; moderately full, scented; decorative.
- C. V. Haworth.**—Shell-shaped petals are an intense black scarlet with rich crimson, good size, perfectly formed; vigorous; fragrant.
- Commonwealth (H.T.).**—Flower deep pink, solid colour, large, double, very lasting, moderate fragrance, bud large, long and pointed, borne single on strong stem; growth vigorous and upright; rich green foliage; disease resistant; free bloomer.
- Clovelly (H.T.).**—Buds carried on a very long, upright, stiff neck, opening to flowers of perfect form, petals reflexed. Rich carmine rose, salmon shaded. A rose of great merit.
- Columbia (H.T.).**—A delightful shade of rose pink, which, unlike most roses, deepens as the flower ages. Blooms full, splendid shape, borne on rigid stems and are deliciously fragrant. Growth good, with disease resistant foliage, particularly free flowering.
- Crusader (H.T.).**—Crimson red, of good size and shape, slightly perfumed; very full and borne freely on long, strong stems; mildew proof foliage.
- Crimson Queen (H.T.).**—Rich, bright velvety crimson, large semi-double flower of perfect shape.
- Cynthia Forde (H.T.).**—Brilliant pink, shading to rosy pink; large; vig.
- Dame Edith Helen (H.T.).**—Colour glowing pink, a self throughout from when the bud opens till the petals fall, very large and full, perfect form, and opens well in all weathers. It possesses the true old rose scent in a very high degree. Foliage is mildew and black spot resistant.
- Devoniensis.**—Creamy white, blush centre; large, full, and well formed. Vig.
- Dean Hole.**—Very large, of great substance, high centre of fine elongated form; petals very large and smooth; colour silvery carmine, shaded salmon; absolutely distinct. Vig.

 'BUDDED ROSE
 READY FOR PLANTING.

A REASON WHY
 YOU SHOULD PLANT
 OUR ROSES.

 KAISERIN AUGUSTA
 VICTORIA
 (A GOOD CREAMY
 WHITE)

- Dixie (H.T.), (W. R. Gray).**—This charming novelty is chiefly to be noted on account of its beautiful colour, which is a clear soft shell pink or pale salmon; the only rose of similar shade is Mrs. Charles Bell, and both roses originated from the same parent, viz., Pink Radiance.
- Dorothy Page-Roberts (H.T.).**—Ideal decorative Rose, a lovely shade of coppery pink, suffused with apricot yellow. Vig.
- Dr. Grill.**—Light rose, coppery yellow centre; beautiful bud, but not full. Vig.
- Dr. J. Drew (H.T.).**—Salmon yellow, suffused with pink; very sweetly scented.
- Duchess of Normandy.**—A sport from Dean Hole, which it greatly resembles in all respects except colour, which is a lovely soft salmon-flesh, overlaid with yellow.
- Duchess of Sutherland (H.T.).**—Colour a delicate rose pink, with lemon shading on a white base. Free.
- Duchess of Wellington.**—Saffron yellow; a beautiful shade; in shape and type the rose resembles Killarney. Free.
- Duchess of Westminster (H.T.).**—Sweetly perfumed; a dainty, clear rose-madder; vigorous; very free flowering.
- Earl Haig (H.T.).**—Deep reddish crimson, flowers immense, perfectly formed with high centre, petals large, heavy and continuous bloomer.
- Earl of Gosford (H.T.).**—Colour dark crimson; heavily shaded after style of Victor Hugo; fine, strong grower.
- Earl of Warwick.**—Soft salmon-pink, shaded with vermilion; large and full, of beautiful shape, and quite distinct. Mod.
- Edel (H.T.).**—White, with faintest ivory at base.
- Edgar M. Burnett (H.T.).**—Very large, full flowers of fine shape and form, with large flesh petals, tinted rose. Claimed to be a great improvement on La France. The sweetest-scented Rose of all. Gold Medal, N.R.S.
- Edith Cavill (H.T.).**—Ivory, shading to light fawn in centre.
- Eli Hartmann (H.T.).**—Old golden yellow, large, full; of excellent form.
- Etoile de France.**—Colour velvety crimson, centre vivid cerise red; very beautiful. Vig.
- Etoile De Holland (H.T.).**—Bright dark red, very sweetly perfumed.
- Ethel Somerset (H.T.).**—Shrimp pink, edge of petals deep flesh coral pink. Flowers large, full, perfectly finished. Growth vigorous, branching freely. The flowers carried on rigid stems, are possessed of delightful fragrance.
- Ferniehurst (H.T.).**—Pure coppery pink, a beautiful mingling of colour impossible to describe. Very sweetly perfumed. Vig.
- Firebrand (H.T.).**—A New Zealand seedling from General MacArthur. Flowers are darker and retain the perfume and mildew-proof qualities of its parents.
- Florence Haswell Veitch (H.T.).**—Brilliant scarlet, shaded with black; large, full, excellent shape. Vig.
- Florence Pemberton.**—Creamy white, with faint touch of pink; perfect in form; strong grower and continuous bloomer. Vig.
- Florinda Norman Thompson (H.T.).**—Delicate rose on pale lemon, which deepens from centre to base of petals. On the reflex there is a quarter inch edging of pure shell pink.
- Francois Dubreuil.**—Velvety crimson, reflexed cerise and amaranth; good high colour, and good show variety. Mod.
- Frances Gaunt (H.T.).**—Delightful fawny deep apricot, a solid, pure colour toning to silvery flesh. Its shell-shaped petals form a beautiful globular cup-shaped bloom on rigid flower stalk; vigorous and very free; Gold Medal, N.R.S.
- Francie Simms (H.T.).**—Very free, large, full globular in form, colour is rose neyron-red, crayoned with pure bright carmine. The crayoning gives a warm colouring, as the yellow and carmine do not co-mingle.
- Francis Scott Key (H.T.).**—Large well-formed rose of good substance, and beautiful deep red colour. Excellent show bloom. Seedling from Radiance, but much better shape.
- Frau Margrethe Moller (H.T.).**—Dark rose, with clearer edges of petals; very large and full. Mod.
- F. R. Patzer (H.T.).**—Creamy buff, back of petals delicate warm pink; as petals reflex colour becomes light orange-pink.
- Frank W. Dunlop (H.T.).**—A vigorous growing variety, perfectly shaped rich deep pink blooms.
- General Macarthur.**—Brilliant dark crimson, flowers of exquisite form, petals round, of good substance; free blooming. Vig.
- General Galliene.**—A Rose of great substance; rich metallic red; blooms last a long time in perfect state. Free.

- General Superior Jansen (H.T.).**—On stiff stems, large and full; brilliant carmine; good garden Rose.
- George Arends (H.T.).**—Pink F. K. Druschi.—Delicate rose, large, full, and well formed; deliciously perfumed.
- George Dickson (H.T.).**—Colour is velvety black, scarlet crimson, with brilliant scarlet reflexed tips. Become more attractive when staged in water; blooms open naturally. Vig.
- George C. Waud.**—Glowing orange vermillion; large, full, perfectly formed, with highly pointed centre. Mod.
- George Schwartz.**—Bright, deep canary yellow, very deep and rich in colour; large and fairly full. Free.
- Golden Emblem.**—Probably the richest yellow we have in roses; flowers of good size and full; a free bloomer.
- Golden Ophelia (H.T.).**—Fair size and compact, opening in perfect symmetrical form, golden yellow in the centre, paling slightly at the outer petals.
- Golden Rule (H.T.), (E. G. Hill).**—An excellent yellow rose, outside petals creamy yellow, centre deep orange. Blooms large, fairly full, suitable for garden or exhibition. Growth is free and bushy.
- Gold Mine (H.T.) (Jos. H. Hill Co.).**—Golden yellow, with orange bronze heart, pointed bud, open flower being large and of good form; tea scented. (Described as an improved Mrs. Aaron Ward; flower appears larger, though not as deep in colour).
- Gorgeous (H.T.).**—Deep orange yellow, heavily veined reddish copper.
- Gruis au Teplitz.**—An acquisition on account of its colour, which is of the brightest crimson scarlet. Vig.
- Gustave Grunerwald.**—Carmine pink, centre clear yellow; high pointed centre, buds long and pointed. Vig.
- Gwen Nash (H.T.).**—Large, semi-single flowers; lovely shade of pink; large petals, beautifully reflexed; makes a tall bush, or may be grown as a pillar rose.
- Hadley (H.T.).**—Dark crimson scarlet; good grower.
- Hawthornmark Crimson (H.T.).**—A gloriously beautiful rose whose pointed bud colourings are intense crimson maroon, becoming crimson scarlet as the semi-double blooms develop.
- Harry Kirk (Tea).**—Deep sulphur yellow, passing to a lighter shade at edge of petals. Vig.
- Hector Mackenzie.**—Dark pink, changing to silver crimson. Very floriferous and sweetly perfumed. Vig.
- Henrietta (H.T.).**—Fiery crimson; good grower; very free bloomer; scented; fine for garden.
- H. E. Richardson (H.T.).**—Deep rich crimson; vigorous, upright growth, large and beautiful.
- His Majesty.**—Dark, rich crimson, shaded vermilion, crimson on the edges of petals. Vig.
- Hoosier Beauty.**—Free, large, full beautifully formed flowers; glowing crimson, with darker shadings. Vig.
- Homere.**—Pale rose salmon, centre petals bordered pink; good form, blooms in clusters. Vig.
- Hugo Roller.**—Rich lemon yellow, the petals being edged and suffused with crimson; flowers of medium size. Free.
- H. V. Machin (H.T.).**—Deep, bright velvety crimson; sturdy, erect grower, and every shoot carries a flower. A fine exhibition variety. Gold Medal.
- Independence Day (H.T.).**—Buds olive-shaped, developing into well modelled flowers with flame-coloured stains, petals of sunflower gold, overlaying orange apricot.
- Isobel (H.T.).**—Single, carmine red, flushed orange; large; dies back.
- Ivy May (H.T.) (Beckwith).**—Rose pink shading to amber at the base of petals, flushed with gold on the outside and at edges of petals. The rich colouring appears to last from bud to open bloom. Delightful fragrance, good growth, and fairly full blooms of attractive shades make this a welcome addition to any garden.
- Janet.**—Virtually a dwarf "Gloire de Dijon." In the young stage, delicate egg-yolk salmony flesh or golden ochre on very delicate fawn; delicious perfume.
- J. B. Clark (H.T.).**—Colour richest velvety crimson; flowers extra fine; growth very vigorous.
- Jean Pernet.**—Large, full, and well-formed, centre deep tawny yellow, passing to light yellow; very free blooming and sturdy habit; first-rate.
- J. G. Glassford (H.T.).**—Very vigorous, free-branching growth; immense depth of petals; buds long and pointed, opening to flowers of great weight and substance, with high pointed centre. Colour clear deep crimson lake, without shading; a clear, solid colour, does not fade.

- John C. M. Mensing (H.T.).**—A distinct sport from "Ophelia," being a deep bright rose, habit and other characteristics as the parent.
- John Davidson (H.T.).**—Deep rich crimson.
- John Russell (H.T.).**—A rich glowing crimson flushed with deeper, almost black shade. The flower is large and beautifully shaped, and it is very free.
- Jonkheer J. L. Mock (H.T.).**—The blooms which are produced with the greatest freedom, are of perfect formation; colour carmine, changing to imperial pink. Vig.
- Joseph Hill.**—Salmon pink, shaded with yellow; buds long and pointed; fine full flower, of exquisite form. Mod.
- Kaiserin Augusta Victoria.**—Pure white, with orange centre; outer petals reflexed. Mod.
- Killarney.**—Buds long and pointed; flesh tinted white and pink; very free and perpetual. Vig.
- King George V. (H.T.).**—Colour, rich, blackish crimson, with violet shadings. Vig.
- Konigin Carola (H.T.).**—Rose pink, fine form; good exhibition or garden. Free.
- K. of K. (H.T.).**—Semi-single rose of intense scarlet, large velvety petals; vigorous and branching growth; blooms are produced in great profusion. Awarded Gold Medal of the National Rose Society.
- Kootenay.**—Large size, good substance, with vigorous growth; primrose colour; a vast improvement on K.A.V., being larger, more vigorous, and very free.
- La France.**—Pale peach, reverse deep rose; large, full, and well formed; very fragrant; good show bloom. Free.
- La France de '89.**—A magnificent bloom, almost like a Paeony; brilliant rosy red, lined with white. Vig.
- Lady Alice Stanley (H.T.).**—Deep coral rose, inside pale flesh, slightly flushed deeper flesh; blooms large and full; fragrant.
- Lady Ashtown.**—Very pale rose du Barri, shading to yellow at base of petals, reflex of petals silvery pink. Vig.
- Lady Dunleath (H.T.).**—A rose whose long-pointed ivory-cream white, egg-yolk, yellow-zoned petals create beautifully finished blooms.
- Lady Helen Maglona.**—The bud and young flower are bright crimson red, with blackish markings, flowers of good size and full, are carried erect on long stems. Growth is vigorous and erect, free blooming.
- Lady Hillingdon.**—Orange yellow, long buds, half-full flowers; very free blooming and attractive colour. Vig.
- Lady Maureen Stewart (H.T.).**—Globular slightly imbricated cupped bloom, with velvety black scarlet cerise, shell-shaped petals.
- Lady Pirrie.**—Outside of petal deep coppery reddish salmon; inside petals apricot yellow; growth very free, profuse bloomer; a magnificent bud, perfect flower.
- Lady Plymouth.**—Tea scented, deep ivory cream; faintly flushed pink.
- Lady Roberts.**—Reddish apricot, the base of the petals coppery red; large, full and of good shape. Free.
- Lady Ursula.**—Petals are unusually large; the colour is a delightful shade of flesh pink and thoroughly distinct. Vig.
- La Tosca.**—Soft pink, tinted rosy white, orange shade; free, strong.
- Laurent Carle.**—Buds long, flowers very large, of perfect form; colour brilliant velvety carmine. Vig.
- Liberty.**—Flowers brilliant crimson, constant bloomer; keeps its colour well after being cut. Mod.
- Lillian Moore (H.T.).**—Deep pure Indian yellow.
- Lord Charlemont (H.T.) (S. McGredy & Son).**—Crimson, deepening to carmine crimson; sweetly scented; buds long and pointed, flowers full; growth moderate to vigorous.
- Lord Tarquin.**—Pale flesh colour; shaded; large, full, and good form. Free.
- Los Angeles.**—Luminous flame pink, toned coral and gold at base of petals; long-pointed bud, expanding into beautiful, large, fragrant flowers.
- Louise Criner (H.T.) (Chambard).**—An exceedingly fine white rose, of good shape and size. After style Mrs. H. Stevens, but much fuller. Excellent for exhibition, garden or cut flowers.
- Lucien Chaure (H.T.).**—Flesh with rosy cream, large well-formed; free. Vig.
- Lyon Rose.**—Buds coral red; tinted with chrome yellow at the base; open flowers, shrimp-pink at the edges. Mod.
- Madam Butterfly (H.T.).**—A glorified sport of Ophelia, said to be freer in growth than its parent, and an intensified colour. A harmony of bright pink, apricot and gold.

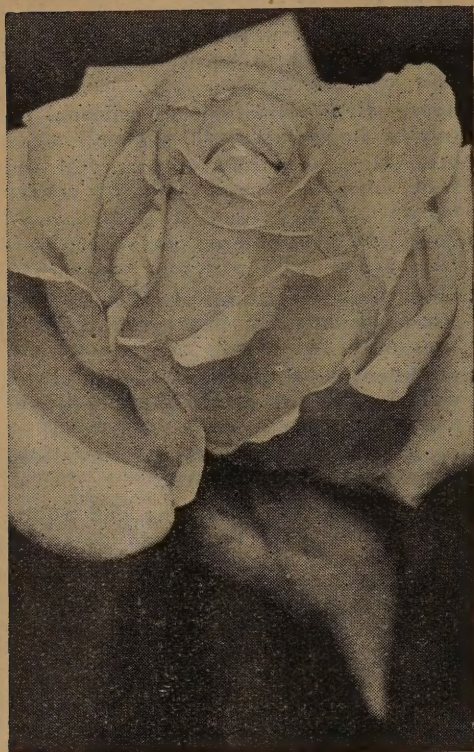

- Madame Abel Chatenay.**—Rosy carmine, shaded salmon; good. Vig.
- Madame Caroline Testout.**—Large, globular; bright flesh pink; in way of La France, but darker; immense petals. Vig.
- Madame Charles Lutand (H.T.).**—Chrome yellow, slightly blended with bright rosy scarlet on the outer petals. Free.
- Madame de Watteville.**—Creamy white, each petal edged rose; very fragrant. Free.
- Madame Edouard Herriot (Pernetiana).**—It is of the well-known Lyon Rose type. Many attempts have been made to describe the colour, but it is almost impossible to do so. Tangerine is the nearest we can get to it. Mod.
- Madame Jean Dupuy.**—Rose yellow, changing to creamy white and yellow towards the margin; outer petals edged with rose. Vig.
- Madame Jules Bouche (H.T.).**—White; centre shaded with rose; fine large, well-formed flower; vigorous grower; very fine; long buds.
- Madame Jules Grolez.**—Brilliant China rose, perfect form; one of the best. Mod.
- Madame Lambard.**—Salmon pink, shaded rose, large and fairly full. Vig.
- Madame Leon Pain (H.T.).**—Silvery salmon, centre orange yellow; large, full; well formed.
- Madame P. Euler.**—Vermillion silvery pink; large flower on long stem; beautiful form; fragrant. Vig.
- Madame Segond Weber.**—Rosy salmon; the blooms are enormous, petals large, form absolutely perfect. Vig.
- Mdlle. Christine de Noue.**—Rosy lake; outer petals darker, and shaded with purple. Vig.
- Maman Cochet.**—Flesh rose, shaded salmon yellow; fine, long bud; first-class; one of the very best. Vig.
- Marcella (H.T.).**—Buds buff, flowers, on opening, salmon flesh colour.
- Margaret Dickson Hamill (H.T.).**—Delicate maize straw colour, petals flushed with carmine at back perfumed.
- Margaret M. Wylie (H.T.).**—Vigorous, free branching, upright growth. Flower of immense depth, the buds very long and pointed with petals of great size and substance. The colour, tender flesh, heavily flushed deep rose pink towards the edges of the petals. Very sweetly scented. A grand garden rose.
- Marie Van Houtte.**—Pale straw yellow, edged with rose; large, full, and vigorous; a grand Rose. Vig.
- Marquise de Ganey (H.T.).**—Silvery rose, extra large.
- Mary, Countess of Ilchester (H.T.).**—Warm crimson carmine, free and continuous, of great size.
- Mary Pickford (Per.).**—Colour rich yellow, large, good shape, fairly full, free, vigorous.
- Mavis (H.T.).**—A greatly improved form of Madame Melâne Soupert. In colour a bright yellow flushed with peach pink. Splendid habit of growth, flowers full and very floriferous.
- Meteor.**—Rich, dark, velvety crimson, retaining its colour well. Free.
- Medea.**—Large, globular bloom, full and well formed; lemon yellow; canary centre. Vig.
- Melody (H.T.).**—Intense pure deep saffron yellow with primrose edges.
- Mildred Grant.**—Enormous flower, on strong, firm stalk; fine form, magnificent guard petals, pale rosy white. Mod.
- Miss Alice de Rothschild.**—Deep citron yellow, with the petals charmingly reflexed. Free.
- Miss E. Van Rossem (H.T.).**—Velvety red, very sweetly scented.
- Modesty.**—The flower is long and pointed. Colour of the guard petals is washed and veined vermillion rose; the remaining colour of the bloom is a pearly cream, faintly flushed rose; free blooming and sweet scented.
- Molly Sharmon-Crawford.**—Colour is delicate eau-de-nil white which, as the flower fully expands, becomes dazzling white. Mod.
- Mrs. Aaron Ward.**—Indian yellow, occasionally washed with salmon rose. Free.
- Mrs. Archibald Mackey.**—Best described as a huge Belle Siebrecht, rather deeper in colour. Fine exhibition Rose, and a good bedder. Fragrant.
- Mrs. A. R. Barraclough (H.T.).**—Colour bright, sparkling pink, shaded carmine, shading to yellow at base. The colour does not fade but seems to become brighter as the flower ages. The flowers are full, of huge size, fine substance and perfect form.
- Mrs. A. R. Waddell.**—Apricot to Orange, opening reddish salmon, reverse of petals rosy scarlet.

Mrs. Bryce Allen (H.T.).—Carmine rose, highly perfumed. Gold medal.

Mrs. B. R. Cant.—Deep rose and rich red, inner petals soft silvery rose. Vig.

Mrs. Chas. Lamplough (H.T.).—Colour, soft lemon, sweetly scented. Vigorous, free flowering.

Mrs. C. J. Bell.—A sport from Radiance a delicate shell pink colouring. Its parent should be a sufficient recommendation.

MADAME ABEL CHATENAY
FREE FLOWERING SALMON PINK.

Mrs. Dudley Cross.—Pale chamois yellow, beautifully illuminated in Autumn rich rainbow tints of rose and crimson. Vig.

Mrs. Dunlop-Best (H.T.).—Reddish apricot, base of petals coppery yellow; perfumed.

Mrs. E. T. Statesbury.—A long pointed bud similar to Mrs. G. Shawyer, but slightly paler in colour, good foliage and perfume.

Mrs. Foley Hobbs (T.).—Ivory white, faintly tinged clear pink on edge of petals, deliciously perfumed. Vig.

Mrs. Frank Bray (H.T.).—Coppery ecru,

Mrs. George Shawyer.—Brilliant clear rose, very large, well formed; full; good exhibition. Strong.

Mrs. Harold Brocklebank.—Creamy-white, centre buff, base of petals salmon rose; buds with a flush of salmon pink. Free.

Mrs. Henry Winnett (H.T.).—Of a beautiful dark red colour and strong free growth; mildew proof foliage and deliciously fragrant.

Mrs. Herbert Stevens.—Large, long pointed bud; white, with fawn shading; very free; good. Vig.

Mrs. H. Morse (H.T.).—Deep coral pink; sweetly scented.

Mrs. MacKellar.—High-pointed centre, citron yellow to pearly primrose white; vigorous growth and floriferous.

Mrs. Molony (H.T.) (McCredy).—Pure brilliant crimson carmine red, without any variation, so wonderfully brilliant that the whole flower simply glows and stands out by itself. The flowers are full; well formed, with beautiful reflexed petals and of good size, and fine substance, often large enough for exhibition.

Mrs. R. C. Bell (H.T.).—A grand new dark deep red.

Mrs. R. D. McClure (H.T.).—Brilliant shining salmon pink. Free and constant bloomer. Vig.

Mrs. R. H. Darlington (H.T.).—Colour creamy yellow, sweetly scented and of free growth.

Mrs. T. Smith (H.T.).—Glowing cerise, large, fairly full, good shape, fragrant, mildew-proof foliage, free; vig.

Mrs. Wallace H. Rowe (H.T.).—The colour is bright sweet-pea mauve.

Mrs. W. C. Egan.—An extremely vigorous, healthy grower; with long pointed buds; colour soft, light pink, with a golden line at base of petals; very floriferous.

Mrs. W. Lindsay (H.T.).—Long pointed buds, opening to exquisitely formed flowers of delicate peach pink, heavily zoned golden yellow and fawn.

My Maryland.—Bright salmon pink with paper edges, delightfully fragrant.

- Nederland (H.T.).**—Red, a magnificently formed flower, growth vigorous.
- Niphetos.**—Pure white or pale lemon; beautiful long bud; should be in every collection. Mod.
- Nita Weldon.**—Colour ivory white, edges of each petal faintest blush. Medal.
- Nora Cunningham.**—Flowers are large, decorative, semi-double form, with lighter zone round the stamens. Colour is pure pink in Spring and becomes particularly vivid in the Autumn.
- Old Gold (H.T.).**—Vivid reddish orange, with apricot and rich coppery red shadings.
- Ophelia (H.T.).**—Salmon flesh, shaded with rose; large and of perfect shape. Mod.
- Padre (H.T.).**—Fine long petals of coppery scarlet colouring flushed with yellow at the base.
- Papa Gontier.**—Semi-double, petals large; rose and rosy crimson; splendid Winter bloom. Vig.
- Penelope.**—Lower half of the flower dark reddish crimson, centre white, with a deep red flush on the lower side of centre petals. Mod.
- Perle des Jardines.**—Canary yellow; large, full, and globular; one of the best. Free.
- Pilgrim (H.T.).**—Silvery pink with outside of petals clear rose pink; splendid shape and full bloom; mildew-proof; delightfully fragrant.
- Prince Charming (H.T.).**—Reddish colour mixed with old gold; a pretty decorative.
- Prince du Bulgare.**—Silver flesh, very delicately shaded with salmon, long bud. Mod.
- Professor Ganiviat.**—Purplish rose, medium size, full and free; vigorous; always in bloom.
- Queen of the Belgians (H.T.).**—Salmon pink; recommended.
- Radiance.**—Brilliant carmine, shaded salmon; fragrant; very free. Vig.
- Rainbow.**—Semi-double in way of Papa Gontier; soft rose striped with carmine. Vig.
- Red-Letter Day.**—Velvety, brilliant, glowing scarlet crimson buds and fully opened flowers never fade; semi-double.
- Red Radiance (H.T.).**—A red sport from Radiance. Very free flowering, strongly recommended for garden and table work; certain to become popular.
- Rev. F. Page Roberts (H.T.).**—Blooms large, full, and well formed, of a beautiful rich Marechal Neil colour, with buff markings on reverse of petals.
- Rhea Reid.**—As large as "American Beauty," as fragrant as "La France," as red as "Richmond" in Winter. Vig.
- Richard E. West (H.T.).**—Growth vigorous and free branching habit. Each shoot carries a flower bud, which develops into a full flower with high pointed centre, the blooms are large and full, colour glowing cadmium yellow, paler on reflex. Delightfully fragrant.
- Richmond.**—Superior to "Liberty" in size and form; pure red scarlet; very free flowering. Free.
- Rising Sun (H.T.) (E. J. Hicks).**—Rich copper, shaded old gold at base. A fine colour combination. Long buds which open like a cactus dahlia. A good garden and decorative rose.
- Royal Red (H.T.) (E. G. Hill).**—In the bud and half open stage the colouring is magnificent. Scarlet red with almost black shading. The fully expanded flower is of great size, but lighter in colour. Free flowering. Fine bold petals. Grand large buds. Sweetly scented. A grand habit. Powerful stems. Fine foliage, freely produced, perpetual flowering.
- Rose Marie (H.T.).**—An outstanding feature of this rose is its wonderful fragrance which equals, if not excels, that of Hadley; bud of good shape, of an even shade of rose pink.
- Safrano (T.).**—Deep apricot, changing to fawn.
- Salmon Spray.**—Colour rich salmon pink; sweetly scented, mildew-proof foliage, good for decoration or massing.

- Scarlet Glory (H.T.).**—Vermilion scarlet; the most vivid self-coloured rose yet raised. Growth is vigorous, of free-branching habit, and is very floriferous, having abundant dark green foliage which is not subject to mildew or black spot.
- Sensation (H.T.).**—Flowers scarlet crimson, with maroon markings, very large and sweetly scented. Growth vigorous; luxuriant foliage; free bloomer. Awarded Gold Medal, American Rose Society.
- Shot Silk (H.T.).**—The colourings of this beautiful rose are very difficult to portray; they may be described as bright cherry-cerise over-shot with salmon-orange, flushed rose, and a deeply veined, clear, buttercup yellow base.
- Sir David Davis (H.T.).**—Colour unfading deep glowing crimson, of an even shade throughout, running to a light yellow at the base, flowers are large, moderately full and of good form. growth is extra vigorous. (Recommended.)
- Souv. de H. A. Verschuren (H.T.).**—Cadmium yellow, passing to orange. The blooms are freely and continuously produced, and are carried on a rigid stem. The buds are long and pointed, always opening well, very sweetly perfumed. The raisers claim this to excel all other yellow varieties. Growth vigorous and hardy.
- Souvenir de Claudius Pernet.**—Sunflower yellow, colour deeper in the centre; very large and full; long pointed bud carried on stiff stem. A vigorous grower immune from all diseases.
- Souvenir de Georges Pernet.**—Orient red, edged carmine, shaded yellow; large, full, and carried on erect stem; growth vigorous.
- Souvenir de la Maimaison (T).**—Pale flesh, deeper centre.
- Souvenir de Madam Boulet.**—Flowers dark cadmium yellow, large and full, with long bud, vigorous grower, and carries beautiful bronze-green foliage.
- Souvenir de Stella Gray.**—The predominating shade is deep orange, with splashes of apricot, salmon and crimson. Free.
- Souvenir de Therese Levet.**—Velvety crimson, large and full, good form. Vig.
- Souvenir de Pierre Notting.**—Fine apricot yellow, washed with golden yellow; large and full. Free.
- Star of Queensland.**—Dark crimson, large and full; said to be a seedling of Etoile de France. Free.
- Sunny South (H.T.).**—A lovely pink, flushed with carmine on a yellow base.
- Sunset.**—Deep apricot, large and full; a grand Rose in all stages; splendid for exhibition. Free.
- Sunstar (H.T.).**—Colour orange and yellow, splashed crimson and vermilion. Growth vigorous, erect and branching, an ideal rose for all decorative work. Very highly perfumed.
- Superb (H.T.) (Evans).**—Colour silvery pink, of clear soft tone, with deeper shading on back of petals, flowers full of large size and excellent form; a free flowering, and a good vigorous grower.
- Sunburst (H.T.).**—Fine long-pointed bud, cadmium yellow, with yellow orange centre. Mod.
- T. F. Crozier (H.T.).**—Vigorous growth; flowers large, full, and globular, with high-pointed centre; colour deep canary yellow.
- The General (H.T.).**—Colour blood red, flushed orange; flower large pointed, globular, fragrant damask perfume; flowering continuously late in season.
- The Queen.**—Pure white; free blooming and very fragrant; a grand rose. Vig.
- Theresa Bevan (H.T.).**—Coppery yellow, shaded; large and double.
- Tipperary.**—In colour between "Lady Hillingdon" and "Melody," in the bud soft golden yellow; its great feature is freedom of flowering; most attractive colour; stout habit of growth. Certificate of Merit, N.R.S.
- Una Wallace (H.T.).**—Beautiful soft, well toned cherry rose, without shading. In depth, formation and substance it is faultless; very free blooming; sweetly perfumed.
- Vanity (H.T.).**—Long, pretty buds; canary yellow; vigorous grower.
- Victory (H.T.).**—Glowing scarlet, blooms long and pointed and of good form. Growth free
- Walter C. Clark (H.T.).**—Deep maroon crimson, shaded with black. Large, moderately full, and very fragrant.
- Warrior.**—Blood red colour in the bud, opening to scarlet crimson; double flowers of good size. Vig.
- White La France.**—In way of old La France, but pale peach to almost white; most highly perfumed. Vig.

White Lord Tarquin.—Pure white sport from well-known pink rose of the name; very free blooming. Free.

White Maman Cochet.—A sport from Maman Cochet, almost pure white or creamy white; petals slightly tinged pink; a grand Rose, and always in bloom. Vig.

White Pearl.—Long, beautiful, creamy white bud, outer petals tinged rose. Free.

White Ensign (H.T.) (McGredy).—The raisers say.: "This is the best white rose we have ever grown in our nurseries." The colour is pure white, flushed delicate cream at every base of petals. Flowers are medium sized, full and well shaped.

W. R. Smith.—Colour creamy white, flushed, and suffused with bright rosy pink; flowers of large size and fine form. Vig.

William Shean.—Colour purest pink; a splendid Rose; it has shell-like petals 4 or 5 inches long. Vig.

Willowmere (H.T.).—Colour rich shrimp pink, shaded yellow at centre and turning to carmine pink at petal's edge. Vig.

W. C. Gaunt.—Guard petals of brilliant vermilion scarlet are intensified by the deep crimson reverse; these three rich colourings give the Rose great character. The blooms are on rigid flower stalks; vigorous branching wood; Tea Rose perfumed. Grand addition to this type of rose.

Yves Druhen (H.T.).—Growth vigorous and branching; flower fairly full; colour dark velvety red; highly perfumed (General MacArthur, Chateau de clos Vougeot).

Climbing Roses

Ards Rover.—Probably darkest Rose extant; deep crimson, shaded maroon. Vig.

Bardou Job.—Bright glowing crimson shaded with black; semi-double. Vig.

Black Boy.—The darkest climbing Rose yet offered. The bud is well shaped and the flower most attractive. The colour is a deep crimson shaded with blackish maroon overlaying fiery scarlet, and it is sweetly scented.

Celine Forrestier.—Pale yellow, coppery centre. Vig.

Cloth of Gold.—Sulphur yellow; grand climber. Vig.

Climbing Belle Siebrecht.—A well-developed climbing form of the Hybrid Tea Rose "Belle Siebrecht." Mod.

Climbing Betty.—A good climbing form of that well-known and popular ruddy gold dwarf. A new shade for a climber.

Clb. Caroline Testout.—A climbing form of the beautiful and popular variety, "Caroline Testout." Vig.

Climbing Chateau de Clos Vougeot (H.T.).—A most valuable climbing form of this very distinct and esteemed variety; easily darkest H.T. grown. Good climbing habit.

Climbing Chatenay (H.T.).—Carmine rose, shaded salmon; very free.

Climbing Columbia (H.T.).—A strong growing sport of this well-known favourite. We have had this variety under observation for two years, and

can recommend it with every confidence. It is bound to be one of our leading pink climbers in a few years owing to its beautiful colouring and perfume.

Climbing Comtesse de Labarthe (T.).—A strong climbing sport of the old variety, most constant bloomer. Vig.

Climbing Dean Hole.—A vigorous climbing sport of the well-known dwarf variety. The flowers are identical in every respect and the climbing habit will make it a decided acquisition to exhibitors.

Climbing Devoniensis.—A sport from Devoniensis; very strong grower; very free flowering; flowers same as old Devoniensis. Vig.

Climbing Frau Karl Druschki (H.P.).—Pure white, like the normal type, which is considered by many to be the best white Rose extant. Vig.

Climbing Georges Schwartz.—A vigorous climbing sport of the beautiful dwarf; a fine acquisition.

Climbing General Macarthur (H.T.).—A welcome addition to the list. Possesses all the good points of its parents.

Climbing Golden Ophelia (H.T.).—A Climbing sport of the yellow rose Golden Ophelia, which will prove a welcome addition. The growth is vigorous and flowers continuously throughout the season. (This should prove a good yellow climber).

- Climbing Hoosier Beauty (H.T.).**—A vigorous climbing sport of the popular dwarf of this name. It is identical as regards its rich crimson blooms, and being mildew-proof and deliciously fragrant, it is sure of a high place in the Rose world.
- Clb. H. V. Machin.**—A climbing form of the popular dark red vigorous grower, splendid foliage, free flower.
- Climbing J. J. L. Mock (H.T.).**—A climbing sport of the dwarf variety, producing imperial pink flowers, identical with the parent. Moderate climbing growth so far.
- Climbing Kaiserine Augusta Victoria.**—Strong climbing sport of dwarf variety of same name; free grower, and constant bloomer. Mod.
- Climbing Laurent Carle.**—A fine sport, brilliant velvety carmine, large, and of perfect form.
- Climbing Liberty.**—A strong climbing form of the well-known Hybrid Tea. One of the very best dark red climbers. Mod.
- Clb. Lady Hillingdon.**—A vigorous climbing form of this well-known and popular yellow.
- Climbing Los Angeles.**—Probably no other rose has made such a stir in all except tropical countries. A climbing sport is therefore sure of instant support, as flowers are generally of better quality on the climbing sports.
- Clg. Mad. Edouard Herriott.**—A climbing sport of this well-known rose.
- Climbing Madame Butterfly (Percy E. Smith).**—A sport from the well-known and popular dwarf, "Madame Butterfly"; flowers identical in colour and form to the parent; sweetly scented; a most vigorous climber, of good foliage; must become popular.
- Climbing Meteor.**—A very robust sport of Meteor; very free blooming, and a good addition to the list of climbers. Vig.
- Climbing Mildred Grant.**—A climbing sport from that well-known exhibition rose.
- Clb. Mrs. Geo. Shawyer.**—The parent of this magnificent climber is well known to all, especially as an exhibition and decorative rose, and a climbing sport of this cannot be overlooked.
- Climbing Niphetos.**—A very desirable sport of old Niphetos; very strong growing. Vig.
- Climbing Ophelia.**—A climbing form of the well-known H.T., salmon flesh, shaded with rose.
- Climbing Papa Gontier.**—Climbing sport of old Papa Gontier, retaining its free flowering character; winter bloomer. Vig.
- Climbing Perle des Jardines.**—Perhaps the very best rambling rose in cultivation. Vig.
- Climbing Pink Maman Cochet.**—A climbing form of this most popular Rose; sure to be a favourite. Vig.
- Climbing Second Weber.**—A vigorous climbing sport from the well-known dwarf.
- Climbing Souvenir de la Maimaison.**—A rampant climber, and very free blooming when established. Vig.
- Climbing Souvenir de Therese Levet (T.).**—A vigorous climbing sport of the well-known Tea Rose of same name. It will need no further description. Free.
- Climbing Stevens (H.T.).**—A vigorous grower; large, full snow-white flower; a sport from "Mrs. Herbert Stevens." This large variety, which is very hardy, will prove very superior for open ground culture to Climbing Niphetos.
- Climbing Sunburst.**—A strong climbing sport of the dwarf of the same name.
- Climbing Sunstar (H.T.).**—A climbing sport of the well-known and popular bedding variety. A very novel and valuable introduction, and one that will be greatly appreciated. The colour is deep orange and yellow veined and splashed crimson and vermilion. The bloom is of medium size and semi-double, and the colour can be extremely variable.
- Climbing White Maman Cochet.**—Strong climbing form of the well-known Rose of the same name. Vig.
- Climbing White Lord Tarquin (T.).**—A local sport of this most useful of white Roses. Splendid for florists' work. Free.
- Jessie Clark.**—Soft light pink; single; very large; very vigorous.
- Kerslake's Australian Beauty.**—New dark velvety red climber; good foliage blooms of fine form and substance. Free.
- Lady Waterlow.**—Pale salmon rose, edged with carmine; large semi-double flowers; very elegant. Vig.
- La Marque.**—White, tinged yellow; full blooms in clusters; free grower. Vig.
- Madame Jules Gravereaux (T.).**—Buff white, shaded peach and yellow; good shape; very free flowering. Vig.
- Marechal Niel.**—Rich golden yellow; full and globular; cannot be surpassed as a climber. Vig.

Miss Marion Manifold (H.T.).—A rich velvety scarlet, shaded with crimson; full and of splendid form. Vig.

Mons Desir.—Rich maroon crimson, vigorous climber; sweetly scented. Vig.

Noella Nabonnand.—Extra large, semi-double; velvety crimson; large petals. Vig.

Paul's Scarlet Climber.—Vivid scarlet, shaded crimson; a fine pillar or climber; awarded Cory Cup, 1915, for best British-raised seedling climber.

Reine Marie Henriette.—Bright rosy cerise, sometimes crimson; large, long bloom; good shape; free. Vig.

Rev. T. C. Cole.—Bright yellow, large, full and well shaped; colour between Cloth of Gold and Marechal Neil. Vig.

Sachsengruss.—Delicate flesh with china rose reflexes, very large and a perfect shape.

Sinica Alba (the Camellia Rose of Japan).—Large single flowers, pure white, with yellow stamens and large glossy deep green foliage. Vig.

Sinica "Anemone" (the Cherokee Rose).—Beautiful single flowering rose, with large flowers, $3\frac{1}{2}$ inches across; light silvery pink at the edges, gradually deepening to bright rose at base. Vig.

Souvenir de Leonie Viennot.—Silvery rose, shading to carmine, base of petals canary yellow. Vig.

Striped Reine Marie Henriette.—Has the same excellent qualities as R. M. Henriette, with the exception of the flowers, which are striped magenta on paler ground (Madame Driout).

Wm. Allan Richardson.—Deep orange yellow; most floriferous and very distinct. Vig.

Hybrid Perpetual Roses

VARIETIES enumerated under this heading include all the choicest dark blooms in cultivation. They are not perpetual bloomers like Teas and Hybrid Teas, but bloom in the early spring, and occasionally in autumn. Their great substance, with excellence of form, colouring, and high perfume render them a class very suitable for show purposes and table use.

Coronation (H.P.).—Shading from flesh to bright shrimp pink. This variety must not be confused with the Wichuriana rose of the same name; climbing, double red.

Duke of Edinburgh.—Brilliant scarlet crimson, shaded maroon.

Dr. Rushpler.—Dark velvety crimson, shaded black; almost perpetual. Vig.

Earl of Dufferin.—Dark velvety crimson, shaded maroon; large, perfect form, and free blooming. Vig.

Frau Karl Druschki.—The finest white H.P. extant; of perfect form. Vig.

Louise Crette (H.P.).—Snow-white, with creamy centre. Flowers enormous and continuous bloomer; preferred by many to F. K. Druschki; very vigorous grower.

Hugh Dickson.—Brilliant crimson, shaded scarlet; good size and form.

Mrs. John Lang.—Soft, clear pink; well formed and full; nearly perpetual. Vig.

Paul Dupuy.—Dark velvety maroon, shaded black. Vig.

Paul Neyron.—Deep rose; immense size, strong grower. Vig.

Prince Camille de Rohan.—Very dark crimson.

Single Roses

Splendid for Garden and Decorative Work.

Irish Afterglow (H.T.).—A sport from "Irish Fireflame." In the bud it is a very deep tangerine, passing to crushed strawberry in open flowers.

Irish Fireflame.—Rich ochrey old gold, veined and sheened on a crimson and lemon coloured ground.

Irish Elegance.—Bronzy orange in bud, opening to single flowers of various shades of apricot. Vig.

Irish Glory.—Inside of petals pink, crimson on back. Vig.

Irish Harmony (H.T.).—Buds saffron yellow, splashed claret.

Isobel (H.T.).—Single, carmine-red, flushed orange scarlet. Gold Medal.

Sinica Alba.—For description see Climbing list.

Sinica Anemone.—For description see Climbing list.

Ever-Blooming Dwarf Polyantha Roses

A pretty class of Miniature Roses, specially valuable for decorative purposes, buttonholes, etc. They are constant and prolific bloomers, and every collection should include a few.

- Aenchen Muller.**—Large clusters of brilliant rose-coloured flowers produced till late in autumn; good for massing.
- Aschenbrodel.**—Rosy peach, centre salmon orange; small and cupped.
- Catherine Zeimet.**—Pure white, semi-double, very free flowering.
- Coral Cluster.**—Coral pink sport from Orleans.
- Ellen Poulsen.**—Brilliant pink; large, full, sweet scented.
- E. M. Ward.**—Soft warm pink, sometimes tipped with carmine.
- George Elger.**—Coppery, golden yellow, changing to clear yellow.
- Ideal.**—Colour beautiful dark scarlet. Splendid for massing and bedding. Easily the best dark red Polyantha to date.
- Jeannie Soupert.**—White, with pink flushing.
- Louise Walter (Baby Tausendschon).**—Porcelain pink, shaded white; free flowering.
- Leonie Lamesch.**—Bright coppery red, shaded with deep red and yellow. Mod.
- Mademoiselle Cecile Brunner.**—Salmon pink, coppery salmon centre; small, very full and perfect shape. Free.
- Madam Jules Gouchalt.**—Vermilion, changing to bright rose.
- Marechal Foch.**—A deep red sport from Orleans, possessing all its qualities and also a strong fragrance.
- Miss Edith Cavell.**—Scarlet crimson sport from Orleans.
- Madam N. Levavasseur.**—Flowers like Crimson Rambler in colour and form, but of dwarf habit. Mod.
- Mdlle. Francisque Favre.**—Single; carmine, with white eye; large truss.
- Merville de Rouges.**—Bright crimson, with white centre.
- Orleans Rose (Dwarf Polyantha).**—Brilliant geranium red, suffused with rose; outside carmine, centre white. Mod.
- Rufus.**—Will supersede all crimson polyantha of its class. A pure self crimson of intense shade; does not burn or discolour in all weathers; flowers are double and are produced in bold trusses.
- Snowball.**—Pure white; flowers in clusters; good.
- Tip-Top.**—Golden yellow, heavy striped cerise.
- Yvonne Rabier.**—Pure white.

ROSES THRIVE IN A SUNNY POSITION.

Climbing Polyantha Roses

Aglaiæ (Yellow Rambler).—Bright yellow; almost evergreen; bears immense clusters of rosette-shaped blooms. Vig.

Blush Rambler.—Beautiful soft blush, resembling apple blossom; sweetly scented.

Climbing Cecile Brunner.—Similar to dwarf variety in bloom, but is a moderate climber. Free.

Climbing Orleans.—A vigorous climbing sport of Orleans; very free flowering, and can be recommended.

Crimson Rambler.—Flowers large for its class, produced in clusters of dazzling crimson. Vig.

Dorothy Jeavons.—Pure white in colour, with golden anther; vigorous growth.

Helene.—Flowers delicate rose pink, shaded carmine and orange; trusses enormous. Vig.

Lyon Rambler.—The flowers are double, bright pink with white centres, the contrast of the two colours producing a charming effect.

Thalia (White Rambler).—Flowers pure white; long, trailing bunches of bloom. Vig.

BANKSIAN ROSES.

Alba.—Pure white, small and full, large clusters, strong climber.

Lutea.—Similar to foregoing; buff yellow.

Fortunei.—White; large bloom; vigorous.

Fortune's Yellow.—Bronzy yellow, semi double. Vig.

Wichuriana Roses

THE CREEPING ROSES FOR COVERING BANKS.

American Pillar.—A lovely shade of pink, with a clear white eye; two and a half to three inches across; produced in huge clusters, resembling a bouquet.

Dorothy Perkins.—A beautiful shell pink; the flowers are borne in large clusters of small double blooms, and very sweetly scented; of strong climbing habit. Vig.

Emily Gray.—Golden yellow climbing rose. Without doubt the finest yellow Wichuriana rose yet introduced.

Excelsa.—Bright scarlet double flowers, produced in clusters; thick, glossy foliage; a large, attractive variety; growth and foliage similar to Dorothy Perkins. Can be highly recommended. Vig.

Hiawatha.—Single; bright rich crimson; white eye.

Shower of Gold.—Vigorous, almost the colour of "W. A. Richardson," but with not so much orange.

Tausendschon.—Pink, turning to bright rose and carmine as the flower expands; produced in large trusses of from 10 to 15 blooms.

Tea Rambler.—The little flowers are of a coppery pink, changing to a soft salmon pink.

Veitchenblau.—Seedling from Crimson Rambler; lilac to bluish purple; blooms in trusses. Vig.

White Dorothy Perkins.—A pure white from the popular Dorothy Perkins. Vig.

MOSS ROSES.

Crimson Globe.—Deep crimson, large, full, and globular; buds nicely mossed. Mod.

Wm. Lobb.—Purplish red; very floriferous.

Blanch Moreau.—White.

Venus.—Fiery red, large, full.

Zenobia.—Pink.

Standard Roses

We send out a large number of Standard Roses annually. These are worked on single stems 2 to 3 feet high, and are suitable for borders or grouping in own beds. Dwarf plants may be grown close up with good effect. We have a splendid collection, as the following list will show. These are easily the best and most popular sorts to-day, and our lists are much more up-to-date than any of our competitors' lists.

Customers will note we have grouped in the colours, so as to make it easier to select.

Price, 4/- each, 45/- per dozen.

ROSES IN POTS.

To meet a demand from clients who are unable to plant their roses in the ordinary planting months, April-August, we have good stuff in pots of practically all of the above tested varieties, which, of course, can be planted in perfect safety at any time. 1/9 each, 18/- per doz.

FERGUSON'S 15/- COLLECTION

OF TWELVE CHOICEST ROSES (Our Selection).

These can be supplied from May to August for. 15/-, post paid.

FERGUSON'S 28/- COLLECTION

OF TWENTY-FIVE CHOICEST ROSES—DWARFS AND CLIMBERS (Our Selection).

These can be supplied from May to August, post or rail paid, for 28/-.

FERGUSON'S 50/- COLLECTION

OF FIFTY-TWO CHOICEST ROSES—DWARFS AND CLIMBERS (Our Selection).

These we can supply from May to August, post or rail paid, for 50/-.

See Rose Heading as to how to prune to get a succession of Summer Blooms in Everblooming Roses.

Ornamental Trees, Shrubs and Flowering Plants

*Hardy in Climates similar to that of Sydney. Those not marked may be regarded as hardy in Australia.

(E) indicates Evergreen; (D) Deciduous.

Abelia. —Rupestris, rose and white flowering shrub, 4ft. (E.)	2/-	Cultriformis (Knife-leaved), bright orange, very attractive, 12ft. (E.)	2/-
Abutilon. —(Boule de Neige), pure white, 5ft. (E.)	1/6	* Dealbata (Silver Wattle), 25ft. (E.)	1/6
Eclipse , common veined purple, 4ft. (E.)	1/6	* Decurrens (Black Wattle), 25ft. (E.)	1/6
Emperor , dark scarlet	1/6	* Elata (Tall or Cedar Wattle), 30ft. (E.). The most showy foliage of the Wattles, leaves up to 18in. long	2/-
Golden Fleece , bright yellow, 4ft. (E.)	1/6	Lophantha , Fern-leaved variety, 10ft. (E.)	2/-
Sawitzki , variegated foliage, 4ft. (E.)	1/6	Podalyraefolia (Queensland Silver Wattle), a very early and choice variety, 15ft. (E.)	1/6
Souvenir de Bonn , variegated foliage, 4ft. (E.)	1/6	Pycnantha (Golden Wattle), 20 ft. (E.)	2/-
Thompsoni , orange, with variegated foliage, 6ft. (E.)	1/6	Spectabilis (Mudgee Wattle), yellow, one of the most showy, 15ft. (E.)	2/-
Vexillarium , variegata, 3ft. (E.)	1/6	Most graceful and beautiful tribe of plants, of rapid growth.	
Most desirable border plants, being of rapid growth; free and continuous blooms, and very hardy.			
* Acacia. —Baileyana, known as the "Cootamundra Wattle," silver-leaved, 20ft. (E.)	1/6		

Acer.—Negundo (Box Elder), 40ft.
(D.) 2/-

Acer.—Negundo Aurea Marginata, golden variegated, beautiful, 30ft. (D.) .. 5/-
Acer.—Argentea Variegata, silver variegated foliage, very showy, 30ft. (D.) 5/-
Trees, 6ft. high and bushy,
7/6 to 10/6 each

Acer.—Platanoides (Norway Maple), 5ft. (D.) 2/6

Acer.—Pseudo Platanus (Sycamore), 50ft. (D.) 2/6

Acer.—Saccharinum (American Sugar or Bird's Eye Maple), 40ft. (D.) 2/6

Acer.—Campestris (English Maple), 60ft. (D.) 2/6

Grand Ornamental Trees, suitable for the cold districts of the State.

We can also supply a number of beautiful Japanese Maple. They are of gorgeous foliage and dwarf habit, and no garden or shrubbery should be without at least a few of these, as the gorgeous red colouring is most striking, growing from 5 to 10 feet. From 5/- to 7/6 each. Our stock comprises the sorts mentioned below, which are the best obtainable in Japan:—

Roseum, variegated white and red.
Rose Marginata, very pretty.
Scolopendrifolium, finely cut.
Filicifolium, cut and dentated leaves.

Atropurpureum, largely purple and palmate leaves.

Reticulatum, Palmata, veined yellow.

Oshju Beni, medium size, red tips.

Osakazuki, nice foliage.

Atropurpureum Dissectum, fine cut, red foliage.

Aesculus.—Hippocastanum, white (Horse Chestnut), 40ft. (D.) 2/6

Rubicunda (Scarlet) Flowering Chestnut, 20ft. (D.) 2/6

A grand Ornamental Flowering Tree; requires a cold climate.

Aloe.—Several varieties (E.) 1/6

Aloesia.—Citriodora (Sweet Verbena), 5ft. (D.) 1/6

A delightful perfume.

Amygdalus.—Persica alba, fl. pl., 10ft. (D.) 2/-

Rosea, fl. pl., 10ft (D.) 2/-

Rubra, fl. pl., 10ft. (D.) 2/-

Striped, 10ft. (D.) 2/-

Clara Meyer, beautiful double

rose 2/-

The beautiful double-flowering peaches in pots, 2/6 each.

Arbutus.—Unedo, white (Strawberry tree), 10ft. (E.) 2/6

Beautiful ornamental shrubs, producing a profusion of pretty white bell flowers; very hardy.

Ardisia.—Crenulata, bearing scarlet berries, 1ft. (E.) 2/6

Very attractive pot plant.

Arduina.—Bispinosa, beautiful small white flowering sweet-scented shrub, 3ft. 2/-

Grandiflora, large white flowers, exquisite, 6ft. (E.) 2/-

Arundo.—Donax Variegata, 10ft. (E.) 1/6

Large handsome variegated-leaved grass; very hardy.

Aucuba.—Japonica (or variegated laurel), in ten varieties, 4ft. (E.) 2/-

Specially large plants from 3/6 to 5/-

Beautiful shrub, with very attractive foliage

Azalea.—(See Special List)

Bambusa (Bamboo Cane).—Arundinacea, 50ft.; one of the strongest, from 5/-

Falcata, beautiful plumed species, 8ft. 2/-

Nigra (Black Bamboo), 20ft. .. 2/6

Fortunei (Dwarf) 1/6

Fortunei Variegata 1/6

Bamboo, or Tree Grasses, thrive well here and are quite indispensable in first-class grounds. They add a distinct and picturesque feature.

***Bauhinea.**—Purpurea, pink, 15ft. (E.) 2/-

Alba (Mountain Ebony), 15ft. (E.) 2/-

Showy flowering plants; require warm situations.

***Benthamia.**—Fragifera (Himalayan Strawberry); flowers large, white; a beautiful evergreen; fruit resembling the Arbutus, 10ft. 2/-

Berberis.—Japonica, yellow, 6ft. (E.) 2/6

Darwini, pretty orange flowers, 3ft. (E.) 2/-

Vulgaris (English Barberry) ..	1/6	Brilliant flowering shrubs, very striking and attractive.
Boronia.—Megastigma, brown, 5ft. (E.)	3/-	Castanea Vesca (Sweet or Spanish Chestnut).—Flowers yellowish, very ornamental, requires rich soil, 50ft. (D.)
Extra large specimen plants, flowering practically all winter, 5/- to	7/6	2/6
Bouvardia.—(See Special List).		Castanospermum.—Australis, 35ft. (E.)
Brachychiton.—Acerfolia. See Sterculia. (Flame Tree, 50ft.) (E.)	2/-	1/6
A grand ornamental tree, with handsome foliage, and producing a blaze of scarlet flowers.		Moreton Bay Chestnut; highly ornamental and very attractive when in flower.
Brassia.—Actinophylla, tall, growing 15ft.; handsome, spreading large foliage	2/6	Casuarina (She or River Oak).—A very handsome native tree with cypress like foliage. Will thrive in very wet position, 50ft. (E.)
Brazilian Glory Pea.—(See Sesbanaea.)		1/6
Browallia.—Jamiesoni, orange, 6ft. (E.)	2/-	Catalpa (Three Varieties).—Deep green foliage and showy flowers, very ornamental, 15 to 20ft. (D.)
Useful Shrub, constantly in bloom.		2/-
Brugmansia.—Knighti, white, 10ft. (E.)	2/-	Cerasus.—Lauro Cerasus, white (English Laurel), 12ft. (E.)
Free growing shrubs, Trumpet shaped flowers, sweet-scented.		1/6
Brunfelsia (Franciscea).—Americana, creamy white, very sweetly scented, 6ft. (E.)	2/6	Lusitanica, white (Portugal Laurel), 15ft. (E.)
Uniflora, flowers blue and white at same time, 6ft. (E.)	2/6	2/-
Buddleia.—Globosa, yellow, 10ft. (E.)	1/6	Pseudo Cerasus (double flowering Cherries), in six varieties (D.) from
Veitchiana, lilac, 12ft. (E.) ..	1/6	3/-
Variabilis Purpurea, dark lilac, 10ft. (E.)	1/6	Beautiful ornamental shrubs of rapid growth.
Rapid growing plants, suitable for covering unsightly objects.		Ceratopetalum.—Gummiferum pink, 40ft. (E.)
Buxus.—Arborea (Tree Box), very ornamental, can be trimmed into any shape. 5ft. (E.) ..	1/6	2/- and 2/6
Callistemon.—Lanceolatus, scarlet, 6ft. (E.)	1/6	Limited supplies of large plants in benzine tins, these have already flowered, 10/6 to 21/-.
A brilliant flowering shrub, likes moisture.		
Calodendron. — Capense (Cape Chestnut), 30ft. (E.)	2/6	The well-known and beautiful Christmas Tree of Australia.
Flesh coloured flowers; lovely tree.		Ceratonia.—Siliquea (Carob or Locust Tree), 15ft. (E.)
Camellia.—(See Special List).		2/-
Camphora.—Officinalis (Camphor), 5ft. (E.)	1/6 each	Cestrum.—Aurantiacum, orange, 8ft. (E.)
Splendid ornamental trees; the Camphor of commerce.		2/-
Cantua. — Buxifolia (dependens), rose, 4ft. (E.)	2/-	Diurnum, white, 16ft. (E.) ..
Very beautiful flowering shrubs.		2/-
Cassia.—Candolleana, yellow, 12ft. (E.)	2/-	Nocturnum, white 12ft. (E.) ..
Bracteata, yellow, beautiful foliage, 8ft. (E.)	2/6	2/-
		Profuse flowering shrubs. Nocturnum has a very powerful perfume at night.
		Chilianthus.—Disophyllus, 6ft. (E.) ..
		1/6
		A useful hardy shrub, of quick growth
		Choisya. — Ternata (Mexican Orange Flower), white, 5ft. (E.)
		2/-
		A neat little border shrub, perfumed.
		Chorozema.—Cordata, orange and red, 3ft. (E.)
		2/-
		A beautiful flowering shrub suitable for a dry, sunny and well-drained position.
		Christia Grandiflora.—A showy evergreen with red and yellow blossom, 5ft. (E.)
		2/-
		Christmas Bush.—(See Ceratopetalum).

CHAMAELAUCIUM UNCINATUM

(The Geraldton Wax Plant).—A distinct evergreen Winter-flowering shrub, 4 to 6 feet. Attractive waxy-Myrtle-like flowers, which last when cut for weeks. The plant continues to flower throughout the Winter months and well into spring. Cut back after flowering. In colours, White, Pink and Red. We strongly recommend this, 3/6 each.

Citharexylum. — *Quadrangulaire* fiddle wood), 15ft. (E.) 2/—
A very hardy dwarf tree, of rapid growth.

Clethra.—*Arborea* (Lily of the Valley Tree), 10ft. (E.) 2/6

Clanthus Puniceus (Pink and white).—Very beautiful, 6ft. (E.) 2/—

Coprosma.—*Baueriana* variegata, 6ft. (E.) 2/—
Picturata, handsome shrubs, very hardy, 6ft. (E.) 2/—
Lucida, 6ft. (E.) 1/6

Green, glossy leaves make a fine hedge near coast; also in hot, dry climates.

Corynocarpus.—*Laevigatus* (N.Z. Karaka), 15ft. (E.) 1/6
A most attractive hardy shrub, with beautiful glossy green foliage.

Crataegus. — *Oxyantha*, double white, 12ft. (D.) 2/6

Oxyantha, double red, 12ft. (D.) 2/6

Oxyantha, double pink, 12ft. (D.) 2/6

The double flowering Hawthorns are most attractive shrubs

Carrieri, large scarlet fruit, 8ft. (D.) 2/6

Pyracantha, white (evergreen thorn), 4ft. (E.) 2/—

Spathulata, large scarlet fruit, 15ft. (D.) 2/6

Crenulata (Fire Thorn), 8ft. (E.) 1/6

Bears a profusion of red berries; very decorative.

Crotalaria Trifoliatum (Yellow).
—Very pretty pea-like flowers, 10ft. (E.) 2/6

Cuphea.—*Jorulensis*, orange red and yellow, 4ft. (E.) 1/6

Platycentra (Cigar Plant), 1ft. (E.) 1/6

Pretty border plants, very free bloomers.

Cydonia.—*Japonica*, red, 3ft. (D.), 2/—
Alba, white, 5ft. (D.) 2/—

These are lovely Japanese flowering Quinces; also called *Pyrus Japonica*.

Cyphomandra.—*Betacea* (the Tree Tomato), an ornamental tree, bearing edible fruit, 8ft. (E.) 1/6

Cyperus.—Pink flowering. (See *Tamarix*).

Cytisus.—*Laburnum* (English Golden Chain), 8ft. (D.) 2/—

Daphne.—Red, 3ft. (E.) from .. 3/6
Alba, white, 3ft., from 3/6

Highly perfumed, favourite border plants.

We also have a fine stock of imported *Daphne* specimens up to 3ft., bushy, and can supply, including the variegated, at 10/6 each.

Deutzia.—*Crenata*, fl. pl., white, 6ft. (D.) 1/6

Crenata Candidissima 2/—

Gracilis, white, 1½ft. (D.) 1/6

Lemoinei, lovely white, 4ft. (D.) 1/6

Pride of Rochester, double white, 4ft. (D.) 1/6

Scabra, white, 4ft (D.) 1/6

Vilmorinae; new, snow - white, large, 4ft. (D.) 1/6

Fine, hardy dwarf flowering shrubs.

Diervillea (*Weigelia*), *Coquette*, deep rose, 6ft. (D.) 1/6

Alba, white, 6ft. (D.) 1/6

Eve Rathke, crimson, red, 6ft. (D.) 1/6

Rosea, rose, 5ft. (D) 1/6

Variegata, flesh, 5ft. (D.) 1/6

Old English favourites; brilliant and profuse bloomers, and hardy.

Diosma.—*Ericoides*, white, 3ft. (D.) 1/6
A sweetly perfumed and beautiful shrub. Very hardy.

Diplacus.—*Glutinosus*, orange, 2ft. (E.) 2/—

A useful plant, being nearly always in flower.

Diplopappus.—*Fruticans* (lilac), 1½ ft. (E.) 2/—

An extremely showy little border plant.

Dombeya.—*Mastersi*, white, 8ft. (E.) 2/—

Dregiana, white, 10ft. (E.) .. 2/—

Splendid shrubs, suitable for large borders; very hardy.

Doryanthes. — *Excelesia* (Gigantic Lily), 12ft. 2/6

Palmeri, 15ft. 2/6

Handsome native shrub, scarlet.

Double-flowering Cherry. — (See *Cerasus*.)

Double-flowering Peach.—(See *Amygdalus*.)

Double-flowering Quince.—(See Cydonia.)

Dracaena.—Australis, 10ft. (E.) .. 2/-
 Drago (Dragon's Blood), 10ft. (E.) 2/-
 Fragrans, 5ft. (E.) 2/-
 Stricta, 12ft. (E.) 2/-
 Beautiful palm-like trees, very hardy and valuable for effect in large plantations.

Duranta.—Plumieri, blue, 8ft. (E.) 1/6
 Alba, white, 6ft. (E.) 1/6
 Aurea Variegata, blue, 6ft. (E.) 1/6
 See hedge plants for quantity lots.

Edwardsia.—Microphylla (Kowhai), yellow, 12ft. (E.) 2/-
 Good hardy shrubs, suitable for hedges. Pretty fern-like foliage.

Elaeagnus.—Variegatus, 10ft. (E.) 2/-
 A hardy shrub, with handsome variegated foliage.

Erythrina.—(Coral Tree),
 Caffra.—Red, 20ft. (D.) 1/6
 Cristagalli, scarlet, 10ft. (D.) 1/6
 Gorgeous flowering plants.

Cristagalli makes a most beautiful half tree with most gorgeous blooms. Try one or two of these.

Escallonia.—Macrantha, red, 3ft. (E.) 1/6
 Montavidiensis, white, 12ft. (E.) 2/-
 Rubra, red, 3ft. (E.) 1/6
 Fast-growing, showy flowering shrubs, very hardy.

Eucalyptus.—Botryoides, 50ft. (E.) 1/6
 See special offer for quantity lots.
 Calophylla, Rosea, 30ft. (E.) .. 2/-
 Citrodora, lemon-scented, 50ft. (E.) 1/6
 Corynocalyx (Sugar Gum), 50ft. (E.) 1/6
 See special offer for quantity lots.
 Ficifolia, crimson, 10 ft. (E.) .. 2/6
 Globulus (Blue Gum), 100ft. (E.) 1/6

Most desirable trees for large plantations. The leaves of Citrodora have a delightfully refreshing perfume. Ficifolia is a gorgeous flowering shrub, and Globulus purifies the atmosphere by absorbing noxious gases.

Eugenia.—Myrtifolia (Brazil Cherry), 10ft. (E.) 1/6
 Smithi (Lili-pili), 20ft. (E.) 1/6
 Pendula, drooping, 15ft. (E.) .. 2/-
 Ventenati, Weeping Myrtle, 20ft. (E.) 2/-

Jambosa (Roseapple), 12ft. (E.) 1/6
 Leuhmanni, 10ft. (E.) 2/6
 Bright shiny foliage, young tips pink to purple. Splendid for hedges.

Euonymus.—Albus variegatus, 6ft (E.) 1/6
 Aurea Variegata, 6ft. (E.) 2/-
 Japonica Spinulosa, 8ft. (E.) ... 1/6
 Handsome, hardy shrubs, with fine foliage.

Euphorbia.—Splendens, scarlet, 3ft. (E.) 2/-
 Suitable for pot culture or open border, being very hardy.

Eupomatia.—Laurina, white flowers and large shining leaves, 12ft. (E.) 2/-

Exochorda—Grandiflora, (Pearl Bush), 6ft. (D.) 1/6

Fagus (Beech).—Sylvatica, 60ft. 3/6
 Sylvatica Purpurea, 50ft., purple leaved 5/- to 7/6
 Beautiful deciduous trees; leaves cover the tree with dense foliage in the spring and summer; only suitable for cold climates.

Ficus.—Australis (Port Jackson Fig), 60ft. (E.) 1/6
 Benjaminii (The Weeping Fig), 40ft. (E.) 3/6
 Macrophylla (Moreton Bay Fig), 100ft. (E.) 2/-
 Nitida, beautiful variety, suitable for street planting, 40ft. (E.) 2/6
 Remarkable for their magnificent foliage. Useful for shade trees.

Forsythia.—Veridissima Aurea, 5ft. (D.), yellow, showy flowering, shrub 2/-

Fraxinus.—Excelsior (English Ash), 50ft. (D.) 2/-
 Ornus (American Ash), 40ft. (D.) 2/-

Gardenia.—Globosa, white, 12ft. (E.) 1/6
 Magnifica, double, white, 4ft. (E.) 1/6

Most beautiful and attractive flowering shrubs, with attractive foliage and strong scented blooms

Genista.—Andreana, red and yellow, 6ft. (E.) 2/-

Gold fussia.—Anisophylla, lilac, 3ft. (E.) 2/-

Geraldton Wax Plant.—(See Chamaelauceum).

Gynerium (Pampas Grass), white, 6ft. (E.) 1/6
 Roseum, pink, 6ft. (E.) 1/6

Graptophyllum.—Earlii, crimson, 6ft. (E.) 1/6

Grevillea.—Robusta, orange, 50ft.
(E.) 2/-
See special offer for quantity lots.
A magnificent tree with beautiful fern-like leaves; the Silky Oak of Queensland.
Habrothamnus.—Elegans, carmine,
4ft. (E.) 2/-
Beautiful hardy border plants, nearly always in flower.
Heliotropium.—Aureum, blue, 2ft.
(E.) 1/6
La Petite Negresse, dark blue,
3ft. (E.) 1/6
President Garfield, mauve, 3ft.
(E.) 1/6
The perfume of the Heliotrope cannot well be surpassed; rarely out of flower.
Hibiscus.—
Camdeni, crimson, 8ft. (E.) .. 1/6
Conqueror, buff yellow, crimson base, 6ft. (E.) 2/-
Fuchsioides, curious and drooping blooms, 6ft. (E.) 2/-
General Courteses, crimson, 6ft 1/6
Harwood, beautiful pink, 6ft. (E.) 1/6
Honolulu White, creamy white, with red centre, very pretty, 4ft. (E.) 2/-
Indica, a striking and distinct colour, which is best described as rosy apricot; strong grower and free flowering, 6ft. (E.) 2/-
Island Queen, deep pink, magnificent colour and blooms, 6ft. (E.) 2/-
Island Empress, rich pink, double 6ft. (E.) 2/-
Lamberti, double crimson, 6ft. (E.) 2/-
Mutabilis (Chinese Rose), double pink, 8ft. (D.) 1/6
Mutabilis (Chinese Rose), double white (D.) 2/-
Madeline Campion, very pretty, light, buff, orange colour, 6ft. (E.) 2/-
Peachblow, deep salmon pink, semi-double; free blooming, 6ft. (E.) 2/-
Rose Scott, light red, with almost white centre, good growth and habits, 6ft. (E.) 2/-
Syriacus, 10 varieties, 6ft. (D.) 1/6
Tango Queen, a beautiful Tango shade, quite distinct, 8ft. (E.) 2/-
Hibiscus are really indispensable in flower garden or shrubbery. They require little attention, grow well in any soil, with or without shelter. Produce almost throughout the year a lovely mass of large flowers.

STERLING NOVELTY.

Hibiscus Wrighti.—This is without doubt the most notorious novelty in this beautiful class of plants we have seen for many years.

Unlike many of the late introductions, it is of robust growth and very hardy, which, together with its free flowering, makes it of outstanding merit.

Being evergreen with luxurious foliage, and its pure white blooms (as large and same shape as Harwoodi), it will soon be one of the most sought-after. Stock limited. 6ft. (E.) Strong plants, 5/- each.

Hydrangea.—

America.—A new variety of great merit, having very large blooms of intense blood red colour. 2/6.

Domatoi.—Superior variety, with very large double flowers of pale rose colour, keeps long and very floriferous. 2/6.

Ajisai, rosy blue to light blue, with a double row of petals forming, like a miniature crest, 4ft. (D.) 1/6
Avalanche, pure white, large and immense trusses, 4ft. (D.) .. 1/6
Cyanoclada, black stemmed, very floriferous, dark blue, 4ft. (D.) 1/6
Dentelle, deeply fimbriated, creamy white to soft pink, 4ft. (D.) 1/6
Hortensis, light blue, single, 6ft (D.) 1/6
Hortensis, Variegata, 3ft. (D) .. 1/6
Innocence, large-flowered, creamy white, very fine, 3ft. (D.) ... 1/6
La Lorraine, soft pink, turning into a darker shade, large, 3ft. (D.) 1/6
Madame Mouilliere, flowers 4in. round and regularly dentated, pure white, with carmine pink eyes, free, 3ft. (D.) 1/6
Mademoiselle Renee G'Aillard, free-flowering, large pink eyes, with milk-white border, 3ft. (D.) 1/6

Hydrangeas.—

- Mariessi, bears enormous trusses of a bluish tint, 3ft. (D.) .. 1/6
 Ornament, rosy purple, a new colour, 3ft. (D.) 1/6
 Otaska, pink, 6ft. (D.) 1/6
 Paniculata Grandiflora (The Plumed Hydrangea), 4ft. (D.) 2/-
 Radiant, carmine rose, the darkest Hydrangea extant, 3ft. (D.) 1/6
 Stellata Fimbriata, white, 4ft. (D.) 1/6
 Thomas Hogg, white, 4ft. (D.) 1/6

Hymenospermum.—Flavum, hardy evergreen, beautiful foliage, fragrant, yellow flowers, 20ft. 2/-

Hypercium.—Moserianum yellow, 2ft. (E.) 2/-
 Tricolour Variegata, yellow, 2ft. (E.) 2/-
 Very hardy, showy dwarf flowering shrubs.

Ilex.—Aquifolium (English Holly), 20ft. (E.) 2/-
 Cornuta (Chinese Holly), 10ft. (E.) 2/-
 Golden or Silver, variegated, 10ft. (E.) 3/6
 Very attractive foliage, and hardy in the coldest districts.

Inga.—Pulcherrima, scarlet, 10ft. (E.) 2/-
 Alba, white, 15ft. (E.) 2/-
 One of the most gorgeous flowering shrubs, with beautiful foliage.

Iochroma.—Tubulosa, blue, 9ft. (E.) 2/-
 Grandiflora, lilac, 6ft. (E.) 2/-
 Fuchsiodes, red, 8ft. (E.) 2/-
 W. V. Seymour, true purple, lovely colour, 8ft. (E.) 2/-
 Quick-growing, handsome shrubs.

Jacaranda.—Mimosaefolia, blue, 30ft. (D.) 1/6
 A gorgeous flowering half-tree, with graceful fern-like foliage.

Jasminum.—Fruticans (Yellow Jasmine), 8ft. (E.) 2/-
 Others, see Climbers.

Grand old favourites, producing a profusion of flowers.

Justicia.—Carnea, flesh, 2ft. (E.) . 2/-
 Adhatoda, white, 5ft. (E.) 2/-
 Pretty little border shrubs.

Kerria.—Japonica, fl. pl. yellow, 4ft. (D.) 2/-

Lagerstroemia.—Alba, white, 10ft. (D.) 3/6
 Eaveslii, heliotrope, 8ft. (D.) .. 2/-
 Indica, red, 10ft. (D.) 2/-
 Ovalifolia, pink, 10ft. (D.) 2/-
 Gorgeous flowering shrubs of rapid growth. Require hard pruning during Winter months.

Lagunaria.—Patersoni, pink, 25ft. (E.) 2/-
 Suitable for situations exposed to the sea.

Lantana.—

Chelsea Gem, orange and red, 4ft. (E.) 1/6
 Drape d'Or, yellow, 4ft. (E.) .. 1/6
 Souv. de l'Exposition, white, 4ft. (E.) 1/6
 Sellowiana Mauve (trailing), (4ft.) (E.) 1/6
 Splendid flowering shrubs, and thrive anywhere.

Lasiandra.—Grandiflora, blue, 6ft. (E.) 3/6
 Macrantha, purple, 8ft. (E.) .. 2/-
 Rosea, pink, 4ft. (E.) 2/-
 Edwardsi, a sport from Grandiflora, beautiful large, blue flowers, strong grower (New), 8ft. (E.) 2/-
 Edwardsi Robusta, a sterling novelty, growth as Edwardsi, and as large blooms as grandiflora, 8ft. (E.) 3/-
 Constant, profuse, and beautiful flowering shrubs.

Laurus.—Nobilis (Sweet Bay), 30ft. (E.) 1/6
 A splendid, hardy tree, with leaves highly perfumed.

Lavendula.—Spica (English Lavender), 1ft. (E.) 1/6
 Staechas (French Lavender), 3ft. (E.) 1/6
 Sweet-perfumed old favourites

Libonia.—Florabunda, orange and red, attractive border plant, 3ft. (E.) 2/-

Ligustrum.—Sinensis, white, free flowering, 15ft. (E.) 1/6
 Japonicum, white, 12ft (E.) .. 1/6
 Lucidum, white, 20ft. (E.) 1/6
 Lucidum, variegatum, 8ft. (E.) 2/6
 Ovalifolium Aureum, a new variety of variegated Privet, specially adapted for single specimens and hedges; the small leaves have a broad, golden margin; hardy in any climate; 6ft. (E.) 1/6
 Handsome ornamental shrubs, hardy and attractive foliage.

Linum.—Trigynum, yellow, 2ft. (E.) 1/6

Liquidambar.—Styraciflua, yellow, 20ft. (D.) 1/6
 Lovely tree, with bright-coloured leaves in autumn.

- Liriodendron.**—*Tulipiferum* (Tulip Tree), 60ft. (D.) 3/-
A noble tree, with splendid foliage and handsome flowers; likes a cold climate.
- Lonicera.**—*Fragrantissima*, white shrubby Honeysuckle, 6ft. (E.) 1/6
- Lophostemon.**—(See *Tristania*).
- Mackaya.**—*Bella*, lilac, nice foliage and lovely flowers, 3ft. (E.) 1/6
- Macadamia.**—*Ternifolia* (Queensland Nut), white, 20ft. (E.) 1/6
A splendid, hardy ornamental tree, with holly-like foliage, producing edible nuts in profusion.
- Magnolia.**—*Anonaefolia* (Port wine), 10ft. (E.) 3/-
Grandiflora, white, 30ft. (E.) 2/-
Purpurea, purple, 15ft. (D.) .. 3/6

WE HAVE SPECIALLY IMPORTED FROM JAPAN THE FOLLOWING SIX VARIETIES, WHICH ARE THE BEST SORTS IN THAT COUNTRY. WITH THE EXCEPTION OF PUMILA THEY ARE ALL DECIDUOUS, AND THE LARGE AND MANY-COLOURED FLOWERS IN THE SPRING ARE BEYOND DESCRIPTION. THEY FLOWER PRACTICALLY RIGHT THROUGH THE SUMMER ALSO. A DISTINCT ACQUISITION AND WE SPECIALLY RECOMMEND ALL OUR FRIENDS TO TRY SOME. HARDY ANYWHERE.

- Conspicua*, purple and white, 20ft. (D.) 5/-

- The Set of Six for 30/-, or 33/- post paid.

Grand ornamental shrubs, profuse bloomers and fine foliage. *Grandiflora* about the noblest flowering tree known, large and beautifully perfumed flowers.

Malus (The Crab Apple), single and double flowering, in variety, 15ft. (D.) 2/6

These are, without doubt, a decided acquisition. Covered with beautiful pink and white blossoms, in the spring-time, and in due seasons there appears on the trees a profusion of small apples, about the size of a cherry, which can be used for preserving purposes.

Maples.—(See *Acer*).

Melaleuca *Hypericifolia* (Scarlet Ti-tree), 5ft. (E.) 2/6

Melia.—*Azedarach*, lilac (White Cedar), 40ft. (D.) 1/6

A most rapid growing and profuse flowering tree; very hardy; useful for new plantations.

Metrosideros *Tomentosa* (N.Z. Christmas Bush), blood red flowers, 20ft. (E.) 2/-

Murraya.—*Exotica*, white, 8ft. (E.) 2/-
Compact shrub, flowers of exquisite fragrance.

Myrtus.—*Communis*, white (Myrtle), 6ft. (E.) 2/6

The perfume of the Myrtle is simply delightful.

Nandina.—*Domestica*, crimson, 5ft. (E.) 2/-
A graceful flowering shrub.

Nerium (*Oleander*).—*Alba*, single white, 10ft. (E.) 2/-

Delphine, rich crimson, single, 6ft. (E.) 2/-

Dr. Golfin, deep rosy red, single, 6ft. (E.) 2/-

Luteum plenum, semi-double, creamy yellow, 6ft. (E.) 2/-

Madam Martin, single salmon, 6ft. (E.) 2/-

Madonna, grandiflora, very large, semi-double, white, 6ft. (E.) 2/-

Monsieur Belaquier, single, pink, 6ft. (E.) 2/-

Mrs. F. Roeding, double, salmon, very pretty and distinct, 6ft. . 2/-

Professor Martin, 6ft. (E.) 2/-

Souv. de Cazalis, rich, dark crimson, single, 6ft. (E.) 2/-

Splendens, very large double pink, 10ft. (E.) 2/-

Splendens, variegata, single pink blooms, golden variegated foliage, very pretty, 6ft. (E.) .. 3/6

Fine, hardy flowering shrubs; can hardly be misplaced.

OCHNA.—*Multiflora*, yellow and green, 4ft. (E.) 1/6

A very interesting plant, producing fragrant flowers followed by berries, black and scarlet.

- Osmanthus** (fragrant).—Clean ever green shrub with deliciously scented flowers, 8ft. (E.) ... 2/-
- Illicifolia**.—Hardy shrub with Holly-like leaves, pretty, 10ft. (E.) ... 2/-
- Pepper Tree**.—(See *Schinus*.)
- Philadelphus**.—*Grandiflorus*, white, 6ft. (D.) ... 1/6
- Mexicanus*, white, 4ft. (D.) ... 1/6
- Very hardy and useful shrubs, producing a profusion of pure white perfumed flowers.
- Phormium**.—*Tenax* (New Zealand Flax), 5ft. (E.) ... 1/6
- Tenax Variegatum*, 7ft. (E.) ... 2/6
- Useful for ties, as well as ornamental; very hardy.
- Photinia**.—*Serrulata*, white, 10ft. (E.) ... 2/-
- A splendid free-flowering shrub for any climate.
- Pittosporum**.—*Eugenoides*, brown, 15ft. (E.) ... 1/6
- Crassaefolium*, glossy green foliage, not subject to borer, 15ft (E.) ... 1/6
- Eugenoides, variegatum*, 15ft. (E.) ... 3/6
- Nigrescens*, dark brown, 10ft. (E.) ... 1/6
- Undulatum*, cream, 20ft. (E.) ... 1/6
- See Hedge Plants for quantity lots.
- Hardy ornamental shrubs, of great beauty; useful for hedges as well as for general planting.
- Platanus**.—*Orientalis* (Plane Tree), 50ft. (D.), from 2/-
- A noble, quick-growing tree, with fine foliage; will grow in any climate.
- Specially large plants up to 12 feet at corresponding rate.
- Plumbago**.—*Capensis*, blue, 5ft (E.) ... 1/6
- Capensis Alba*, white, 5ft. (E.) ... 1/6
- Profuse-flowering, hardy shrubs.
- Plumeria**.—*Acutifolia* (*Frangipanni*), very sweet scented, white, 8ft. (D.) ... 3/6
- Acutifolia*, pink (New), 8ft. (D.) ... 5/-
- Poinciana** *Gilliesi*, yellow (Bird Paradise Tree), 6ft. (D.) ... 3/6
- Beautiful free-flowering shrub.
- Poinsettia**.—*Pulcherrima*, scarlet, 8ft. (D.) ... 2/-
- Showy autumn-flowering shrub.
- Populus**.—*Argentea* (Silver Poplar), 40ft. (D.) ... 1/6
- Balsamea* (Balsam Poplar), very handsome and very large leaves; one of the very best ornamental trees extant, 30ft. (D.) ... 1/6

PLATANUS ORIENTALIS (ORIENTAL PLANE) MAKES A STRIKING AVENUE.

We shall be pleased if our clients will forward the names of any of their friends to whom a copy of this Catalogue may be useful.

F. FERGUSON & SON,

Postal Address: Hurstville.

Hurstville and Camden, N.S.W.

ALWAYS PRUNE TREES WHEN PLANTING

Hardy Climbing Plants

Hardy climbers are highly desirable, their graceful habit and varied blooms adding much to the general effect of a plantation. They can be trained at will, and employed as screens for shutting out unsightly objects, covering old walls, fences, stumps, etc.

(E) Indicates Evergreen; (D) Deciduous.

Akebia Quinata, strong grower, heliotrope flowers, 20ft. (E.) 2/-

Ampelopsis.—*Hederacea* (Virginian Creeper), 20ft. (D.) 1/6

Henryana, dark velvety leaves, veined silvery white (new), 20ft. (D.) 2/-

Veitchii, 20ft. (D.) 1/6

Veitchii Purpurea, foliage beautifully tinted red, 20ft. (D.) ... 1/6

Hardy foliage plants, most attractive in autumn, when the leaves assume a brilliant crimson colour; they cling to almost anything.

Antignou.—*Leptopus*, rose, 50ft. (D.) 2/6
Beautiful cluster of flowers.

Aristolochia.—*Elegans*, purple and white, 12ft. (E.) 2/-
(Dutchman's Pipe). Attractive pitcher-like flowers.

Asparagus.—*Sprengeri*, 4ft. (E.) from 1/6
Plumosus, 8ft. (E.) from 1/6
Tenuissimus, 6ft. (E.) from 1/6
Climbing asparagus ferns.

Beaumontia.—*Grandiflora*, white, 20ft. (E.) 2/6

A magnificent flowering climber, producing large white trumpet-shaped flowers, highly perfumed.

Bignonia.—*Australis* (Wonga Wonga Vine), 30ft. (E.) 1/6

Capreolata, orange and red, 20ft. (D.) 2/-

Cherere, large scarlet, 20ft. (D.) 2/-

Excelsa, cream, 20ft. (D.) 1/6

Florabunda, lavender, 15ft. (E.) 2/-

Grandiflora, orange, 8ft. (D.) .. 2/-

Jasminoides, flesh, 20ft. (E.) .. 2/-

Lindleyana, lilac, 15ft. (E.) 1/6

Rosea (Mackeni), light, rose, 20ft. (E.) 2/-

Tweediana, yellow, 20ft. (D.) .. 1/6

Venusta, orange, 20ft. (D.) 2/-

Splendid, free-flowering, hardy climbers, well worthy of cultivation.

Bougainvillea.—*Braziliense*, rose, 20ft. (E.) 2/6

Glabra, mauve, 16ft. (E.) 2/-

Glabra Sanderiana, violet, 16ft. (E.) 2/-

Glabra Sanderiana Variegata, a magnificent variety, introduced from England, with bright white and green foliage; this is the best variegated *Bougainvillea* we have, 10ft. (E.) 3/6

Grandiflora, magenta, 15ft. (E.) 2/6

Lateritia, brick red, 20ft. (E.) .. 5/-

Magnifica Traili, bright purple, splendid, 20ft. (E.) 2/6

Thomasii, bright pink 5/-

Nothing can surpass the grandeur and brilliancy of these truly magnificent climbers.

Clematis.—Of these grand favourites we have landed a choice collection of 10 varieties as under. These embrace the best and most popular sorts in commerce. Price, 5/- each.

Comtesse de Bouchand, purple, mauve.

Crimson King, bright red.

Jackmanni, violet.

Jackmanni Alba, pure white.

Jackmanni Superba, dark velvety violet.

M. Baron de Veillard, pink.

M. Edward Andre, dark red.

Perle d'Azur, sky blue.

Star of India, dark blue.

Nellie Moser, mauve.

The set of ten for 48/-,
post or freight paid.

- Cobaea.**—Scandens, purple, 20ft.
(E.) 1/6
Scandens alba, white, 20ft. (E.) 1/6
Quick growing; large handsome flowers.
- Dolichos.**—Lignosus, pink, 25ft.
(E.) 1/6
Lignosus alba, white, 25ft. (E.) 1/6
Very fast growing; good for covering unsightly objects.
- Ficus.**—Stipulata (Climbing Fig), 25ft. (E.) 1/6
Minima (Climbing Fig), 15ft. (E.) 1/6

Latifolia, pink, 6ft. (E.) 1/6
Latifolia, red, 6ft. (E.) 1/6
Pubescens, blue, 6ft. (E.) 1/6
The lovely everlasting Sweet Peas, very hardy and free-flowering.
- Lonicera** (Honeysuckle).—Aurea reticulata, white, 10ft. (E.) .. 1/6
Brachypoda, yellow; very fragrant; 15ft. (E.) 1/6
Caprifolium (English), 8ft. (E.) 2/-
Gigantea, flower buttercup yellow, quick grower, 12ft. (E.) 2/6
- Halliana; the best white, 15ft.
(E.) 1/6
Japonica, yellow, 15ft. (E.) 1/6
Tartarica, splendens, scarlet, 15ft. (E.) 2/6
Grand, hardy, fragrant climbers, of rapid growth.
- Manettia.**—Bicolour, 6ft. (E.) 2/-
Glabra, 10ft. (E.) 2/-
A brilliant and beautiful dwarf climber.
- Mandevillea.**—Sauveolens. White, 25ft. (D.) 1/6
A grand free-flowering climber; beautiful.
- Passiflora.** — (Passion Flower),
Coerulea, blue and white 2/-
Constance Elliott, pure white ... 2/-
Edulis (edible Passion Fruit) .. -/9
-
- New Passion.**—*Passiflora laurifolia*, which has been introduced by Sir Joseph Carruthers, who pronounces it as the best fruit of its kind. Strong plants from pots. Limited quantities, 2/6 each.
-
- Phaseolus.**—Caracalla (Snail Flower), lavender, 20ft. (E.) 2/-
One of the finest climbers, producing a profusion of blooms of curious, snail-like form.
- Quisqualis.**—Indica, red, 20ft. (E.) 2/6
A neat and graceful plant.
- Rhynchospermum.** — Jasminoides, white, 15ft. (E.) 2/-
Variegata (E.) 2/-
Exceedingly pretty and fragrant flowers.
- Solanum.**—Jasminoides, Grandiflora, white, 20ft. (E.) 2/-
Jasminoides variegata, pretty white and green variegated foliage, 15ft. (E.) 2/-
Seaforthianum, 15ft. (D.) 2/-
Wendlandi, 20ft. (D.) 1/6
Attractive shade of lavender blue; strikingly beautiful.
- Stephanotis.** — Floribunda, white, 10ft. (E.) 3/6
A beautiful perfumed climber.
- Stigmaphyllon.**—Ciliatum, yellow, 20ft. (E.) 2/-
Beautiful flowers and quick grower.
- Tacsonia.**—Exoniensis, rose pink, 15ft. (E.) 2/-
Ignea, scarlet, 20ft. (E.) 2/-
Mollissima, crimson (white passion fruit), 20ft. (E.) 1/6
Smythiana, orange, 18ft. (E.) .. 2/-

Van Volxemi, crimson, 20ft. (E.) 2/-
 Cannot be surpassed as quick-growing
 climbers, with very handsome flowers
 (like passion flowers), with very brilliant
 colours.

Thunbergia Grandiflora.—Blue, 18ft.
 (E.) 2/6

Thunbergia Gibsoni.—A most attrac-
 tive climber, being in bloom for
 fully 11 months out of the year—
 a brilliant orange colour and most
 suitable for light Pergola or climb-
 ing position. It likes the sun, 8ft.
 (E.) 2/6

Vinca.—Major, variegated (Peri-
 winkle), blue, 6ft. (E.) 1/6

Free-flowering old English favourite
 trailer.

Wistaria.—Magnifica, lavender,
 20ft. (D.) 2/-
 Sinensis, lilac, 20ft. (D.) 1/6
 Sinensis, Alba, white, 20ft. (D.) 2/-
 Sinensis, fl. pl., double blue, 20ft.
 (D.) 2/-
 Multijuga, dark purple, 20ft.
 (D.) 2/-
 Multijuga, Alba, white, 20ft.
 (D.) 2/6
 Multijuga Rosea, very distinct;
 plant vigorous and floriferous;
 - lower petals yellow in centre,
 20ft. (D.) 2/-

Wistarias (specially large), in tins;
 5/- to 7/6 each.

Gorgeous and profuse flowers; very
 strong growers, and hardy.

AZALEAS

These most attractive evergreen spring flowering shrubs are very suitable for
 borders or groups. Price from 2/- each; 22/- dozen (except where otherwise
 priced).

D denotes Double. S denotes Single.

Alba Magna.—Large white, occasionally
 striped. S.

Bernard Andreas Alba.—White, S.D.
 2/6.

Charmer.—Bright amaranth; good form.
 S.

Charles de Buck.—Magenta. S.

Comtesse de Flanders.—Large, satin rose.
 S. 2/6.

Dame Melanie.—Bright rose, edged with
 pure white; carmine blotch. S. 2/6.

Daphne.—Pure white. D. 2/6.

Deutsche Perle.—This is without doubt
 the best double white Azalea, being
 very free flowering, early blooming, and
 well adapted for forcing purposes. D.
 2/6.

Duc de Nassau.—S.D., white.

Empress of India.—Flowers perfect. The
 segments which occupy the centre are
 carmine, white, and salmony rose. D.
 2/6.

General Bridges.—Pink. D. 2/6.

Eugene Mazel.—Bright red, shaded lilac.
 S. 2/6.

Indica Alba.—Pure white. S.

Konigin Cleopatra (S.).—White splashed
 rosy carmine. 2/6.

La Victoire.—Salmon rose, very pretty.

Louis de Kerchove.—S.D., salmon,
 edged white. 2/6

Madame Adolphe de Haene.—Pink bor-
 dered white, large and showy. S. 2/6.

Madam Iris Lefebvre.—Dark orange red.
 D. 2/6.

Md. N. Verschaffelt.—Single, white,
 large 2/6

Niobe.—White. D. 2/6.

Phoebus.—Vermilion orange. S. 2/6.

Roi de Holland.—Bright red. S.

Simon Mardner.—Rose. D. 2/6.

Splendens.—Fine rosy salmon. S.

Stella.—Orange scarlet. S.

Bush House, Verandah, Herbaceous and Pot Plants

So many lovers of plants have no opportunity of indulging in their hobby, except in a verandah garden, that we add a short list of plants, which can be successfully cultivated in pots or boxes in this way. They will all thrive, providing the ends of the verandahs are closed in to prevent sharp currents of air blowing on them. In cold districts a screen round will prevent frosts from injuring them.

STRONG PLANTS FOR THE PRICES MENTIONED

Anemones.—These beautiful plants, practically always in flower, we can supply in twelve varieties at 1/6 each. Specially imported as being the very best most improved sorts in Europe.

Anthericum.—Pretty foliage, from 1/6

Asparagus.—Very handsome pot plants, from 1/6

Aspidistra.—Very hardy; handsome foliage, from 2/6

Azalea.—Very showy verandah plants, free bloomers, from 2/-

Begonia Rex.—Ornamental foliage, beautifully marked 1/6

BEGONIA (Tuberous Rooted).

We have just landed a nice lot of tubers of a strain that has carried off all the prizes in Europe of any note for many years, and can supply in dry tubers, also growing in pots, the following separate colours: Salmon red, yellow, copper, dark red, orange, rose, white, both in singles and doubles.

Single varieties, 1/6 each, 15/- doz.
Double varieties, 2/- each, 22/- doz.

These make beautiful pot plants of particularly easy culture, and should be widely grown.

We will supply one each of the eight colours, both singles and doubles (sixteen in all) for 21/-, post paid.

Calla (Lily of the Nile).—Fine foliage; easiest culture 1/6

Cinerarias.—Well-known Plants May to November, each 1/6

Coleus.—Beautiful ornamental leaves; various kinds in spring 1/-

Dielythra spectabilis (Bleeding Heart).

Old favourite, pink and white. 2/6.

Eucharis.—Amazonica. The lovely Eucharis Lily, from 2/6

Ferns.—Many fine, hardy varieties in pots, from 1/6

Fuchsias.—In splendid variety; single and double. See special list 1/6

Gloxinia.—Dry tubers can only be obtained during April, May, June, and July; later on, in a growing state, in pots.
Dry Tubers 1/6 each, 16/- doz.
In Pots 2/- each, 22/- doz.

Hardy Dracaenas.—Very hardy foliage plants 1/6

Heeria Rosea.—Rose coloured flowers, very attractive 1/6

Heliotrope.—Sweet scented, favourite flowering plants 1/6

Hydrangea.—Fine flowering plants; very attractive sorts, from 1/6

Maranta.—Very pretty decorative plant 1/6 to 2/6

Mimulus (Musk).—Make charming pot plants 1/6

Ophiopogon.—Violet flowers; variegated foliage 2/-

Paeony officinalis (Paeonie Rose).

A beautiful old favourite. We can supply these in ten varieties, all shades. These 10 sorts have been sent to us as the very best extant in France. They are well worth growing. Quite hardy. Price, 2/6 each, or one each of the ten for 21/-.

Palms.—We can supply these in all sizes and varieties, from 1/6 upwards.

Primula (Chinese Primrose).—Extremely handsome 1/6

Primula Obconia.—Very hardy 1/6

Staghorn Ferns.—Grown on walls are very beautiful, from 2/6 to 21/-

And many other varieties suitable for the purpose.

BOUVARDIAS

A beautiful class of plants, which rank amongst the most elegant border perennials. They flower all through the summer, almost to the middle of winter. As cut flowers for bouquets and sprays, and for table decoration, they stand unrivalled.

1/3 each; 13/- dozen (except where shown).

Beauty of Brisbane.—The best pure white offered.

Bockii.—Bright pink, white throat.

Coral Queen.—Soft salmon colour.

Countess Hopetoun.—Colour rosy salmon, very large. 1/6.

Dazzler.—Fine trusses of scarlet flowers.

Duchess of York.—Deep blush pink.

Elegans.—Vermilion-scarlet.

Enid Oliver.—A distinct variety of a pale pink shade; the individual flowers are formed by six or even more petals; strong grower. 1/6.

Ethel Kerslake.—White, improvement of Mrs. G. H. Kerslake. 1/6.

Federal Queen.—Bright scarlet, single, excellent.

Flavescens (Improved).—Yellow.

Humboldtii Corymbiflora.—Improved snow-white, scented.

King of Scarlets.—Immense blooms, deep scarlet; vigorous grower.

Mabel Porter.—Dark scarlet.

Maiden's Blush.—Bright blush pink.

Miss Eileen Beeston.—One of the best; pinkish heliotrope; very attractive. 1/6.

Miss Ida Cheeseman.—Very distinct; large flowers, delicate pink colour. 1/6.

Mrs. Gazzard.—Very pretty shade of clear pink. 1/6.

Mrs. G. H. Kerslake.—Massive waxy white, deliciously fragrant.

Mrs. McCulloch.—Immense trusses of reddish salmon colour; distinct. 1/6.

President Cleveland.—Very large, brilliant scarlet.

President Garfield.—Double pale flesh.

Priory Beauty.—Pale satin rose.

Rubra.—Dark crimson, free flowering.

CONIFERS & TAXADS

***Araucaria.**—Bidwilli (Bunya Bunya), 50ft. 2/-

Excelsa (Norfolk Island Pine), 100 ft. 2/-

Cunninghami (Hoop Pine).—Somewhat similar growth to Norfolk Island Pine, but does well inland, 60ft. 2/-

Most beautiful and graceful trees, of moderate growth.

Cedrus.—Deodora (Indian Cedar), 50ft., from 2/-

Cedrus Atlantica.—From 2/-

Cryptomeria.—Japonica, 30ft. ... 2/-

Elegans 2/-
A graceful half-tree, foliage varying from bright green in summer to bronze in winter.

Cupressus.—Funebris, 30ft. 1/6

Goveniana, 25ft. 1/6

Lambertiana (spreading), 40ft., from 3/6

Lambertiana Aurea, 40ft., from 3/6

Lawsoniana Argentea (Silvery) (Book Leaf Cypress), 30ft. ... 2/-

Lawsoniana Alba Variegata, lovely variegated, 10ft. 3/6

Macrocarpa (Lemon Scented), commonly called Cypress Pine, 30ft. 1/6

Brunniana Aurea.—This is a form of golden Macrocarpa, and will prove beyond doubt meritorious; conspicuous for hedges and single specimens, 10ft., from 3/6

Sempervirens (upright Cypress), 50ft. 1/6

Torulosus (true).—From cuttings, an elegant and compact-growing tree from the Himalaya Mountains. Planted as a specimen, it is of a beautiful shape and habit, and superior to any other of its class. Is also unequalled for hedge planting. (See hedge plants). 20ft. 3/6

Juniperus.—Africanus, 4ft. 2/-

Bermudiana (Pencil Cedar), 30ft. 2/6

Hibernica (Irish Juniper), 15ft. . 2/-

Virginiana (Red Cedar), 30ft. ... 2/6

Hardy, graceful, and most useful for general ornamentalations. Very compact in growth.

- Pinus.**—**Halepensis** (Aleppo Pine), 100ft. 1/6
Insignis (Californian Pine), 100ft. 1/6
 Larger and smaller samples at special quotations.
Canariensis (Canary Pine) 1/6
Maritima (syn., *Pinaster*), 50ft. . 1/6
Pinea (Stone Pine), 60ft. 1/6
Sylvestris (Scotch Fir), 80ft. .. 2/-
Podocarpus.—**Elata**, 30ft. 2/6
 Handsome, ornamental trees; require fairly good soil, with shelter.
Retinospora.—**Ericoides**, 15ft. 2/6
Plumosa, 15ft. 2/6
 Beautiful dwarf trees, of quick growth, from Japan; suitable for cold districts.
Salisburia.—**Adiantifolia** (Maiden-hair tree), 40ft. 2/6
- A handsome tree, with fine foliage; suitable for the coldest districts.
- Taxus.**—**Baccata** (Yew), 20 to 30 ft. 3/-
- Thuja.**—**Lobbi** (*Gigantea*), 50ft. .. 2/-
Orientalis, 40ft. 2/-
Orientalis Aurea (the Book-leaf Cypress), 8ft. 2/-
 A hardy and very useful form of plants. *Aurea* forms a very compact and beautiful shrub, and can hardly be misplaced.
- Thujopsis.**—**Dolobrata variegata**, 30ft. 2/6
 Handsome, compact-growing trees, of graceful habit.

CAMELLIAS

WE propagate about 150 varieties of these and have all the choicest sorts. Customers would do well to leave selection in our hands.

3/- each, 33/- per doz.

CANNAS

1/- each; 11/- dozen.

This is a decorative plant of great beauty, nearly always in flower; magnificent foliage; not particular as to soil or situation. A very ornamental plant, apart altogether from its surprisingly lovely flowers. We stock over 30 of the best and newest varieties. Dwarf and free growing to suit requirements. Plant a good large bed or border of these you could not get a better display.

Procumbens.—Bearing large scarlet edible berries, may be made to cover a fence.

HEDGE PLANTS

Nothing conduces more to the beauty of a homestead than appropriate hedges, well kept. Hedge plants should be planted early in the season, so that they may be well established before summer.

- Berberis.**—Vulgaris. Plant 2 feet apart. Useful hedge plant, 16/- per doz.
- Bougainvillea.**—Sanderiana. Plant 3ft. apart; makes a pretty hedge and flowers abundantly, 22/- per doz., 150/- per 100.
- Bougainvillea Traili.**—Plant 3ft. apart; 27/- doz.; 200/- per 100.
- Cerasus.**—Lauro-cerasus (English Laurel) Plant 3ft. apart. Splendid plants; in pots, 15/- per doz.; 100/- to 100.
- Crataegus Crenulata (Fire Thorn).**—A beautiful evergreen hedge, white flowers followed by profusion of crimson berries. Plant 3ft. apart; 15/- per doz., 100/- per 100.
- Coprosma.**—Lucida. Plant 3ft. apart; 16/- per doz., 120/- per 100.
This is a good hedge plant, and is particularly hardy, especially on the sea coast.
- Cupressus Torulosus.**—This is the true variety propagated from cuttings. We cannot recommend it too highly. It is quick growing, and without requiring any trimming; its habit is so naturally uniform that a hedge will grow most even and symmetrical. It is extremely hardy, and stands all soils and climates better than most hedge plants. Plant 3ft. apart. Nice plants well established in pots. 36/- per doz. Special quote for larger quantities.
- Cupressus.**—Lambertiana Horizontalis (true). From 40/- doz.
Specially fine specimens in 6in. pots, 3ft. 6in. high and bushy, 6/- each, 65/- per doz.
- Macrocarpa** (commonly called Cypress Pine).—Plant 3ft. apart. Well-known hedge plants, 15/- doz., 100/- per 100.
- Sempervirens** (Upright Cypress).—A great acquisition to the tall growing section; plant 3ft. apart; 16/- doz., 120/- per 100.
- Duranta.**—Blue. Plant 3ft. apart. One of the coming flowering hedge plants, always attractive.
In 3in. pots, 10/- per doz., 70/- per 100.
In 4in. pots, 14/- per doz., 100/- per 100.
- Escallonia.**—Macrantha. Makes a splendid evergreen fence, bright scarlet flowers. Plant 3ft. apart, 15/- per doz.
- Eugenia Pendula.**—Small leaved Lili Pili, very pretty and suitable for hedges. Plant 3ft. apart; 16/- doz.
- Hibiscus.**—Sorts. Plant 3ft. apart. From 15/- per doz.
Will make a grand ornamental flowering hedge. See descriptions in general shrub list.
- Holly.**—English, well known, and a grand hedge for cool climates; plant 4ft. apart. Plants in pots, 22/- per doz.; 150/- per 100.
- Ligustrum.**—
Lucidum (Large Leaf Privet).—Plant 12in. apart, 2/6 per doz.; 15/- per 100; not less than 50 at 100 rate.
Pubescens (Small Leaf Evergreen Privet).—Plant 12in. apart. 2/6 per doz., 15/- per 100.
Elegantissimum Aurea.—A very choice dwarf growing species, makes a perfect hedge up to 3ft. high. A variety which stands unique amongst hedge plants. In 4in. pots, 15/- doz., 120/- 100; in 3in. pots, 9/- doz., 65/- per 100.
- Olive Common** (Olea Europea).—Plant 12in. apart. In pots 9/- per doz., 65/- per 100; from open ground, 3/- per doz., 20/- per 100.
This withstands drought and heat splendidly, is a quick grower, and stands any amount of cutting back.
- Photinia Serrulata** (Chinese Hawthorn).—This will prove a very pretty large hedge, 6 to 9ft. high, evergreen, and with large shining foliage and umbels of white flowers. Plant 4ft. apart, 16/- per doz.; 120/- per 100.
- Pittosporum.**—Eugenoides, 16/- per doz.; 120/- per 100.
Eugenoides Variegata, specially grafted plants, 36/- per doz.
Undulatum (Victorian Laurel), 15/- per doz., 100/- per 100.
These make fine evergreen hedges for a garden, and can be trimmed close into any desired shape. The foliage is handsome, and of a fine fresh green colour. Plant in single rows, 2ft. apart.

Plumbago.—White and Blue. Plant 2ft. apart, strong, 16/- per doz.; 120/- per 100.

Prunus.—Myrobolana (Myrobolan Plum). Hardy fruiting hedge. Plant 2ft. Strong plants, 7/6 per doz., 50/- per 100.

Raphiolepis Indica.—Indian Hawthorn. Plant 3ft. apart; good flowering hedge. 16/- per doz., 120/- per 100.

Roses in Variety, suitable for hedge purposes. Plant 3ft. apart. Our selection, 16/- per doz., 120/- per 100. In these we recommend to plant one variety to ensure uniformity in growth.

Spartium Junceum (Yellow Broom).—This makes an ideal hedge, very showy with its clear yellow blooms. Plant 4ft. apart. 15/- doz., 100/- per 100.

Tecoma.—Capensis. Bright red flowering hedge. Looks well planted alternately with Plumbago. Plant 3ft. apart. 16/- per doz., 120/- per 100.

Veronica.—Very compact free-blooming shrubs, suitable for a hedge. Plant 3ft. apart. 15/- doz., 100/- per 100.

Viburnum.—Tinus. Plant 3ft. apart; useful evergreen hedge. 16/- per doz.; 120/- per 100.

PALMS & CYCADS

Areca.—Baueri, 30ft., from 2/-

Brahea.—(See Washingtonia).

Chamaerops.—Excelsa, 20ft., from 2/-

Corypha.—Australis (Cabbage Palm), 100ft. from 1/6

Cocos.—Plumosus, 40ft., from ... 2/6

Weddiana, from 3/6

Cycas.—Revoluta, 8ft., from 2/6

Kentia.—Belmoreana, 15ft., from 1/6

Canterburyana, 10ft., from 2/-

Fosteriana, 15ft., from 1/6

Phoenix.—Dactylifera (Date), 20ft. from 2/6

Canariensis, 15ft., from 2/6

Reclinata, 12ft., from 2/6

Seaforthia.—Elegans (Bangalow), 100ft., from 2/-

Washingtonia.—Filifera (Brahea Filamentosa), Railway Station or Cotton Palm, as this is often called on account of its mass of thread hanging on the leaves. This is a very showy palm and so well adapted to our warmer climates, where it makes a beautiful specimen, either singly on a lawn, or in groups or rows. We have a large stock of nice plants in 4in. pots from 1/6 to 2/6; 5in. from 2/6 and 6in. pots from 3/6 each. Also advanced specimens in large pots and petrol tins from 7/6 to 30/- each.

PELARGONIUMS

ZONALE (DOUBLE AND SINGLE FLOWERING GERANIUMS).

In good variety, 1/6 each; 16/- per doz.

Aldenharn.—Single scarlet.

Apothoise.—Double red.

Arctic Circle.—Single white.

Beatrice.—Double pink.

Bertha de Pressily.—Double clear pink.

Caesar.—Double crimson.

California.—Semi-double scarlet.

Chevarra Hermanos.—Double scarlet.

C. of Hopetoun.—Single white margin, purple to crimson.

Crabbe.—Single crimson.

Dr. Chabanne.—Double blush heliotrope.

Eclipse.—Single scarlet.

Emily Bleaumont.—Double dark salmon.

Eucharis.—Single white.

Etermanthe.—Semi-double scarlet.

Hedwig Buchner.—Double white.

Jean Viand.—Semi-double pink.

King Edward VII.—Single red.

Lady Roscoe.—Single rose pink.

Mde. Charlotte.—Semi-double, light salmon.

Mde. Godfrey Stars.—Double purple.

Mde. Landry.—Double Salmon.

Maud of Wales.—Salmon.

Mark Twain.—Single scarlet.

M. Ratire.—Double clear pink.

Princess Alex.—Single deep rose.

Psyche.—Single scarlet.

Raspail Goretti.—Double red.

Raspail.—Double crimson.

Salonia.—Double cerise.

Snowstorm.—Single white.

IVY-LEAVED (GERANIUMS).

1/6 each; 16/- doz.

Beauty of Jersey.—Lovely scarlet, shaded purple.

Beauty of Perth.—Very bright heliotrope, the petals splashed with deep crimson.
Future Fame.—Beautiful dark purple colour.
Her Majesty the Queen.—A pleasing salmon-coloured variety.
Joseph Warren.—A large rosy-purple choice.
La Corinthienne.—White, tinted blush; a very charming variety.

La France.—Flesh, turning to rose.
Millfield Gem.—Shell-pink, tinted red.
Papa Chapfer.—Deep crimson-scarlet, superb.
La Rosiere.—Flesh, turning to rose.
Souvenir de Chas. Turner.—Gigantic trusses, colour deep pink shade; feathered maroon in the upper petal.

PERENNIAL PHLOX

These are indeed a fine class of plants, growing to a height of from 2 to 3 feet. The large trusses of blooms are arranged with perfect regularity, so that every floret is displayed to the eye. We stock only the best improved large-flowering type.

1/3 each, 13/- dozen, post free.

GENERAL LIST.

Archibald Forbes.—Salmon rose, crimson eye.
Beranger.—Soft salmon pink and heliotrope eye.
D. R. Laird.—Purplish rose.
E. Campbell.—Salmon pink, white eye, with carmine.
Eclairer.—White, delicate pink eye
E. Danganvilliers.—Lilac blue, white centre.
Excelsior.—Bright rose, large.
Flora Horning.—White, carmine eye.
Ferd Cortez.—Coppery bronze.
Lord Kitchener.—White, carmine eye.
Levondale.—Blush white, lilac eye.
Lumineaux.—Carmine to rosy blush.
Mad. Carvello.—Salmon pink, white eye.
Marie.—Salmon self, extra large.
Rynstrom.—Extra large, pale pink.
Tapis Blanc.—Pure white.
Wm. Veitch.—White, crimson eye.

LATEST NOVELTIES

(Just Imported)

1/6 each, set of 12 for 15/-. Post Paid.
A. Finez.—Deep aniline red.
Cleopatra.—Crimson purple, shaded clear lilac, blood red.
Dalila.—Broad white flowers, pale purple centre.
General Gouraud.—Bright orange red.
Henry Furzy.—Dwarf, large horizontal panicles, round flowers, white and flax grey in rays, purplish eye.
Loiret.—Clear carmine red, white eye.
Marechal French.—Superb sort, vigorous, bright-red, and blood red eye.
Marguerite Bouchon.—Very large pure white flowers, one of the best.
P. Alizard.—Nice red, purple aureola.
President Poincare.—Pink glazed white.
September Glut.—Pyramidal panicles, bright scarlet, orange red with deep blood red eye.
Sophocle.—Deep scarlet with reflects deeper red.

PENTSTEMONS

As an attractive and decorative plant for the flower border, the Pentstemon has no rival. It is easily grown, stands the heat and drought better than any other florists' flower, perfectly hardy, and produces fine spikes of bloom throughout the greater part of the year. 1/3 each, 13/- dozen.

A. J. Tymms.—Purple red shading to white, creamy throat, lip blotched chocolate.
Blue Beauty.—Violet shade, white throat.
Brilliant.—Bright red, white throat, large flower.
G. A. Biddolph.—Tube soft rose, throat pure white, lip rosy heliotrope.

G. H. Kerslake.—Purplish red, white throat, lip striped and blotched chocolate.
Gen. Allenby.—Tube scarlet, lip blood red, blotched crimson, throat white, pencilled maroon.
Gloria.—Tube and segments vermilion, throat white.

Hercules.—Tube crimson, segments scarlet, throat white, slightly pencilled scarlet.

Miss E. Farrell.—Tube soft carmine rose, lip rose salmon, blotched maroon, throat white, pencilled maroon.

Mrs. G. H. Kerslake.—Tube white, lip clear rosy lilac, throat white, faintly pencilled.

Miss V. Baker.—Puce pinkish heliotrope, lip carmine rose, throat white, lip faintly spotted maroon.

Noel.—Crimson scarlet tube, throat pure white, lip scarlet.

Phenomenal.—Throat pure white, tube and segments rosy-white, immense funnel-shaped flowers and long spikes.

Princeps.—Tube and petals purplish crimson, throat white, blotched vermilion, gigantic bloom.

Refulgens.—Throat white, splashed maroon, tube crimson.

Rising Sun.—Soft reddish salmon, throat white, beautiful spikes of large flowers.

Sir Douglas Haig.—Tube bright red, lip scarlet, blotched crimson.

Vivid.—Colour deep scarlet, throat white pencilled, and blotched at the orifice with crimson.

We have selected the above as the best collection extant for wealth of colouring, size, and free blooming. The set of 18 for 18/-, post free.

ASTERS

IN ADDITION TO THE USUAL VARIETIES WE OFFER THE FOLLOWING, JUST LANDED

1/6 each, or 15/- for the 12. Post Paid.

Ardon.—Very large flowers, semi-double, clear rose, very elegant.

Astrea.—Very large flowers, dishevelled, mauve, lilaceous rose, late superb.

Beaute Orleanaise.—Numerous double flowers, bright mauve, the earliest flowering variety among the double.

Buisson Rose.—Very numerous flowers, clear rose.

Mme. Emile Thoury.—Very large flowers, clear blue violet.

Anita Ballard.—Double exquisite shade of soft cornflower blue, of very great effect.

Cloudy Blue.—Double blue lavender.

Grey Lady.—Very large flowers, pearly opal grey.

October Dawn.—Dwarf and compact, fully covered with large mauve blooms.

Reine De Hatives.—Very early double rose mauve.

Farreri.—A most glorious aster, large flowers, composed of numerous narrow drooping florets of the richest violet.

King George.—Huge flowers up to 3 inches in diameter and in trusses of 20 to 30 on a stem; colour bluish violet, with yellow centre.

VIOLETS

Choose a moist and slightly shaded position, if possible. If grown in the open they must be mulched and watered freely during summer.

GENERAL LIST.

SINGLES

Admiral Avellan.—Reddish purple, 3/6 per doz.

California.—Deep blue, 3/- per doz.

John Raddenbury.—Pale blue, long stems, 3/- doz.

La France.—Large blue, 3/6 doz.

Princess of Wales.—Violet, long stems, 3/- doz.

White Czar.—Pure white, 3/- doz.

DOUBLES

Count Brazza.—Pure white, 5/- doz.

Marie Louisa.—Dark blue, 5/- doz.

Neapolitan.—Pale blue, 5/- doz.

MRS. LLOYD GEORGE.—This is without doubt the best in this section. The blooms are produced on stems 9-12in. long and with enormous dark bloom single flowers, measuring up to 2in. across. 6d. each; 5/- per doz.

GERBERAS

(BARBERTON DAISY)

These are becoming increasingly popular, thriving well in all climates.

We offer separate colours in the following shades:—

White	Cream	Pale Pink
Deep Pink	Salmon	Scarlet
Crimson	Cerise, etc.	

Strong Plants, 2/- each, 20/- doz.

Also Mixed (Flowering Plants) at 1/6 each, 16/- doz.

ROCKERY PLANTS.

Rockery Work has recently become very popular in suburban and better Gardens. We have a fine collection to offer, including Agave, Oloe, Cereus, Cotyledon, Crassula, Euphorbia, Klimia, Opuntia, Mesembryanthemums, etc., etc. (selection left to ourselves), at from 1/- each, 11/- per doz.

Advanced Plants!

We hold a fine stock of well-known plants in tins and tubs, also in ball from open ground, at advanced rates, which will make an immediate display when planted. Amongst them we quote:—

	Each
Pinus Insignis, 5ft. high	5/- to 7/6
Ficus Australis, 3ft. stems, 4ft. high	from 5/-
Viburnum Suspensum, bushy, 2ft., 3ft.	from 4/-
Viburnum Lucidum, bushy, 2ft., 3ft.	from 5/-
Araucaria Cunninghami, 4ft.	from 7/6
Pittosporum of sorts, 3ft.	from 5/-
Brahea (Cotton Palms), 3ft., 4ft.	from 12/6
Phoenix (Date Palms), 3ft.	from 5/-
Kentias up to 15ft. for planting outside	from 10/6
Cassias	from 5/-
Hibiscus Courteges	from 4/-
Escallonia Macrantha	from 3/6
Crataegus Crenulata	from 3/6
Ochna Multiflora	from 3/6
Dombeya Dregiana	from 5/-
Eugenia Pendula	from 4/-
Veronica, varieties	from 4/-
Cupressus of sorts	from 3/6

DELPHINIUMS.

Of these favourites we have an exceptionally good strain, and can offer large roots which have already flowered, and will throw up spikes of bloom the first season, 3 to 4 ft. long, mixed colours, 1/- each, 11/- doz.

FARM SEEDS

At the request of numerous customers who have experienced difficulty in procuring reliable seeds at reasonable prices, we have added these lines to our business of recent years, and are pleased to report we are getting very good support. As the prices of these lines fluctuate from time to time, we cannot quote here, but will always be pleased to forward current prices by letter. Get our rates before ordering elsewhere. Bear in mind that our seeds are always the best.

Our stock at date embraces the following. Many other varieties are added as the season advances.

- | | |
|---|--|
| Beans (Velvet, Horse or Tick), Soya. | Sheep Burnet. |
| Cow Pea (White, Black, Clay Coloured). | Sorghums (Early Amber Cane, Planter's Friend, Saccaline). |
| Field Peas (Blue, Dun, Grey). | Sowing Rape (Dwarf Essex). |
| Seed Maize (varieties on application). | Swede Turnips , and other Field Turnips. |
| Seed Millet (Hungarian, Japanese, White French). | Tares or Veitches (Black and Golden). |
| Seed Oats (Algerian, Sunrise, Guyra, Mulga). | |

GRASSES.

- | | |
|-------------------------------|-------------------------------|
| Australian Blue Grass. | Phalaris Bulbosa. |
| Cocksfoot Grass. | Poverty Bay Rye Grass. |
| Couch Grass. | Prairie Grass. |
| Italian Rye Grass. | Rhodes Grass. |
| Kentucky Blue Grass. | Sheep's Fescue. |
| Meadow Foxtail. | Sudan Grass. |
| Mitchell Grass. | Tall Fescue. |
| Paspalum Compressum. | Tall Oat Grass |
| Paspalum Dilatatum. | Timothy or Cat's Tail. |
| Perennial Rye Grass. | Wimmera Rye Grass. |

LUCERNE AND CLOVERS.

- | | |
|---|---|
| Alsike Clover. | Perennial Red Clover (or Cow Grass). |
| Beerseem or Egyptian Clover | Scarlet Clover. |
| Lucerne (N.S.W. true type Hunter River Broadleaf). | White Clover. |

SUBTERRANEAN CLOVER.

The King of Winter Fodders.

No one interested in the raising of live stock can afford to overlook the advantages of this wonderful Clover, and we would like all our friends to try a patch for themselves.

On land which is too shallow for lucerne and in the upland districts where the winters are protracted, Subterranean Clover provides a wealth of feed which cannot be compared with anything else of a like nature.

Sown between March and August, it will grow right through the Winter and into the Spring. When it dries off with

the approach of Summer, the plant retains its fattening properties like most clovers and trefoils, and is eagerly sought after by all classes of animals.

When sowing broadcast through grasslands, we suggest breaking the surface to enable the young plants to obtain a foothold, and in this manner 8 to 10 lbs. of seed would be required per acre.

If sown in drills about six feet apart in well prepared ground, 2 to 3 lbs. of seed per acre should be sufficient to establish a crop.

We offer Best Quality Recleaned Fresh Seed Only. Prices on Application.

We shall be pleased to quote current prices at any time.

WE WELCOME INSPECTION BEFORE ORDERING

VEGETABLE SEEDS IN BULK

Garden Peas in bulk.—All the leading sorts from the world's best sources. Lists and prices (current) on application.

Beans.—All the leading sorts, including Canadian Wonder. Current prices and list of varieties we stock on application.

CROSS-FERTILISATION

As a result of observation and experiment during the last few years, many orchardists of long experience have become impressed with the necessity for making provision for the cross-fertilisation of certain classes of fruits, notably Apples and Pears. It is claimed that Cross-fertilisation results in larger crops, in so far that the blossom sets better than under ordinary circumstances. Where large blocks of one variety of Apple or Pear are being set out, it is considered advisable to plant at intervals trees of other varieties having similar blossoming periods, so that the Cross-fertilisation process may be carried on without calling for any immediate intervention on the part of the orchardist. For example, where Jonathans are being planted, every seventh or eighth row might with advantage be devoted to Granny Smith or some other Apple having a blossoming period corresponding closely with that of Jonathan. For an alternative an orchardist could plant single cross-fertilisers at intervals in the rows, or take advantage of the top-worked stocks, which we are now specially preparing for his convenience. These top-worked trees are each having worked on one limb a bud of a sort adapted for the cross-fertilisation of the main crop. In the case of Jonathan, we are using a cross-fertilising agent Granny Smith and McIntosh; the former has the advantage of being distinct in character and of coming in later, and therefore is not likely to lead to confusion in the gathering and packing. These top-worked trees, if distributed throughout a block in the proportion of say one for every nine of the main crop trees, should prove efficient as cross-fertilising agents, and should not interfere to any serious extent with the plans of the orchardist in regard to the growing of the varieties he considers most desirable.

Each of the methods indicated no doubt has its advantages and drawbacks, and it remains with the individual to decide as to that which will best suit him. By top-working the stocks previously referred to we are aiming at widening the choice of our clients, and we shall be prepared to execute orders this season.

We are indicating in our detailed descriptions of Apples and Pears the blossoming periods of each variety as described by the Government experts, so that growers may be guided in making their selection.

In cases where strong winds from any given direction prevail during the blossoming season, it would be as well for orchardists to see that the cross-fertilising agents are well represented on the extreme windward boundaries of the various blocks.

FERGUSON'S COMPLETE SPRAYING CHART.

SPRAYING CHART

81

DISEASE.	TREES AFFECTED.	PART AFFECTED.	REMEDIES.
Aphis (Black and Green)	Peach, Apricot, Cherry, Japanese Plum, etc.	Leaves and Young Wood	Black Leaf 40, Tobacco Wash, Sunlight Soap Solution
Aphis (Woolly, American Blight)	Apple, Pear, etc.	Branches	Black Leaf 40, Red Oil, Kerosene Emulsion
Borer	Apple, Pear, Plum, etc.	Branches	Lime, Sulphur, Bordeaux, Kerosene Emulsion
Black Spot	Apple, Pear, Plum, etc.	Leaves and Fruit	Bordeaux
Codlin Moth	Apple, Pear, Quince, etc.	Fruit	Arsenate of Lead, 1lb. to 20 gals. of water; also Bandaging
Indian Wax Scale or Cottony Cushion	Citrus Trees	Limbs	1 gallon Red Oil, 8lbs. Washing Soda, 40 gallons water. Boil 8lbs. of Soda in 2 gallons water
Fruit Fly	Practically all Late Fruits	Fruit	Various Lures, such as Kerosene Spraying with 1lb. Arsenate Lead, 15lbs. Treacle, 25 gallons water. Keep orchard clean, destroy all fallen or affected fruit
Leaf Curl	Peach, Nectarines, etc.	Leaves	Bordeaux or Copper Soda Mixture
Red Spider	Apples, Pear, etc.	Fruit	Red Oil, or Kerosene Emulsion, 1-15
Red Scale	Citrus	Fruit and Tree	Lime, Sulphur, Red Oil, or Fumigation with Hydrocyanic Acid Gas
Rutherglen Bug	Peach, Plum, etc.	Leaves and Fruit	Tar on Damp Straw burnt beneath tree suffocates. All weeds and cover should be kept down. Spray with Tar Water, 1lb. to 50 gallons water or resin
San Jose Scale	Deciduous Trees	Fruit and Tree	Same as Red Scale
Citrus Scab	Citrus Trees	Fruit	Bordeaux
Shot Hole	Apricot, Cherry, etc.	Leaves and Fruit	Bordeaux
Slug	Cherry Plum, Pear, Quince, etc.	Leaves	Arsenate of Lead, strength according to season

Most of these remedies we shall be pleased to supply. See coloured inset, and usually full instructions accompany each package. The strength to apply naturally varies with the time of year applied.

SPRAYING MATERIALS

HOW TO MAKE AND WHERE TO PROCURE

KEROSENE EMULSION.—Hard soap, $\frac{1}{2}$ lb.; kerosene, 1 gallon; boiling water (soft), 3 quarts. Make up to 14 gallons of solution. Dissolve soap in 3 quarts of water, and, after the vessel has been removed from fire, add kerosene slowly, stirring well while mixing. Apply warm.

TOBACCO WASH.—Soft soap, 1 lb.; tobacco stems, 2 lbs.; steep tobacco overnight in bucket of water; strain in morning, and add soft soap; make up to 6 gallons; apply warm. For aphids, apply when sun is bright, and as often as the pest makes its appearance. Black leaf 40 per cent., is a very much concentrated form of this mixture, and is preferred by many, as usually one spraying with the latter does for the season.

SUNLIGHT SOAP WASH.—Strong Sunlight soap, 1 lb. boiled in 10-12 gallons water and applied with either brush or spray pump. For aphids, apply when the sun is fairly hot, and if the pest is not dead in an hour increase the soap. Specially recommended where only a limited number of trees are to be treated.

ARSENATE OF LEAD, BORDEAUX MIXTURE, BLACK LEAF 40 PER CENT., LIME-SULPHUR, RED OILS.—These we can supply in any of the leading brands, and shall be pleased to recommend and supply any of our clients. Being large handlers, our prices will bear very favourable comparison. We have added these lines to our catalogue of late years, at the request of numerous customers who have experienced difficulty in procuring reliable spraying material at reasonable prices. Many sprays that do not do their work thoroughly are on the market, and, although these may be a little cheaper than other brands, as far as first cost goes, if re-spraying is necessary the amount of time and money lost warrants us recommending a reliable brand.

FOR PRICES AND BRANDS WE RECOMMEND SEE COLOURED INSET

WORKING TREES TO ORDER

At all times we shall be pleased to work specially to order. It frequently happens that a chance seedling is found to suit a certain district, and is well worth perpetuating, or an old variety, of which the name may be lost, would be wanted to be replaced, either on account of outstanding merit, or even on account of its old associations.

Then again the actual names vary in many districts, and difficulty is experienced in procuring, where only a local name is known.

In such circumstances we shall be glad to work, specially for clients their own wood. Budding is done between Xmas and Easter, and the resulting trees are the property of the sender absolutely.

PEDIGREE FRUIT TREES

Just a few words on the matter which is most important to everyone who grows Fruit, whether for profit or home use.

Some of your trees produce very much better fruit—and more of it—than other trees treated in exactly the same way. The whole block is probably true to type, but individual trees year after year produce more profitable crops. There is no accounting for this; in fact, we are not troubling about the reason why. We want to get the whole Orchard full of such trees.

Our widely extended business enables us to locate the best of every variety, and it is from such, and such only, that our Pedigree Fruit Trees are propagated. Our own Test Orchards are in existence for just this reason.

But even with the wood for propagation in our hands, our task is far from complete. If worked on unsuitable stocks or roots we may destroy all the advantages obtained from our Pedigree Wood.

We pay just the same attention to producing a suitable stock for our Pedigree scion. We have been for years—and still are—experimenting with different stocks, to find the particular one most adapted to the peculiarities of the various commercial varieties of Fruits. It is not merely a matter of locality. It is partly a matter of adaptability and still more of constitution.

A Peach may be worked on a Seedling Peach, an Apple on Northern Spy stock, but this is not sufficient. The Peach stock may be derived from pits from the Factory, which have not the constitution of the wild or natural Peach. The Apple stock may be a sucker, or worse, merely grafted on a piece of a root.

In raising our Pedigree Fruit Trees we have tried to eliminate these dangers. Our Trees are firstly worked with Pedigree Wood from selected Fuiting Trees. This is worked on stocks which our experience shows is best adapted for each variety. The result is a Pedigree Tree which is sure to give satisfaction if given ordinary attention.

The Department of Agriculture, in conjunction with the Fruitgrowers' Association of N.S.W., are now urging that bud-selection be made compulsory for all nurseries by law. This, if properly administered, we will welcome; in fact, we have been doing just what they wish for the past twenty-five years without any pressure.

Such trees are not cheap Trees. Careful work such as this has to be paid for, but we confidently offer our Pedigree Trees as being ultimately the cheapest. Such trees give profitable Orchards—every tree a moneymaker, with no non-productive, useless trees scattered through the rows.

卷二

Wholly set up and printed in Australia by W. J. Cryer & Co. Ltd., Arnold Place, Sydney.

HINTS TO OUR CLIENTS

In ordering please use Order Sheet herewith and keep separate from letter. Kindly state clearly the route you intend trees to take. Do not forget full address, as we occasionally receive orders with neither name or address.

Freight and Packing Charges must be paid by consignee. Our system of gratis trees will be found to considerably reduce this charge. Unpack bundle on arrival and place the roots in the ground, covering well with fine soil. If this is carefully done the trees will stand unharmed for some time. Be careful to wash puddle off the roots before planting.

This Issue Cancels All Previous Prices

HOW TO PLANT.—The land must be thoroughly prepared by ploughing several times to get rid of weeds and rubbish. If possible it should be subsoiled, as this permits the excess of moisture to get away and at the same time, by enabling the roots to penetrate, allows the tree in dry weather to draw upon the moisture stored in the subsoil. We urgently advise a thorough preparation of the land before planting. **Planting in Pot Holes must be avoided** if your trees are to thrive. When the land is thoroughly prepared mark each place with a stake and open the holes as large as possible, stacking the surface soil round the hole for use when planting. Break up the subsoil well, but allow it to remain at the bottom. Do not plant your tree deeper than it stood in the Nursery. Work the fine surface soil well into the well-spread roots and tread well when your hole is half full. If watering is necessary, do it at this stage and fill in when water has disappeared.

All Trees must be Pruned when Planted.

Pedigree Our Slogan Since 1848
